LEVEL III ACCREDITATION SURVEY VISIT

**BACHELOR OF SCIENCE IN
PSYCHOLOGY**

Introduction

A nation's progress is anchored on empowered communities that are informed, resilient, and actively involved in collective growth. To support this goal, it is important to maximize the use of human capability, technical expertise, and institutional resources. The Bachelor of Science in Information Technology (BSIT) Program of PUP Sto. Tomas Campus recognizes the vital role of technology, digital skills, and information systems in promoting sustainable community development.

While development is often associated with infrastructure, employment, and economic growth, genuine progress is also reflected in improved access to education, digital services, reliable information, health support, environmental awareness, and overall quality of life. Community development must therefore be a collaborative effort where academic institutions, faculty, students, and partner communities work together to address social, economic, and technological needs.

Through its extension service agenda, the BSIT Program of PUP Sto. Tomas Campus contributes to this purpose by mobilizing its IT faculty and students to implement relevant and responsive initiatives such as digital literacy training, basic computer education, community information systems, technical support services, cybersecurity awareness, e-government assistance, website and database development, and other technology-based solutions that respond to community needs.

As an academic program of the PUP Sto. Tomas Campus, the BSIT Program is committed to developing competent, ethical, innovative, and socially responsible IT professionals. By extending its knowledge and technical expertise beyond the classroom, the program promotes digital inclusion, community empowerment, and technology-driven public service. In doing so, technology becomes not only a tool for efficiency, but also a means to improve lives, strengthen community participation, and contribute to national development.

1. Well-defined Objectives

The PUP Extension Agenda

The Polytechnic University of the Philippines (PUP) prioritizes not only the delivery of quality education but also the implementation of sustainable community development programs. Through the Extension Management Office (EMO) under the Office of the Vice President for Research, Extension, and Development (OVPRED), PUP spearheads extension initiatives that promote collaboration among institutions, industries, and communities in support of the Sustainable Development Goals (SDGs).

The University's extension agenda is guided by national and global development frameworks, including the Philippine Development Plan 2023-2028, Ambisyon Nation 2040, CHED Memorandum Order No. 52, s. 2016, and the UN SDGs 2030. CHED CMO No. 52 outlines the role of higher education institutions in transferring knowledge and technologies to address community-specific issues, emphasizing that extension should be purpose-driven, evidence-based, and socially responsive.

In alignment with these mandate, PUP's extension program serve as a platform for applying academic expertise to real-work challenges demonstrating the University's strong commitment to social transformation, empowerment, and nation-building.

PUP aligns extension programs with the thrusts of key national and international development bodies such as the Department of Economy, Planning, and Development (formerly NEDA), the Commission of Higher Education (CHED), and the United Nations, particularly in pursuit of the Sustainable Development Goals (SDGs). In line with these frameworks, the University upholds its strong commitment to positive social transformation and community empowerment through its well-defined Extension Agenda, with mobilizes the collective expertise of the PUP academic community.

Agenda 1: Social Enterprise, Business, Economics, and Finance. This agenda focuses on uplifting the economic well-being of communities through programs in cooperative development, livelihood, entrepreneurship, financial literacy, human resource management, marketing, and office administration, including specialized areas such as educational tourism and hospitality.

Agenda 2: Health, Wellness, and Safety. PUP addresses the physical and mental well-being of individuals, especially in marginalized sectors, through initiatives on

fitness, water safety, first aid, reproductive health, community health services, nutrition, and disaster risk management.

Agenda 3: Environment, Conservation, and Sustainable Development.

Recognizing the urgent threats of environmental degradation, the University implements programs on climate change adaptation, solid waste management, urban gardening, organic agriculture, and biodiversity preservation to promote ecological sustainability.

Agenda 4: Education, Communication, Culture and the Arts, Gender and Development. This agenda supports lifelong learning and cultural enrichment through projects in basic literacy and numeracy, research and media literacy, performing and visual arts, language education, and advocacy for gender sensitivity and women's empowerment.

Agenda 5: Science, Engineering, and Technology. PUP's extension programs bridge technological advancements with community application through projects on IT literacy, robotics, electronics, automation, web development, statistical training, food processing, and applied mathematics for community benefit.

Agenda 6: Governance and the Law. As an advocate for justice and equality, the University supports communities through initiatives in local governance, public management, human rights education, free legal aid, fiscal management, youth leadership, inclusivity, and special needs advocacy.

These six priority areas, as outlined in the PUP University Extension Manual, reflect the institution's holistic approach to community development. To effectively implement these, PUP established the Extension Management Office (EMO), under the Office of the Vice President for Research, Extension, and Development (OVPRED). The revised University Extension Manual, approved by the Board of Regents on September 10, 2019, was developed through rigorous review and inter-office collaboration, and formally adopted following approval by the Executive Committee.

PUP's Flagship Extension Program

Within the framework of PUP's commitment to inclusive development and nation-building, the “Salin Kaalaman Tungo sa Kaunlaran (SKTK)” serves as the flagship extension program of the University. SKTK encapsulates the core philosophy of PUP's extension work – the systematic transfer of knowledge, research-based practices, and academic expertise to various sectors of society, especially the underserved and marginalized.

This program operationalizes PUP's extension goals by fostering partnership and delivering relevant services to communities through the active involvement of faculty, administrative personnel, students, and alumni. It promotes voluntary, research-informed, and community-based engagement, guided by the results of community needs assessments and aligned with national development priorities and global sustainable development goals.

The SKTK is not only a mechanism for information dissemination and advisory services but also a platform for building sustainable linkages and networks between the University and local government units, schools, NGOs, people's organizations, and other institutions. These partnerships ensure that the extension programs are responsive, collaborative, and anchored in real-world needs.

All extension initiative whether in the form of training, livelihood programs, education support, environmental conservation, or health and well activities are

implemented under the umbrella of the SKTK. It ensures coherence, standardization, and impact monitoring across all units of the University engaged in extension work. In doing so, the SKTK reinforces the University's mission to become not only a center of academic excellence but also a vital engine of social transformation and community empowerment.

SALIN KAALAMAN. SAMA-SAMANG PAG-UNLAD. PUP Sto. Tomas Campus
Your Partner in Community Transformation.

PUP Sto. Tomas Campus <https://stotomas.pup.edu.ph>

In alignment with the University's flagship initiative, "Salin Kaalaman Tungo sa Kaunlaran (SKTK)," the PUP Sto. Tomas Campus has developed its own localized extension program "**TALINO at KABUHAYAN.**" It serves as an integrated platform for the transfer knowledge, skills, technology, and professional expertise from the different academic programs of the campus to partner communities.

The "**TALINO at KABUHAYAN**" brings together the disciplines of information technology, entrepreneurship, public administration, teacher education, psychology, and engineering to address community needs in digital literacy, livelihood development,

education support, financial literacy, public service, wellness and technical innovation. Through collaborative extension projects, the program aims to empower communities, strengthen institutional partnerships, and promote inclusive and sustainable development.

Through TALINO at KABUHAYAN, PUP Sto. Tomas Campus affirms its commitment to socially responsive education by ensuring that academic expertise is translated into practical, community-centered solutions that contribute to local and national development.

PUP Sto. Tomas Campus Extension Project: **SKTK: *The Basic Computer Literacy and Personality Development Project (BCLP)*** is continuing community extension initiative of the PUP Sto. Tomas Campus for the barangay functionaries of Poblacion II, Sto. Tomas City, Batangas. The project was designed to strengthen the digital literacy, productivity skills, work values, and personal development of barangay personnel who perform various administrative and public service functions in their community.

The objectives of the Basic Computer Literacy and Personality Development Project (BCLP) were clearly defined based on the need to improve the computer literacy, workplace productivity, professional conduct, and personal development of the barangay functionaries of Poblacion II, Sto. Tomas City, Batangas. The project was implemented as a continuing extension initiative of PUP Sto. Tomas Campus across three phases: the first implementation on July 27 to 28, 2022, Phase 2 on July 20 to 21, 2023, and Phase 3 on October 9 to 10, 2024. The 2022 report identified the beneficiaries as barangay functionaries of Poblacion II and recorded twenty-five participants, while the succeeding phases continued to serve the same partner community through progressive training activities in computer literacy, digital communication, office productivity, ethics, and personality development.

The background and rationale of the project were anchored on the importance of ICT training in the 21st-century workplace. The reports emphasized that the basic ICT training provides employees with the foundation to build new job-related skills, improve professional competencies, and contribute to organizational development. The project was also justified by the need to support continuing career and personnel development

among government workers, as cited in Rule VII of the Omnibus Rules Implementing Book V of Executive Order No. 292 and Civil Service Laws. In this context, PUP Sto. Tomas Campus responded by extending its academic expertise, facilities, and human resources to help barangay personnel become more capable, confident, and efficient in the performance of their duties.

The intended impact of the project was to train and enhance the participants knowledge in the use of computer productivity tools and to develop their personalities so they could perform their tasks and duties in their respective offices more effectively and efficiently. This impact statement remained consistent across the BCLP phases and served as the basis for determining the training objectives, selecting topics, designing the hands-on workshops, and assessing the participants' learning outputs.

For 2022 implementation, the activities conducted were Personality Development, Zoom Videoconferencing, Microsoft Word Basic to Advanced, and Spreadsheet Basic to Advance. These activities introduced the participants to essential workplace tools for communication, document preparation, and data organization. The Zoom Videoconferencing session trained participants to use digital communication platforms, while the Word and Spreadsheet sessions developed their skills in preparing documents and handling basic office data.

For BCLP Phase 2 in 2023, the activities conducted were Personality Development, Computer Ethics, Microsoft PowerPoint Basic to Advanced, and Microsoft Publisher Basic to Advanced. These activities strengthened the participants work values, ethical awareness in using technology, presentation skills, and ability to prepare simple publication materials for office and community use.

For BCLP Phase 3 in 2024, the activities conducted were Personality Development, Social and Professional Issues in Computing, Email Messaging, and Keyboarding. These activities were intended to further develop the participants' professional behavior in the use of technology, improve their ability to communicate through email, and enhance their basic typing and keyboarding skills for office productivity.

The objective of the project were also aligned with the United Nations Sustainable Development Goals (SDGs), particularly SDG 4: Quality Education, SDG 8: Decent Work

and Economic Growth, SDG 10: Reduced Inequalities, SDG 16: Peace, Justice and Strong Institutions, and SDG 17: Partnerships for the Goals. The project supported SDG 4 by providing inclusive and practical learning opportunities to community-based public servants. It supported SDG 8 by improving the participants' workplace productivity, digital skills, and professional competence. It contributed to SDG 10 by making ICT training accessible to barangay functionaries with varied educational backgrounds and levels of exposure to technology. It supported SDG 16 by strengthening the capacity of local government personnel to provide more efficient, ethical, and responsive public service. It also reflected SDG 17 through the partnership between PUP Sto. Tomas Campus, barangay officials, faculty members, staff, students, and community participants.

The project was likewise aligned with the campus extension program “**Talino at Kabuhayan.**” Under the **Talino** component, the BCLP promoted knowledge sharing, skills development, digital literacy, ethical use of technology, and lifelong learning. The training activities on computer productivity tools, email messaging, keyboarding, video conferencing, computer ethics and social and professional issues in computing directly contributed to the intellectual and technical capacity-building of the participants. Under the **Kabuhayan** component, the project enhanced the work readiness, productivity, and office-related competencies of barangay functionaries, which are essential in improving the quality of their service delivery and supporting their role in local governance and community development.

In view of the project background, rationale, impact, years of implementation, SDG alignment and alignment with Talino at Kabuhayan, the objectives of the BCLP may be stated as follows:

First, the project aimed to enhance the participants skills in using computer productivity tools through actual workshops and hands-on activities. This objective was achieved through training session on Zoom Videoconferencing, Microsoft Word, Spreadsheets, Microsoft PowerPoint, Microsoft Publisher, Email Messaging, and Keyboarding from 2022-2024.

Second, the project aimed to improve the participants personality, work attitude, self-confidence, ethical awareness, and professional conduct in the performance of their duties. This objective was addressed through the recurring Personality Development

sessions, as well as the topics on Computer Ethics and Social and Professional Issues in Computing.

Third, the project aimed to strengthen the participants capacity to perform office-related and community service functions more effectively and efficiently. This objective was supported by the practical application of digital communication tools, document preparation, data organization, presentation creation, publication design, email use, and keyboarding.

Fourth, the project aimed to provide inclusive learning opportunities that support the SDGs and the campus extension agenda on Talino at Kabuhayan may making relevant ICT and personal development training accessible to barangay functionaries with diverse educational backgrounds.

Fifth, the project aimed to assess the level of knowledge and skills acquired by the participants after the training sessions through hands-on activities, output checking, participant exercises, assessment forms, and evaluation of learning outputs.

The objectives of the BCLP were well-defined because they were grounded in the actual needs of the partner community, supported by a clear institutional and policy rationale, aligned with sustainable development goals, connected to the campus extension program Talino at Kabuhayan, and implemented through relevant and progressive activities from 2022 to 2024. The continuity of the project shows that it was not a one-time activity but a sustained extension effort aimed at developing the digital, personal, and professional competencies of barangay functionaries.

MOA between PUP and Barangay 2, Sto. Tomas City, Batangas

MEMORANDUM OF AGREEMENT

KNOW ALL MEN BY THESE PRESENTS:

This Memorandum of Agreement (MOU) made and entered into by and between:

The **POLYTECHNIC UNIVERSITY OF THE PHILIPPINES** through the Office of the Vice President for Research, Extension and Development (OVPRED) with principal office address at A. Mabini Campus, Sta. Mesa, Manila represented by its Vice President, **DR. ANNA RUBY P. GAPASIN**, herein referred to as "**UNIVERSITY**".

And

The **BARANGAY 2, STO. TOMAS CITY, BATANGAS** represented herein by its Barangay Chairman, **HON. ANTONIO M. GUEVARRA**, herein referred to as "**BARANGAY**".

WITNESSETH:

WHEREAS, one of the objectives of the **UNIVERSITY**, is to provide extension service programs to its target beneficiaries as it is dedicated to extend its expertise to the community through the **POLYTECHNIC UNIVERSITY OF THE PHILIPPINES STO. TOMAS BRANCH (PUPSTB)**, together with the **EXTENSION MANAGEMENT OFFICE (EMO)** to implement the project dubbed as **SALIN-KAALAMAN, TUNGO SA KAUNLARAN PROJECT**;

WHEREAS, the **UNIVERSITY** has chosen **BARANGAY** as its extension partner through which Barangay may tap qualified administrative staff and faculty members of the **UNIVERSITY** where the latter will serve as consultants, resource speakers, and/or trainers to conduct trainings to help improve the quality of life of the constituents of said community;

WHEREAS, the **BARANGAY** has signified its intention to partner with the **UNIVERSITY** on collaborative undertakings and area where the expertise of the **UNIVERSITY** shall be utilized, subject to pertinent policy and guidelines of the **UNIVERSITY** and the terms and conditions provided herein.

NOW THEREFORE, for and in consideration of the foregoing premises, both Parties, mutually agree as follows:

A. The **UNIVERSITY** shall:

1. Identify training needs of the **BARANGAY**;
2. Conduct trainings necessary to the needs of the community;
3. Work collaboratively with the **BARANGAY** through its Chairman and designated representatives;
4. Make available the expert services of its qualified administrative staff and faculty members from its various Colleges, Branches, Offices and Unit to **BARANGAY**;

Hon. Antonio M. Guevarra
Barangay Captain

Dr. Anna Ruby P. Gapasin
Vice President for Research, Extension and Development

Dr. Armando A. Torres
Director, PUPSTB

Prof. Pascualillo B. Galan
VP for Branches & Satellite Campuses, PUP

Dr. Anna Ruby P. Gapasin
Vice President for Research, Extension and Development

Dr. Anna Ruby P. Gapasin
Vice President for Research, Extension and Development

5. Design such program related to the needs of **BARANGAY**;
6. Provide training materials, venue and other resources needed in the conduct of the trainings, subject to government audit and accounting rules and regulations; and
7. Conduct monitoring, feedback and progress report which shall be provided to both Parties.

B. The BARANGAY shall:

1. Work collaborative with the **UNIVERSITY** on the sound implementation of the **SALIN-KAALAMAN, TUNGO SA KAUNLARAN Project**;
2. Regularly coordinate with the **UNIVERSITY** on feedbacks of the community for a more sustainable program;
3. Ensure participation of the community stakeholders in the trainings, seminars and workshop provided by the **UNIVERSITY**; and
4. Provide the **UNIVERSITY** the right to conduct post-training evaluation and similar studies in the course of the implementation of the project.

C. OTHER TERMS AND CONDITIONS

1. This Agreement shall take effect immediately upon signing hereof by the respective authorized representatives of the Parties and shall continue to be effective until the accomplishment of the purpose stated herein.
2. Any of the terms and conditions in this Agreement may be amended through a written agreement mutually agreed by both Parties; *provided further*, that the **BARANGAY** and the **UNIVERSITY** reserved the right to withdraw their participation in this Agreement upon a written notice to the other, and upon mutual terms and conditions agreed upon by the Parties herein.
3. The **UNIVERSITY** shall own, solely and exclusively, the copyrights and all copyrights to any written or otherwise copyrightable material developed under this MOU. Where the logos of the **UNIVERSITY** and the **BARANGAY** are used on the above-referenced signage, the logos of each party will be of equal size.

IN WITNESS WHEREOF, the parties hereto have signed this Agreement on this
____ day of MAY 10 2022, at CITY OF BATAVIA, Philippines.

BUDGET UTILIZATION RATE: 58.33%

OBLIGATIONS INCURRED:

2,333,388.49 -- 5,000.00 -- cost of communication (mobile), honorarium of speaker, CID conducts of webinar entitled: "PUP CID Diversity and Inclusion Talks" with the theme "Battling Widespread Poverty in the Philippines: Promoting Financial Inclusion through the 4Ps" with Mr. Wadel Cabrera III as speaker, former National Deputy Program Manager of DSWD CCT Program, Jan 29, 2022 (2pm-5pm), c/o Chief Louie C. Montemar (center for inclusivity and diversity) / endorsed by: Dir. Zandro T. Estrella (emo)

49,350.00 -- cost of ink, prepaid cards, bookbinding expense for progress report, transportation expenses, food and notarial services PUP Sto. Tomas extension project titled: "SKTK Electrical Installation and Maintenance Skills Development (EIMSD) for the Residents of Brgy. Caingin, Maragondon, Cavite" on April, 2022 - July, 2022. c/o Dir. Rolan J. Malvar (emo) / noted: VPREPD Gapasin

35,960.00 -- cost of activity sheet and lecture materials, training kit, bond papers, special paper (program, invitation, certificates), sticker paper for name tag, ink, certificate holder, tarpaulin, food, communication expense, notarial services and transportation for the PUP Sto Tomas extension proposal titled: "Barangay Computer Literacy and Personality Development (BCLP Project)" on April to September 2022 c/o Dir. Rolan J. Malvar (emo) / noted: VPREPD Gapasin

2. Adequate and Relevant Projects/Activities to Achieve Objectives

The activities conducted under BCLP were adequate and relevant to the objectives of the project. The topics were selected based on the practical needs of barangay functionaries, particularly in the areas of computer literacy, office productivity, digital communication, ethical technology use, and personality development.

In the 2022 implementation, the project covered Personality Development, Zoom Videoconferencing, Microsoft Word Basic to Advanced, and Spreadsheet Basic to advanced. These topics helped the participants develop confidence, communicate

through online platforms, prepare documents, and use spreadsheets for basic office tasks.

JULY 27-28, 2022
PUP-STB GYMNASIUM

THIS SERVES AS AN INVITATION.

DAY 1

Time	Activities	In-charge
Opening Program - PUP Gymnasium		
8:30-9:00	Registration	BSIT Students
9:01-9:30	Doxology and National Anthem	AVP
9:31-9:45	Welcome Remarks	Dr. Armando A. Torres Director, PUPSTB
9:46-10:00	Message	Hon. Antonio M. Guevarra Brgy. Chairman
10:01-10:15	Introduction of Extension Project	Assoc. Prof. Abigail A. Malabugoc Faculty Extensionist
10:16-10:30	BREAK (AM SNACK)	
10:31-11:30	Lecture/Workshop 1: Personality Development	Ms. Minera Laiza C. Acosta Trainer/Speaker
11:31-11:45	Q and A	
11:46-1:00	LUNCH BREAK	
PM SESSION		
1:00-3:00	Lecture/Workshop 2: Videoconferencing	Asst. Prof. Marienel N. Velasco Mr. Christopher Jay De Claro Trainer/Speaker
3:01-3:15	Q and A	
3:16-3:30	BREAK (PM SNACK)	
3:31-4:00	WRAP UP/ EVALUATION/ Assessment (Day 1)	
Mr. Mic Palalimpa and Miss. Patricia Abrigo Master of Ceremony		

DAY 2

Time	Activities	In-charge
8:30-9:00	Registration	BSPsych Students
9:01-9:30	Recap of Day 1	Ms. Julie Rose Palma
9:31-10:30	Lecture 3: Basic MS Word	Dr. Melani L. Castillo Trainer/Speaker
10:31-10:45	BREAK (AM SNACK)	
10:46-11:30	Workshop 3: Basic MS Word	Dr. Melani L. Castillo Trainer/Speaker
11:31-11:45	Q and A	
11:46-1:00	LUNCH BREAK	
PM SESSION		
1:01-3:00	Lecture/Workshop 4: Basic MS Excel	Asst. Prof. Ruth R. Coida Trainer/Speaker
3:01-3:15	Q and A	
3:16-3:30	BREAK (PM SNACK)	
3:31-4:30	CLOSING PROGRAM Awarding of Certificate of Participation	Dr. Armando A. Torres Director
	Closing Remarks	Engr. Liza Marie B. Nuevo Head, Academic Program
	PUP Hymn	
Mr. Mic Palalimpa and Miss. Patricia Abrigo Master of Ceremony		

In the 2023 Phase 2 implementation, the project included Personality Development, Computer Ethics, Microsoft PowerPoint Basic to Advanced, and Microsoft Publisher Basic to Advanced. These topics supported the participants development in ethical technology use, presentation preparation, and basic publication design.

DAY 1: July 20, 2023

Time	Activities	In-charge
Opening Program – PUP Gymnasium		
8:00-8:30	Registration	BS Psych Students

SKTK:
**Basic Computer Literacy and
Personality Development
(BCPL) Project**

PHASE 2
JULY 20-21, 2023
PUP-STB GYMNASIUM

THIS SERVES AS AN INVITATION.

In the 2024 Phase 3 implementation, the project focuses on Personality Development, Social and Professional Issues in Computing, Email Messaging, and Keyboarding. These topics were relevant to workplace communication, proper behavior in using technology, basic email use, and typing skills needed in office work.

The activities were not limited to lectures. They included actual demonstrations, guided practice, hands-on exercises, workshops, output preparation, and assessment. For example, the 2024 Phase 3 the participants joined an interactive workshop on Email Messaging and practiced Keyboarding using Typing Master software. Their outputs were then reviewed and evaluated to assess their understanding of the topics.

3. Systematic and Effective Procedures

The implementation of the Basic Computer Literacy and Personality Development Project (BCLP) followed a systematic, participatory, and output-oriented procedure that ensured the orderly delivery of extension services to the barangay functionaries of Poblacion II, Sto. Tomas City, Batangas. The procedure was designed to support the project objectives, which focused on improving the participants' computer literacy, personality development, work attitude, and capacity to perform office-related functions more effectively and efficiently.

The implementation began with the proper identification of the target beneficiaries and the alignment of the training activities with their actual workplace needs. The participants were barangay functionaries whose duties required basic computer use, preparation of office documents, digital communication, and proper conduct in the use of technology. The project reports emphasized the ICT training is necessary in the 21st-century workplace and that the activity was intended to provide hands-on training that would allow the participants to practice and apply what they learned.

The conduct of the activity followed an organized program flow. Each training day started with participant registration at the designated venue, assisted by students from BSIT and BS Psychology. During registration, participants were provided with training kits consisting of name tag,

Participant Attendance and Kit

printed copies of the topics, pens, and paper. This preparatory step ensured proper

attendance monitoring, readiness of participants, and availability of basic learning materials before the start of the sessions.

The opening program served as the formal commencement of the project and established the institutional and community context of the activity. It included the Doxology, National Anthem, Welcome Remarks from Campus Director, message from the Barangay Chairman, and project orientation by the Faculty

Opening Program

Extensionist. Through this procedure, the participants were informed of the purpose, relevance, and expected outcomes of the project. It also demonstrated the collaboration between PUP Sto. Tomas Campus and the partner barangay in implementing a community-based capability-building program.

After the opening program, the training proper was conducted through a

Discussion and Workshop of Ms. Minera Laiza C. Acosta,
Trainer, Personality Development

combination of lecture, demonstration, guided workshop, and practical application. The sessions were facilitated by qualified faculty trainers from the relevant academic programs. In the 2022 implementation, the procedure included discussions and workshops on Personality Development, Zoom Videoconferencing, Microsoft Word, and Spreadsheet applications. The report noted that the trainers

demonstrated the use of the software, guided the participants in actual activities, and provided assistance to those who initially experienced difficulty using the tools.

The same structured process was observed in the succeeding phases. In Phase 2, the participants underwent session on Personality Development, Computer Ethics,

**Discussion and Workshop of
Asst.Prof. Marienel N. Velasco, Trainer, Computer Ethics**

Microsoft Publisher, and Microsoft PowerPoint. The report showed that the training used interactive activities and workshops to ensure that the participants understood the productivity tools. Students assisted the participants throughout the activity, while output were checked and

evaluated after workshop to determine whether learning had taken place.

In Phase 3, the procedure was further strengthened through sessions on Personality Development, Social and Professional Issues in Computing, Email Messaging, and Keyboarding. The Email Messaging session was conducted as an interactive workshop, with BSIT students assisting the participants. The Keyboarding session followed a step-by-step instructional approach and used Typing Master software

for practice. After the activities, participants' outputs reviewed and evaluated to assess their understanding of the topics.

Assoc.Prof.Abegail A. Malabuyoc during her discussion on the topic "Social and Professional Issues in Computing".

The project also incorporated formative and summative assessment procedures. During the sessions, trainers facilitated question-and-answer portions, practical exercises, and self-assessment activities. For example, the Personality Development sessions included activities to assess the participants self-confidence, while the computer-related sessions required participants to produce outputs that were checked by the trainers. At the end of the training days, assessment forms were distributed and completed by the participants, providing the implementers with feedback on the effectiveness of the training delivery.

The closing procedure included the awarding of certificates to participants, speakers, and organizers, as well as photo documentation with the trainer and beneficiaries. This served as formal recognition of participation and completion of the training. It also supported documentation, validation, and accountability requirements for extension project implementation. The Phase 3 report specifically documented the awarding of certificates and photo opportunity with trainers and participants.

Overall, the procedure adopted in the BCLP was systematic and effective because it followed a clear sequence of planning, participant registration, orientation, lecture

delivery, hands-on workshop, guided practice, output evaluation, participant feedback, recognition, and documentation. The repeated implementation of this procedure across the 2022, 2023, and 2024 phases reflects consistency, continuity, and institutionalization of good practices in extension service delivery. The use of hands-on training, student-assisted learning, output-based assessment, and community participation makes the procedure appropriate, as it demonstrates organized implementation, measurable learning outcomes, and sustained engagement with the partner community.

Dr. Melani L. Castillo during her discussion and workshop on the topic "Email Messaging"

Design of Training Modules and Instructional Materials

The design of the training modules and instructional materials for the Basic Computer Literacy and Personality Development Project (BCLP) was guided by the project's objective of developing the participants basic computer literacy, workplace productivity, professional conduct, and personal effectiveness. Since the beneficiaries were barangay functionaries of Poblacion II, Sto. Tomas City, Batangas, the instructional design emphasized practical, competency-based, and workplace-oriented learning. The project was intended to enhance the participants' knowledge in using computer productivity tools and to develop their personalities so they could perform their duties in their respective offices more effectively and efficiently.

The training modules were organized according to actual needs of the participants and the progressive implementation of the project from 2022 to 2024. In 2022, the

modules focused on Personality Development, Zoom Videoconferencing, Microsoft Word Basic to Advanced, and Spreadsheet Basic to Advanced. These modules addressed foundational needs in self-confidence, online communication, document preparation, and data management. In 2023, the modules advanced to Personality Development, Computer Ethics, Microsoft Publisher Basic to Advanced, and Microsoft PowerPoint Basic to Advanced, which strengthened ethical technology use, presentation skills, and preparation of simple publication materials. In 2024, the modules covered Personality Development, Social and Professional Issues in Computing, Email Messaging, and Keyboarding, which further developed workplace communication, responsible technology use, and typing competency.

The instructional materials were designed to support adult learners with varied educational backgrounds and different levels of exposure to technology. The project reports noted that participants came from diverse educational backgrounds, including college graduates, college-level participants, high school graduates, high school-level participants, elementary graduates, and elementary-level participants. This learner profile required materials that were simple, clear, demonstrative, and easy to follow. The modules therefore combined conceptual explanations with step-by-step procedures, guided demonstrations, and hands-on exercises.

The design of the materials also reflected a blended lecture-workshop format. Each topic was introduced through discussion or lecture, followed by demonstration and practical application. For instance, the Zoom Videoconferencing module included step-by-step instruction on how to conduct a videoconference using Zoom, after which the participants performed an actual videoconferencing activity using their mobile devices connected to the available internet facility. The Microsoft Word and Spreadsheet modules similarly used interactive activities and workshops to ensure that the participants understood and applied the productivity tools.

In the succeeding phase, the module design continued to use demonstration and application as the core instructional approach. The Microsoft Publisher session was delivered through interactive activities and workshops, while the Microsoft PowerPoint session provided step-by-step instructions and practical exercises. The participants' outputs were checked and evaluated after the workshops to determine their

comprehension of the subject matter. This shows that the modules were not merely content-based but also output-based, allowing the trainers to measure learning through actual performance.

For Phase 3, the training modules were further refined to address current office communication needs. The Email Messaging module was designed as an interactive workshop to help participants understand the basics of email communication, while the Keyboarding module used step-by-step instruction and Typing Master software to develop practical keyboarding skills. The participants outputs were reviewed and assessed after the activities, indicating that the instructional materials were accompanied by performance-based evaluation tools.

The training modules also integrated values formation and professional development. The Personality Development modules emphasized positive attitude, confidence, strong character, and good morals, particularly for government employees. The Computer Ethics and Social and Professional Issues in Computing modules addressed proper behavior in using computers and other technologies in the workplace. These topics complemented the technical modules by ensuring that participants were not only trained in the use of tools but also guided in the responsible, ethical, and professional use of technology.

Assessment was also embedded in the instructional design. The modules used self-assessment activities, participant outputs, trainer evaluation, and assessment forms. In the Personality Development sessions, participants completed activities to gauge their level of self-confidence. In the computer-related sessions, participants produced outputs that were checked and evaluated by the trainers. At the end of the sessions, assessment forms were distributed and completed by the participants, providing feedback on the effectiveness of the training materials and delivery.

The design of the BCLP training modules and instructional materials was appropriate, relevant, and responsive to the needs of the target beneficiaries. The modules were sequenced according to the development needs of the participants, while the instructional materials supported hands-on learning, multimedia presentations, step-by-step demonstrations, software-based exercises, student assistance, and post-training assessments reflects a systematic instructional design suitable for community extension.

Speaker's Multimedia Presentation

The screenshot shows a presentation slide with a purple sidebar on the left containing 10 numbered thumbnails. The main slide has a cream background with a red border. At the top left is the Polytechnic University of the Philippines (PUP) logo, a red circle with a yellow star and the year 1904. To its right, the text reads: "POLYTECHNIC UNIVERSITY OF THE PHILIPPINES", "Office of the Vice President for Academic Affairs", and "OPEN UNIVERSITY SYSTEM". In the center, the title "PERSONALITY ENHANCEMENT SEMINAR" is written in large, blue, serif capital letters. At the bottom, the speaker's name "JOHN MARK S. DISTOR, PhD in Psy, DBA, RPm, CHRA, CSSYB" is listed. On the right side, there is a vertical red banner with the PUP logo at the top, the text "POLYTECHNIC UNIVERSITY PHILIPPINES", the motto "The Country's P. Polytechnic", and the acronym "PUP" at the bottom.

MICROSOFT PUBLISHER

What is Microsoft Publisher?

- Microsoft Publisher is a graphic design application that is used to design business cards, brochures, newsletters, and other marketing materials.
- It provides you with all the necessary publishing options to create professional-looking documents, while saving time and resources and not to mention the cost of printing.

Things you can do with MS Publisher:

- Design a Web Page
- Design a Brochure
- Design a Newsletter
- Design a Book
- Design a Calendar
- Design a Label
- Design a Stationery

Features of MS Publisher

- Quick Publications
- Web Sites and E-mail
- Clipart Gallery
- Blank Publications
- Other Miscellaneous

Planning a Publication

Be it with any publication, when you are creating a product, remember...

- Know your audience
- Know your content
- Know the purpose of your product

EXTENSION REPORT BCLP-Phase 2

PART I. PROJECT SUMMARY:

Project Title:	Basic Computer Literacy and Personality Development Project (BCLP) Phase 2
Implementer:	Polytechnic University of the Philippines – Sto. Tomas Branch Bachelor of Science in Information Technology (BSIT) Bachelor of Science in Psychology (BSPSych)
Project Team:	<u>Team Leader:</u> Asst. Prof. Marienel N. Velasco / Trainer <u>Team Members:</u> Dr. John Mark Distor / Trainer Dr. Melani L. Castillo / Trainer Assoc. Prof. Abegail A. Malabuyoc/ Trainer Mr. Glenn V. dela Cueva / Facilitator, SDO Assoc. Prof. Honorato I. Cabrera / Facilitator Ms. Julie Rose Palma / Support Staff Mr. Noli Plohimon / Support Staff Mr. Fausto Contreras / Support Staff
Target Group:	Barangay Functionaries of Poblacion II, Sto. Tomas City, Batangas
Impact Statement:	The goal of the extension project is to train and enhance the participants' knowledge of how to utilize various computer productivity tools and develop their personalities, both of which will help them carry out their tasks and duties in their respective offices effectively and efficiently.
Date Conducted:	July 20 - 21, 2023

2nd Floor, South Wing, PUP A. Mabini Campus, Anonas Street, Sta. Mesa, Manila 1016
 Direct Line: 335-1787 or 335-1777 local 233/712
 Website: www.pup.edu.ph | Email: vpredl@pup.edu.ph

THE COUNTRY'S 1st POLYTECHNIC

PART II. PROJECT DETAILS:

Background and Justification	ICT training is an important factor in 21st century workplaces. Basic ICT training provides a foundation on which employees can build new skills on their job. ICT skills provide opportunities for employee to increase professional competencies and experience, while accruing the benefits of a comprehensive employee development to the organization. Rule VII of the Omnibus Rules Implementing Book V of EO 292 and Civil Service Laws provides the policies on career and personnel development in government. These laws require every department or agency of the government to establish a continuing program for career and personnel development for all personnel at all levels. Polytechnic University of the Philippines Sto. Tomas Batangas Branch is not only an institution seeking to adhere with the law but also aid its community by extending professional and skills development services. The said project aims to enhance the knowledge of the participants which are the barangay functionaries on the use of various computer productivity tools and software. This program will allow users to have actual workshop and hands-on training activity to practice and apply what they have learned. It also aims to improve their personality which can help them to perform their work and duties in their respective offices in an efficient and effective manner. The profiles of the target participants are stated as follows: In terms of gender: 25% female and 75% male. Age: 92% are 30 years old and above, and 8% are 29 years old below. Civil status: 85% are married, 1% widowed, and 14% are single. Educational background: 13% are college graduates, 21% are college-level, 24% are high school graduates, 8% are high school level, 17% are elementary graduates, and 17% are elementary level.
Specific Objectives:	1. To enhance their skills on different computer productivity tools thru actual workshops and hands-on activities. 2. To improve their personality and attitude towards their work. 3. To assess the level of knowledge and skills of the participants on the topics discussed after the said training.
Project Components and Expected Outcome:	Day 1: • Personality Development • Computer Ethics Day 2: • MS Powerpoint Basic to Advance • MS Publisher Basic to Advance

THE COUNTRY'S 1st POLYTECHNIC

PART III. REPORT ON PROCEEDINGS:

Day 1 – July 20, 2023:

Morning Session:

Participants were required to register on Day 1 of the extension project, July 20, 2023, from 8:00 to 8:30 in the morning at the PUP-Sto.Tomas Branch Gymnasium. The registration procedure was aided by the BSIT/BS Psychology students. Each participant received a kit at registration along with printed copies of all the speakers' topics for the two-day session, a pen, and paper.

The opening program started with the Doxology and National Anthem. It was followed by Dr. Armando A. Torres, the Director of PUP-Sto.Tomas Branch, delivering an opening and welcoming speech to all attendees. Hon. Antonio M. Guevarra, the Barangay Chairman of Poblacion II, Sto.Tomas, Batangas, gave a message for the event's success and expressed his gratitude to the PUP community. Assoc. Prof. Abegail A. Malabuyoc, the Faculty Extensionist of PUP-STB, gave an overview of the extension project and spoke about the PUP and the Extension Management Office's objectives in carrying out this kind of activity. After the opening program, the free morning snacks were given out to all participants.

The seminar and workshop presented by Dr. John Mark Distor, a Psychology professor at PUP-STB, made up the latter portion of the morning's activities. The subject of "Personality Development" was covered during his discussion. He emphasized how crucial it was for government employees to maintain a positive attitude. It was also emphasized how important it is to face adversity with a good attitude, strong character, and decent morals. The participants asked the speaker several questions, and the speaker thoughtfully answered them all. At the end of the training, a test was provided to the participants to gauge their level of self-assurance. All participants received a complimentary lunch after the training.

Afternoon Session:

Asst. Prof. Marienel N. Velasco, a faculty of BS Information Technology at PUP-STB, opened the Day 1 afternoon session of the extension project with a discussion on the topic of "Computer Ethics." She talked on how important it is for government employees to behave properly when using computers and other technologies at work. Each participant received a free afternoon snack after the seminar. The distribution of the assessment form, to which each participant responded, marked the conclusion of Day 1 of the extension project.

Day 2 – July 21, 2023:

Morning Session:

The Day 2, July 21, 2023, morning session of the extension project started with the registration of the participants from 8:00 to 8:30 in the morning at the PUP-Sto.Tomas Branch Computer Laboratory 1.

Dr. Melani L. Castillo, the first speaker and trainer of the morning event was responsible with introducing and addressing the topics on MS Publisher Basic to Advance. By leading an interactive activity and workshop for each participant, she made sure that everyone understood how to use the productivity software. Students from BSIT and BSPsychology assisted the participants during the entire activity. After the discussion, the free morning snacks were given out to all participants. Next, the participants' output was checked and evaluated to determine whether they had actually learned anything from the training. The program finally came to a close, and the participants received a complimentary lunch.

Afternoon Session:

At precisely 1:00 pm, the extension project's Day 2 afternoon session got underway. Assoc. Prof. Abegail A. Malabuyoc spoke on "MS Powerpoint Basic to Advance" and showed the participants the step-by-step instructions for using this productivity tool. A workshop was held to instruct the participants in the practical application of Powerpoint. Following the workshop, the output of the participants was evaluated for comprehension of the subject matter. The participants were given the afternoon snack after the training.

The closing program came next in the afternoon event. After the two-day seminar and workshop was over, each participant received a certificate and a photo opportunity with the speakers, and organizers of the activity. A certificate of gratitude was also given to the speakers and organizers of the extension project. To formally conclude the program, Engr. Liza Marie B. Nuevo gave her final speech.

The distribution of the assessment form, to which each participant responded, marked the conclusion of Day 2 and this year extension project.

4. Reasonable Budget

The budgetary allocation for the Basic Computer Literacy and Personality Development Project (BCLP) was reasonable, adequate, and directly aligned with the nature, scope, and expected outputs of the extension activity. The project required funding support for the conduct of training sessions, reproduction of instructional materials, provision of meals and snacks, procurement of supplies, and other necessary operating expenses for the implementation of the extension project for the barangay functionaries of Poblacion II, Sto. Tomas City, Batangas.

For the 2022 implementation of the BCLP Project, the Special Order No. 1734, s. 2022, dated May 19, 2022, authorized the Special Disbursing Officer to hold a cash advance amounting to Thirty-five thousand nine hundred sixty pesos only (Php35,960.00) to defray expenses in connection with the conduct of the extension. The approved budget was itemized for food expense, notarial fee, lecture materials and photocopies, office supplies and other office supplies, and travelling expenses. This shows that the budget was carefully distributed across essential project requirements needed for training delivery, documentation, participant support, and logistical implementation.

For BCLP Phase 2, Special Order No. 2492, s. 2023 authorized the release of a cash advance amounting to Thirty-nine thousand three hundred pesos only (Php39,300.00) to defray the training expenses incurred in connection with the project, implemented from April 1 to September 2023. The same document identified the project team composition, including the project team leader, trainers, facilitator, special disbursing officer, and support staff, thereby confirming that the approved budget was tied to an officially authorized extension activity.

For BCLP Phase 3, Special Order No. 3533, s. 2024, authorized the project team to conduct the internally funded extension project from June 2024 to October 2024. The same Special Order authorized a cash advance of Thirty-five thousand nine hundred sixty-five pesos only (Php35,965.00) chargeable to the Internally Generated Fund under the Extension Management Office Extension Fund. The approved amount was specifically intended to defray maintenance and other operating expenses related to the project.

The reasonableness of the budget is evident in the consistency of the allocations across the three years of implementation. In 2022, 2023, and 2024, the approved budgets were within a modest range and were directed toward necessary training-related expenses. The budget items were not excessive and were appropriate for a two-day community extension activity involving lectures, workshops, participant materials, meals, certificates, and documentation. The allocation for food supported the sustained participation of the beneficiaries throughout the training days, while the allocation for materials and supplies supported the preparation of instructional handouts, certificates, visual materials, and other learning resources.

The budget was also reasonable because the project maximized existing institutional resources. The BCLP reports documented that PUP Sto. Tomas Campus provided or shared resources such as the training venue, computer laboratory, sound system, computers, projector, printer, and internet connectivity. These institutional resources reduced the need for additional rental or equipment expenses and allowed the approved budget to be focused on direct implementation needs, particularly participant support and training delivery.

The Special Orders emphasized compliance with existing accounting and auditing rules. The disbursing officers were directed to use the cash advance only for the purpose for which it was granted and in accordance with applicable accounting and auditing regulations. This demonstrates that the project budget was not only approved but was also governed by institutional accountability, transparency, and proper financial management procedures.

The budget for the Basic Computer Literacy and Personality Development Project was reasonable because it was officially approved, properly itemized, aligned with the project objectives, limited to necessary training-related expenses, and supported by existing institutional resources. The approved allocations for 2022, 2023, 2024 enabled the project team to provide training materials, meals, supplies, documentation, certificates, and logistical support necessary for effective implementation.

Special Orders for the Conduct of the Extension Project (2022-2024)

PUPDTS No. 2024022971

June 27, 2024

SPECIAL ORDER
No. 3533, s. 2024

In the interest of the service, the herein-named administrative employees and faculty members, Sto. Tomas, Batangas Campus, this University, are hereby authorized to conduct on official time the internally funded extension project titled "BCLP Project Phase III (Barangay Computer Literacy and Personality)" in June 2024 to October 2024:

- | | | |
|----------------------------|---|-----------------------------|
| 1. VELASCO, MARIENEL N. | - | Project Team Leader/Trainer |
| 2. CASTILLO, MELANI L. | - | Trainer |
| 3. MALABUYOC, ABEGAIL A. | - | Trainer |
| 4. ACOSTA, MINERA LAIZA C. | - | Trainer |
| 5. ENRIQUEZ, KARINA L. | - | Trainer |
| 6. PALMA, JULIE ROSE L. | - | Technical Staff |
| 7. PLOHIMON, NOLI S. | - | Technical Staff |
| 8. DELA CUEVA, GLENN V. | - | Disbursing Officer |

Pursuant to Section 64 of P.D. No. 1445, MR. GLENN V. DELA CUEVA, NSTP Coordinator and Disbursing Officer, is hereby authorized to hold a cash advance of THIRTY-FIVE THOUSAND NINE HUNDRED SIXTY-FIVE PESOS ONLY (P35,965.00) to defray Maintenance and Other Operating Expenses in connection therewith, chargeable to the Internally Generated Fund (EMO EF), broken down as follows:

Training Materials	DTE	P 6,965.00
Food		29,000.00
		Total: P 35,965.00

It is understood that Mr. Dela Cueva shall be guided by existing accounting and auditing rules and regulations and that no cash shall be paid out of the afore-stated cash advance except in fulfillment of the purpose for which it was granted.

"THE COUNTRY'S 1st POLYTECHNICU"

5. Provision of Materials and Other Resources

The project provided adequate materials and resources to support the learning needs of the participants. During the training, participants received kits containing name tags, printed copies of training topics, pens, and paper. These materials help them follow discussions and participate in the activities.

The project also used available institutional resources such as the PUP Sto Tomas venue, computer laboratory, sound system, projector, computers, printer, and internet connection.

In addition to physical and technical resources, the project provided human

resources through faculty trainers, facilitators, staff, and student volunteers. Meals and snacks were also provided to the participants during the training days. The reports further include photo documentation of participants kits, multimedia presentations, registration, workshops, distribution of meals, and awarding of certificates, which serve as evidence of resource provision and proper implementation.

Participant's Kit and Meals"

6. Participation of Significant Number of Faculty, Staff, Students, and Community in Major Projects/Activities

The BCLP involved significant participation from faculty, staff, students, and community beneficiaries. The project team was composed of faculty trainers, facilitators, support staff, and student assistants who helped in registration, workshop assistance, documentation, and logistical support.

For Phase 3, the project team included Dr. Marienel N. Velasco as Team Leader and Trainer, Ms. Minera Laiza C. Acosta, Dr. Melani L. Castillo, Assoc. Prof. Abegail A. Malabuyoc, Ms. Karina I. Enriquez, Mr. Glenn V. Dela Cueva, Ms. Julie Rose Palma, and Mr. Noli Plohimon. For Phase 2, the project team included the team

The Project Team with Team Leader, Facilitators, Students and Beneficiaries

leader, faculty trainers, facilitators, and support staff from BSIT and BSP, demonstrating multidisciplinary involvement in the extension activity.

Students also played an important role in the implementation. The reports mention that BSIT and BS Psychology students assisted during registration and hands-on workshop activities. Their involvement helped ensure that participants received guidance during practical exercises, especially those who needed additional assistance in using computers and software applications.

The community participation was also significant because the target beneficiaries were barangay functionaries of Poblacion II, Sto. Tomas City, Batangas. In the 2022 implementation, the report twenty-five participants. The participants actively attended the sessions, asked questions, completed activities, submitted outputs, and answered evaluation forms.

7. Awards of Distinction and Achievement and Grants of this Program / “Best Practices” Adopted

Best Practices Adopted

The extension initiatives of PUP Sto. Tomas Campus demonstrate best practices that are responsive, participatory, technology-driven, and aligned with the University’s mandate for community service. These best practices were evident not only in the implementation of the **Basic Computer Literacy and Personality Development Project (BCLP)** but also in related extension projects such as the **Barangay E-Government Systems (BEGS)**, and the proposed **SKTK: Applicant Tracking Systems (ATS)**. These

projects show a consistent institutional approach to designing extension activities that are based on community or partner needs, supported by academic expertise, implemented through systematic procedures, and evaluated using measurable outcomes.

One of the best practices adopted was the use of needs-based project development. The Barangay E-Government System shows that the project was formulated after a community needs assessment involving barangay staff, barangay officials, residents, and a community leader. The results showed concerns on efficiency, accuracy, ease of use, accessibility, and security of the existing barangay information system.

Another best practice was the translation of academic output into community-based technology solutions. The BEGS focused on transferring technology to the community by implementing a Barangay E-

Community Needs Assessment in Brgy 128, Tondo Manila: Basis for the Development of Extension Project “BARANGAY E-GOVERNMENT (E-GOV) SYSTEM”

Introduction

In today’s fast development of the digital landscape, information systems play a crucial role in providing efficient and effective governance at the local level. Local barangays, as the smallest administrative units in the Philippines, also benefit from digital information systems that provide online platforms for managing and accessing information related to local governance, public services, and community engagement. These digital information systems have the potential to enhance transparency, accountability, and communication within the barangay community, leading to improved local governance and community development [1].

The Philippine government is stepping up its efforts to use ICT to boost the country’s economy, reduce, if not completely eradicate, corruption, improve government transactions, and encourage more transparent services. The government began funding the computerization of local government units in light of this and the development of ICT. [2].

As the Philippines’ population has grown, urbanization has increased, and technology has advanced, so too has the function of local government units (LGUs). As the smallest administrative divisions, barangays must simultaneously meet the needs of contemporary governance and provide basic services to a variety of populations. The demand for effective, easily accessible, and transparent government services is especially pressing in Barangay 128 Tondo, Manila, one of Metro Manila’s most crowded and economically distressed neighborhoods. However, the community’s demands have not been adequately satisfied by traditional forms of governance, which are typified by face-to-face interactions, few avenues of communication, and manual record-keeping [3]. With the Philippine government’s push towards a digital economy and the expansion of e-government initiatives [4], it is crucial to assess whether digital solutions, such as the **Barangay E-Government (E-Gov) System**, can address these local governance gaps.

To improve service delivery, streamline administrative procedures, and improve communication between the barangay government and its citizens, the Barangay E-Government System—a proposed digital platform—will be developed using the assessment’s findings as a crucial basis. In 4th Floor Room 421 South Wing, PUP A. Mabini Campus, Anonas Street, Sta. Mesa, Manila 1016

THE COUNTRY’S 1st POLYTECHNICU

Government System developed from selected capstone research outputs. The system was intended to streamline barangay transactions, enable faster generation of reports, and improve governance at the barangay level. This shows that the campus effectively links instruction, research, and extension by transforming student and faculty outputs into practical tools that directly benefit partner communities.

Another best practice was the formation of external linkages and formal partnership. The ATS identifies Torres Technology Center Corporation as the cooperating

Agency and Human Resource Department Personnel as the target beneficiaries. It also indicates that the project will be externally funded. This practice complements the ceremonial signing of the Memorandum of Understanding and Memorandum of Agreement with Torres

Ceremonial Signing of MOU and MOA at Torres Technology Center with the Project Team Leader and Members, department heads of Torres Technology Center particularly HR Department and Campus Director, Dr. Armanto A. Torres

Technology Center Corporation.

The project also adopted the best practice of workplace-based and partner-responsive system development. The ATS proposal was designed to address manual or semi-manual recruitment processes, fragmented data management, hiring delays, limited applicant visibility, and increased administrative workload in the Human Resource Department. Its objectives included designing a centralized applicant tracking system, automating recruitment processes, reducing administrative effort, improving applicant data accuracy, enhancing recruitment experience, and supporting data-driven workforce planning. This shows that PUP Sto. Tomas Campus designs extension projects based on the operational realities of partner institutions.
