Well Defined Objectives Research

Research Policy Statement

Research is one of the major functions of higher education. Thus, the University encourages its faculty members, non-teaching personnel and students to be actively engaged in research undertakings to ensure the continued growth and development of PUP as a higher education institution.

Research Principles

Research undertakings in the University shall be guided by the following general principles set by the Higher Education Research Agenda-2 (NHERA-2) of the Commission on Higher Education (CHED):

- 1. Research is the ultimate expression of an individual’s innovative and creative powers. PUP shall ensure that the academic environment nurtures and supports research talents.
- 2. Research thrives in an environment characterized by free flow of information, honest and analytical exchange of ideas, and supportive policy and administrative structures. PUP policies shall enhance the institution’s and the individual’s capacity to conduct independent, collaborative and productive research.
- 3. Research is one of the functions of higher education sector. PUP is expected to lead the conduct of discipline-based, policy-based, technology-directed and innovative/creative research that are locally responsive and globally competitive.

The University Research Vision, Mission, and Objectives

Vision

The University envisions itself as a premier center of research in social capital and innovation towards inclusive growth for national development.

Mission

Research and development in PUP shall contribute to the transformation of the University as an epistemic community and a research-intensive polytechnic university, and in advancing knowledge across multidisciplinary areas to address the immediate and long-range needs of society. The R & D in the University shall endeavor to produce research and innovation that promote educational, technological, economic, political, ecological, social, and cultural understanding toward the alleviation of the plight of the poor, the development of the citizenry, and the enhancement of nation-building and global competitiveness.

In particular, the research sector shall play a significant role in the realization of the University’s ‘envisioned society’ of (1) sustainable human development; (2) democratic and good governance; (3) respect for cultural diversity and strengthened national identity; (4) technology with human touch; and (5) ecological harmony.

Objectives

To fulfill this mission, the Office of the Vice President for Research, Extension, Planning and Development shall endeavor to achieve the following objectives:

- 1. To contribute to the country’s national development through a focused- university research program;
- 2. To promote synergy and a sound research capability program through collaboration of the research and academic sectors of the University;
- 3. To pursue excellence in production and publication of research and creative works among faculty and students;
- 4. To develop strong research linkages and partnerships with other national and international institutions and organizations;
- 5. To pursue excellence in innovation, technology transfer and commercialization of research outputs with the end goal of economic, environmental and social growth.

Congruence Matrix of PUP Research Agenda

As stated in the University Research Manual of PUP, research undertakings in the University shall be guided by the following principles set by the Higher Education Research Agenda (NHRA 2) of the CHED:

Research is the ultimate expression of an individual’s innovative and creative powers, PUP shall ensure that the academic environment nurtures and supports research talents.

Research thrives in an environment characterized by free flow of information, honest and analytical exchange of ideas, and supportive policy and administrative structures. PUP policy shall enhance the institution’s and individual’s capacity to conduct independent, collaborative and productive research.

Research is one of the functions of higher education sector, PUP is expected to lead the conduct of discipline-based, policy-based, technology- directed and innovative/creative researches that are locally responsive and globally competitive.

Matrix of Benchmark of PUP Research Agenda with NEDA, DOST, and CHED Research Agenda

The University Research Agenda	PUPSTC Research Agenda	Bachelor of Secondary Education major in English Research Thrust and Priorities	Specific Government Agenda Parallel to the Program and their Objectives
The University adopts a clear, practical, and realizable University Research meant to (1) be aligned with the strategic plan of the University; (2) unify the direction and framework of the research activities of the University; (3) align the research efforts of the University with the thrust and priorities of national government agencies e.g. Department of Science and Technology (DOST), National Economic and Development Authority (NEDA), Commission on Higher (CHED), among others; and	The Polytechnic University of the Philippines Sto. Tomas Campus (PUPSTC) shall carry out research thrust and priorities relevant and responsive to the emerging needs and environmental changes and development reliant on the competence of the faculty, faculty staff and students, aptness to local and national needs, and adequacy of resources. These thrusts and priorities are anchored from the national, regional, and local development foals, the strategic plan of the Commission on Higher Education,	To establish direction and focus, in particular, the Bachelor of Secondary Education major in English (BSEDEN) program of PUP Sto. Tomas Campus shall pursue empirical collaborative or individual researches on the following research thrust and priorities: Research Thrust: Social Development a. Communication and society b. Human growth and development studies c. Literature, performing arts, visual arts, folk arts	PDP (2023-2028) Agenda No. 2 Promote Human and Social Development 2.2 Promote Education and Lifelong Learning Outcome 1: Quality, inclusive, adaptive, resilient, and future-ready basic education for all achieved Outcome 2: Globally competitive and inclusive TVET and higher education, and improved research output attained for a broader knowledge economy Outcome 3: Governance for human capital development improved CHED-NHERA-2 (2009-2018)

(4) generate researches, scientific innovations, speculative and the paradigms which are expected to propel economic, scientific, social, cultural and technological development. The University Research Agenda is categorized into five general themes, to wit: (1) poverty reduction, peace, and security; (2) accelerating infrastructure development through science and technology; (3) competitive industry and entrepreneurship; (4) social and cultural development and (5) conservation, protection, and rehabilitation of the environment towards sustainable development.	Education Agenda of the Department of Education and the 3 Pillars of the University. The efforts of PUPSTC will not only be limited in social and academics researches, scientific, and technological researches, and policy and business researches, but also in other areas found needed and beneficial to the campus, The University, its partners and linkages, most especially its students and graduates.	d. National Higher Education Research Agenda 2

INTRODUCTION

The National Research Council of the Philippines (NRCP), a collegial body of over four thousand researchers, scientists, experts, and artists, is mandated to promote and support fundamental and basic research in the country as provided in the 9th Philippine Legislature Act No. 4120 passed on 8 December 1933. It is likewise mandated to provide advice on problems and issues of national interest.

Along this line, the NRCP supports research that is directed primarily towards developing a new and fuller scientific knowledge or understanding of any subject which may or may not have practical applications. Basic research results from intellectual curiosity aimed at proving the unknown, or it may seek new knowledge required for practical application in the future (Ref: Science Act of 1958 as amended by RA 3589).

Outputs of NRCP-funded researches are journal and scholarly publications, policy advisories, patent applications, and products used for community and public engagements such as books, manuals, monographs, among others. The outputs of basic research become part of the broader body of knowledge which become foundations of further research and development, i.e., applied research. The period of translation from basic research to applied research, technology transfer and commercialization varies depending on field of research and other Variables.

The NIBRA 2022 to 2028 is a continuation of the research priorities of the 2017 to 2022 NIBRA which is a product of a series of consultations and forums that started in 2016. The thirteen disciplinal Divisions of NRCP generated their respective Division basic research agenda. These are the Divisions of Governmental, Educational and International Policies (Division 1),

Mathematical Sciences (Division II), Medical Sciences (Division III), Pharmaceutical Sciences (Division IV), Biological Sciences (Division V), Agriculture and Forestry (Division VI), Engineering and Industrial Research (Division VII), Social Sciences (Division VIII), Physics (Division IX), Chemical Sciences (Division X), Humanities (Division XI), Earth and Space Sciences (Division XII), and Veterinary Medicine (Division XIII). The divisions are clustered into the following sub-groups:

- Cluster 1: Humanities (Division XI)
- Governmental, Educational and International Policies (Division I)
- Social Sciences (Division VIII)
- Cluster 2: Engineering and Industrial Research (Division VII)
- Mathematical Sciences (Division II)
- Physics (Division IX)
- Earth and Space Sciences (Division XII)
- Cluster 3: Chemical Sciences (Division X)
- Medical Sciences (Division III)
- Pharmaceutical Sciences (Division IV)
- Cluster 4: Agriculture and Forestry (Division VI)
- Biological Sciences (Division V)
- Veterinary Sciences (Division XIII)

The NRCP's 2022 – 2028 NIBRA will prioritize fundamental research in support of the Philippine Development Plan, Sustainable Development Goals, the National Security Plan, and the Science for Change Program of the Department of Science and Technology.

As a result of the consultations made with the NRCP Governing Board as discussed in various meetings between October to December 2021, the Council will also support blue skies or pure basic research, and policy research for the period, 2022-2028 in addition to the oriented basic research.

The discussions on NIBRA was made part of a series of strategic planning sessions of the Governing Board in the last quarter of 2021. A third-party consultant contracted by NRCP for its strategic planning, fielded a survey to NRCP Members on September 15, 2021 and a total of 482 NRCP Members responded. Included in the survey are the following questions:

- What Basic Research area do you want NRCP to focus on?
- What Applied Research area do you think NRCP would focus on?
- What are the research areas where the Philippines is lagging?

The results of the survey were presented on October 8, 2021 at the first strategic planning session of the Governing Board. Succeeding discussions which included NIBRA followed on October 22, 2021 (2nd strategic planning session) and November 12, 2021 (3rd strategic planning session).

In between the 2nd and 3rd sessions, the GB Planning and Finance Committee also took up NIBRA as part of the series of input meetings on October 25, November 3 and 5, 2021. In the last strategic planning session on 12 November 2021, the GB-approved expanded NIBRA was presented which still include the six research areas: inclusive nation building, sustainable communities, clean energy, food and nutrition security, health sufficiency, and water security, but with the addition of blue skies (pure basic) research, and policy research.

MAJOR COMPONENTS/RESEARCH AREAS/PRIORITY AREAS

For 2022 – 2028, NIBRA will have three major components:

II-1. BLUE SKIES RESEARCH OR PURE BASIC RESEARCH

II-2. ISSUE-BASED OR ORIENTED BASIC RESEARCH

- A. Water Security – Tubig Program (Tubig Ay Buhayin At Ingatan)
- B. Food And Nutrition Security – Sapat Program (Saganang Pagkain Para Sa Lahat)
- C. Health Sufficiency – Likas Program (Likas Yaman Sa Kalusugan)
- D. Clean Energy – Alert Program (Alternative Energy Research Trends)
- E. Sustainable Community – Saklaw Program (Saklolo Sa Lawa)
- F. Inclusive Nation-Building – Atin Program (Ang Tinig Natin)

II-3. POLICY RESEARCH

RESEARCH AREAS /PROGRAM AREAS:

II-1. BLUE SKIES OR PURE BASIC RESEARCH

Pure Basic Research, also referred to as Blue Skies research, refers to fundamental research in the sciences and the humanities which have no impact or perceived practical use. These may be purely theoretical in scope and heralding disciplinary advances and pioneering works/discoveries.

It is a curiosity – driven basic research whose outcome is not anticipated in the beginning. Hence, the original motivation to address the question “Why is the sky blue?” was due to the interest on the observed physical phenomena itself rather than deriving any benefit from the answer. By definition, this type of research implies that the researcher is given free hand to set his/her own agenda. The aim is mainly to solve a fundamental unique problem without a specific target in mind.

As opposed to the strategic or goal-oriented research, the blue skies research can proceed to any direction and the discovery process is not stifled with pre-set expectations. Hence, doing an open and exploratory research can effectively bring in new knowledge that is not within the current accepted ways of thinking.

Blue skies research promotes creativity and research diversity which have led to a long history of serendipitous applications in science and technology. An example of such a technology is the Global Positioning System (GPS) which would not have been possible without Einstein’s theory of general relativity. When he was doing his research, Einstein only wanted to understand how gravity affects space and time. Another example is the wide use of ultrasound for medical applications. Ultrasound was first studied out of curiosity in determining the frequencies that could be heard by animals beyond the range of human hearing. These illustrate that derived applications from blue skies research eventually stimulate scientific and technological development and, consequently, spur economic growth in the long term.

PROPOSED BUDGET FOR BLUE SKIES OR PURE BASIC RESEARCH (2022 – 2028)

2022	2023	2024	2025	2026	2027	2028
2.194 M	5 M	7 M	9 M	11 M	13 M	15 M

II-2. ORIENTED BASIC RESEARCH

This covers research which seeks new knowledge required for application purposes, but which may of course contribute to general scientific advancement in the process. There are six (6) issue-based agenda in the NIBRA.

A. WATER SECURITY

TUBIG Agenda (Tubig Ay Buhayin At Ingatan)

The Philippines will experience a high degree of water shortage in year 2040. Climate change and the world’s growing population are considered to be the drivers of widespread water shortage (World Resources Institute Technical Note, 2015; United Nations Report on Climate Change, 2009).

This research agenda will help mitigate this foreseen water shortage due to natural and human activities that render water undrinkable, unavailable and inaccessible. New processes, methodologies, cutting-edge science and technology (S&T)-based approaches will be explored.

The research agenda aims to: 1) develop solutions for the detection and management of water quality for drinking water resulting from chemical, biological, and human activities, 2) come up with better water management strategies for household use, 3) identify alternative and/or new sources of potable water, and 4) provide policy recommendations.

For the past six years, six projects have been funded under the TUBIG agenda. Five of which are still ongoing. Notable outputs such as low cost and portable electrochemical sensors for heavy metal detection in water have been generated under this program. Other outputs like the decision support system and nurturing management protocol for watersheds, groundwater network data, and the solar-driven membrane seawater desalination set-up are expected to be produced by the ongoing projects under the TUBIG agenda.

Identified gaps like the mathematical modeling, supply and demand analysis of drinking water in coastal and island communities and the causes of salt-water intrusion and its effect on the availability and accessibility of drinking water, will hopefully be addressed by the ongoing projects and the future projects funded programs/projects under this agenda.

For 2022-2028, the areas for research include:

1. Watershed studies
 - a. Biological, chemical and physical characterization
 - b. Water supply stress index
 - c. Population growth impacts on water resource availability
2. Water quality, accessibility and availability
 - a. Pollutants/contaminants (surface and ground waters)

PRIORITY AREAS FOR 2022 – 2025

1. Water quality, accessibility and availability for safe drinking purposes in coastal and island Communities
 - a. Mathematical modeling
 - b. Characterization which includes pollutants/contaminants/toxicity
 - c. Physico-chemical, socio-economic, biological and morphological studies
 - d. Supply and demand analysis of drinking water in coastal and island communities
2. Salt-water intrusion in drinking water among coastal and island communities
 - a. Causes of salt-water intrusion and its effect/impact on the availability and accessibility of drinking water

PRIORITY AREAS FOR 2026 – 2028

1. Water quality, accessibility and availability for safe drinking purposes
 - a. Pollutants/contaminants (surface and ground waters)
 - b. Analysis of historical flows, sediment and toxicity loads of lakes and rivers
 - c. Weather modification for increasing water supplies in special localized areas
2. Watershed studies
 - a. Biological, chemical and physical characterization
 - b. Water supply stress index
 - c. Population growth and sector policy impacts on water resource availability

PROPOSED BUDGET FOR WATER SECURITY (2022 – 2028)

2022	2023	2024	2025	2026	2027	2028
12.918 M	27 M	36.25 M	40 M	45 M	52 M	60 M

B. FOOD AND NUTRITION SECURITY

SAPAT Agenda (Saganang Pagkain Para sa Lahat)

This research agenda will provide science-based data to address critical knowledge gaps in the four key elements of food security, i.e. accessibility, availability, utilization and stability. Programs under this agenda will mainly capitalize on biodiversity researches in aid of harnessing knowledge base on ecosystem functioning and the provision of goods and services that are essential to human health and well-being. Biodiversity is the source of the components of production (crops, livestock, fisheries), and the genetic diversity within these that ensures continuing improvements in food production, allows adaptation to current needs and ensures adaptability to future ones. The continued decline of biodiversity, including loss or degradation of ecosystems, is reducing the ability of biodiversity and ecosystems to provide essential life-sustaining services and, in many cases, leads to negative outcomes for health and well-being.

On the other hand, food safety is a critical component for sustainable development, hence, it is critical to human nutrition and food security. Safer food contributes to less illness, therefore, increases productivity and improves livelihood. Poor nutrition and foodborne diseases often combine to a vicious cycle of worsening health. Therefore, food safety must be systematically integrated into policies and interventions to improve nutrition and food security. Thus, programs under SAPAT will also explore fundamental researches towards better understanding of abiotic and biotic factors that threaten the safety of food from farm to table.

For the past five years (2017-2021), significant accomplishments under this agenda include the risk and safety analysis of agricultural farms specifically on the heavy metal, bacterial and parasitic contaminations in selected vegetables. The results of these studies provided science-based evidence which could be adopted for possible legislation addressing the issues concerning farming practices that pose threats to farmers and consumers’ health. It provided information on the food-borne diseases linked to farm produce.

To further address the food safety and security issues on a national level, research topics on these areas are being prioritized for 2022-2028. Studies on Halal are added to mainstream researches on this field.

For 2022-2028, the areas for research include:

1. Taxonomic studies of flora and fauna as food sources
 - a. Biology and population dynamics of pests, diseases, and natural enemies
 - b. Diseases and pathogens of important crops
 - c. Taxonomy of eco-friendly species (e.g. arthropods and microorganisms) for Integrated Pest Management
 - d. Taxonomy of neglected and underutilized species for food
 - e. Genetic analysis (biochemical, cytogenetics, molecular)
 - f. Exploring allelopathic potentials of indigenous botanicals
2. Food safety of raw and processed products of micro, small and medium enterprises (MSMEs)
 - a. Safety analysis of raw and processed food products
 - b. Identification and characterization of raw and processed food/feed contaminants and adulterants
 - c. Epidemiology of food- and feed-borne contaminants
3. Halal Studies
 - a. Documentation of consumption and production practices (product-specific)
 - b. Knowledge, Attitude, Practice, Skills (KAPS)
 - c. Integration and mainstreaming of Halal in the food and beverage industry

PRIORITY AREAS FOR 2022 – 2025

1. Food safety of raw and processed products of MSMEs
2. Contaminants and adulterants in street foods (preferably on products without existing code of practice)
3. Taxonomic studies of flora and fauna as food sources
 - a. Genetic analysis (biochemical, cytogenetics, molecular)
 - b. Morphological, allelopathic, and bioecological studies for food security and sustainability
4. Halal Studies
 - a. Documentation of consumption and production practices (product-specific)
 - b. Knowledge, Attitude, Practice, Skills (KAPS)
 - c. Integration and mainstreaming of Halal in the food and beverage industry

PRIORITY AREAS FOR 2026 – 2028

- 1. Taxonomic studies of flora and fauna as food sources
- 2. Population dynamics of pests, diseases and natural enemies
 - a. Diseases and pathogens of important crops
 - b. Taxonomy of eco-friendly species (e.g. arthropods and microorganisms) for Integrated Pest Management
 - c. Taxonomy of neglected and underutilized species for food Halal Studies

PROPOSED BUDGET FOR FOOD AND NUTRITION SECURITY (2022 – 2028)

2022	2023	2024	2025	2026	2027	2028
6.199 M	27 M	41.25 M	40 M	50 M	56 M	62 M

C. Health Sufficiency

LIKAS Agenda (Likas Yaman sa Kalusugan)

Programs under LIKAS aim to support the objective of the national government in improving the quality of life of every Filipino through scientific-based data which will provide scientific-based understanding and solution to: a) possible zoonotic diseases (both emerging and re-emerging), b) possible alternative sources of health improvement initiatives for disease control and management through fundamental researches on natural products development from rare environments and endemic species, and c) evaluation of the existing health policies and programs towards achieving the Sustainable Development Goals in securing better health for Filipinos today and for years to come.

Notable accomplishments through this endeavor include the identification of more than 100 bioactive compounds isolated from marine sediments, bat guano, caves, and mangroves. It also produces new knowledge on biodiversity riches, medicinal potential of the said natural resources.

While most of the research programs and projects funded deal with the discovery of novel bioactive compounds for possible medicinal use, however, some of previously isolated samples are due for further studies on pharmacogenomics and toxicogenomics to fully determine the lead bioactive compound suitable or effective against a certain antimicrobial disease/ pathogenic agent. Likewise, with the Philippines rich biodiversity, there is still a need to search and discover from other rare environment and endemic species considering its known potential in producing possible medicinal drug.

Moreover, to prepare for possible another pandemic which might be brought about by zoonotic diseases, research initiatives along this area have been considered and included for undertaking.

For 2022-2028, priority research areas include:

1. Fundamental Studies on Potential Sources of Natural Products from rare environments and endemic species

With various emerging and re-emerging diseases that the Philippines is currently facing, this research program will be an initiative for generation of new knowledge and/or possible alternative sources of medicinal drugs for disease control and management through natural products development from rare environments and endemic species.

This will include biodiversity studies grounded on taxonomic classification and identification of microorganisms found in caves, mangroves, marine sediment, volcanoes, mud springs, mesophotic reefs and the like, in search of potential sources of bioactive compounds. Breakthroughs from taxonomic studies will pave the way for the development of next generation chemotherapeutic agents and antimicrobial drugs from the discoveries of molecules with wide ranging bioactivities including antibiotics, antifungal and anticancer properties isolated from various organisms.

Areas for research include:

- a. Bioprospecting (e.g. marine organisms for biomedical use)
- b. Bioinformatics
- c. Characterization and structure elucidation of isolates and bioactive compounds
- d. Pharmacogenomics and toxicogenomics
- e. Lead identification and pre-clinical studies

2. Basic Veterinary Studies

This initiative is for the identification and characterization of possible zoonotic diseases (etiology, transmission and control), which may include researches on the economically important animal diseases and those that pose risks to be transmitted to humans, in order to be able to create and provide effective disease control and management in pursuit of attaining better health for all.

Areas of research include:

- a. Identification and characterization of zoonotic diseases
- b. Emerging and re-emerging zoonotic diseases and its management

PRIORITY AREAS FOR 2022 – 2025

- 1. Isolation and Characterization of potential sources of natural products from rare environments and endemic species
 - a. Volcanoes, caves, mudsprings, mined-out areas, mesophotic reefs, marine environments, mangroves and others
 - b. Endemic species from aquatic environments
- 2. Basic Veterinary studies
 - a. Zoonotic Diseases (etiology, transmission and control)
 - b. Emerging and re-emerging zoonotic diseases and its management

PRIORITY AREAS FOR 2026 – 2028

- 1. Lead compound optimization and pre-clinical studies of bioactive compounds rare environments and endemic species
 - a. Volcanoes, caves, mudsprings, mined-out areas, mesophotic reefs, mangroves and others
 - b. Endemic species from aquatic environments
- 2. Basic Veterinary studies
 - a. Zoonotic Diseases (etiology, transmission and control)
 - b. Emerging and re-emerging zoonotic diseases and its management

PROPOSED BUDGET FOR HEALTH SUFFICIENCY (2022 – 2028)

2022	2023	2024	2025	2026	2027	2028
8.761 M	37 M	50.5 M	71 M	77.5 M	84 M	92 M

D. CLEAN ENERGY

ALERT Agenda (Alternative Energy Research Trends)

Programs under ALERT aim to investigate alternative energy sources in the Philippines. As our country continues to modernize and industrialize, its energy needs are expected to double over the next 20 years. The challenge is to meet these needs while trying to stop accelerating greenhouse gas emissions that contribute to climate change. Thus, researches on cleaner energy sources is very important. Above all, this program will lay out how renewable energy can save the government money, bring jobs to the country, create wealth, expand access to energy for the most vulnerable in poor communities, and foster national energy independence.

The demand for energy has dramatically risen in the past years. In response to these challenges, energy sectors have evolved to focus on cleaner and more sustainable energy projects. What began, earlier this decade, as interventions in electricity expansion projects—oil and gas sectors, and power sector reforms—have now advanced to investments in alternative source of energy and renewable energy. This program will contribute in addressing this problem.

For the past five years (2017-2021), ALERT has already funded seven projects. Notable accomplishments under ALERT includes: optimal design of a polygeneration system using various clean and low carbon technologies, sustainability assessment of algae-based biofuels in the Philippines, and the development of a P-graph based model for designing Philippine agricultural waste-based integrated biorefinery.

Gaps like commercial viability studies of the clean and renewable sources of energy will hopefully be addressed by projects to be funded under this research agenda.

For 2022-2028, areas of research will include:

- 1. Alternative Energy
 - a. Resource assessment of potential sources of clean and renewable energy
 - b. Identification and characterization of clean and renewable sources of energy (wind, solar, biofuels, hydro)

PRIORITY AREAS FOR 2022 – 2025

Resource assessment of potential alternative and renewable sources of energy, preferably for Geographically Isolated and Disadvantaged Areas (GIDA)

- a. Solar, wind, biofuels, hydro, waves, and others

PRIORITY FOR 2026 – 2028

From 2026-2028, priority will be on conduct of commercial viability studies of the potential clean and renewable sources of energy identified from previous studies.

PROPOSED BUDGET FOR ALERT PROGRAM (2022 – 2028)

2022	2023	2024	2025	2026	2027	2028
5.497 M	12 M	16.25 M	20 M	25 M	32 M	40 M

E. SUSTAINABLE COMMUNITIES

SAKLAW Agenda (Saklolo sa Lawa)

This research agenda aims to establish scientifically crafted sustainability management solutions (action plans/roadmaps/models) to the pressing ecological problems, as well as the encompassing social issues affecting the different vulnerable communities/ecosystems in the country. The agenda is into geographical, community- based (people), ecosystem-based (environment), and transdisciplinary in approach which will diagnose problems and challenges on ecological and sociological components that hinder sustainability of the ecosystem and surrounding communities, in order to come up with scientific solutions and policy recommendations.

In the past five years (2017-2021), SAKLAW supported several assessment studies several assessment and environmental scanning on Lake Lanao, Laguna Lake, and the Seven Lakes of San Pablo. This initiative has produced several policy recommendations on the conservation of the said lakes. A new biomarker indicating estrogen pollution in lakes has also been discovered by the program.

For 2022-2028, areas of research include:

1. Vulnerable Ecosystems (Lakes, Rivers, Wetlands, Seas, and Oceans)
 - a. Soil science
 - b. Carrying capacity models of ecosystems
 - c. Environmental scanning of physical, aquatic, marine, and terrestrial resources
 - d. Endangered species
 - e. Economic valuation of ecosystems, natural capital, and cost-benefit analyses
 - f. Evaluation of adaptive socio-ecological systems in a changing environment
 - g. Assessment studies on the resource sustainability of various ecosystems
 - h. Models and frameworks for enhancing adaptive capacities of vulnerable communities
 - i. Biological pollution

2. Greening Mined out Areas in the Philippines (GMAP)
 - a. Reduction of heavy metals exposure among communities
3. Risk Communication Studies for Disaster Management
 - a. Human dimensions research on climate change (drivers, impact, responses, adaptive capacities)
 - b. Risk communication models for disaster risk reduction and climate change adaptation (DRR/CCA)
4. Biodiversity and Ecosystem Studies
 - a. Environmental scanning of physical marine and terrestrial resources (taxonomy, systematics, ecology)

PRIORITY AREAS FOR 2022 – 2025

1. Vulnerable Ecosystems: Lakes (Lanao, Sebu, Mainit, Seven Lakes of San Pablo; Sumlang, Nag-Aso and Danao of Albay; Lakes Danao, Mahagnao and Bito of Leyte)
 - a. Carrying capacity models of ecosystems
 - b. Environmental scanning of physical, aquatic, and terrestrial resources
 - c. Economic resource assessment and valuation
 - d. Physico-chemical characterization
 - e. Risk assessment
 - f. Socio-economics
2. Greening the mined-out areas in the Philippines (GMAP) (Surigao, Cebu, Zambales, Benguet)
 - a. Heavy metal contamination assessment
 - b. Vulnerability and risk assessment
 - c. Economic resource valuation
 - d. Social, environmental and technology scanning
 - e. Heavy metal sequestration, soil regeneration
 - f. Reduction of heavy metals exposure among communities
3. Risk Communication Studies for Disaster Management particularly on earthquakes, landslides, flooding and climate change hazards (Benguet, Samar, Bukidnon, Masbate, Sorsogon, Negros Oriental)
 - a. Assessment/situational Analysis
 - b. Design, implementation and evaluation of risk communication (Riskcom) plan
 - c. Riskcom Innovation Models for resilient disaster risk governance
4. Biodiversity and ecosystem studies
 - a. Genetic analysis (biochemical, cytogenetics, molecular)
 - b. Morphological, allelopathic and bioecological studies

PRIORITY AREAS FOR 2026 – 2028

1. Vulnerable Ecosystems: Lakes (Lanao, Sebu, Mainit, Seven Lakes of San Pablo; Sumlang, Nag-Aso and Danao of Albay; Lakes Danao, Mahagnao and Bito of Leyte)
 - a. Carrying capacity models of ecosystems
 - b. Environmental scanning of physical, aquatic, and terrestrial resources
 - c. Economic resource assessment and valuation
 - d. Physico-chemical characterization
 - e. Risk assessment
 - f. Socio-economics
2. Greening the mined-out areas in the Philippines (GMAP) (Surigao, Cebu, Zambales, Benguet)
 - a. Reduction of heavy metals exposure among communities
3. Risk Communication Studies for Disaster Management particularly on earthquakes, landslides, flooding and climate change hazards (Saranggani, Surigao del Norte, Surigao del Sur, Dinagat Islands, Southern Leyte, Eastern Samar)
 - a. Assessment/situational Analysis
 - b. Design, implementation and evaluation of Riskcom plan

PROPOSED BUDGET FOR SUSTAINABLE COMMUNITIES (2022 – 2028)

2022	2023	2024	2025	2026	2027	2028
27.2 M	72 M	86.25 M	117 M	124.5 M	140 M	159 M

F. INCLUSIVE NATION-BUILDING

ATIN Agenda (Ang Tinig Natin)

The inclusive nation-building (ATIN) agenda aims on transforming the country into a nation united in its ethnic diversity; just and humane among its people’s interrelations; respectful, even appreciative of their diverse and divergent ways of life, arts, languages, practices, and cultures; fostering and nurturing their cultural integrity together with economic self- sufficiency. This re- visioned national development adheres to moral and ethical principles; reclaims the rich past (including archaeological roots) and resilient present (through Filipinnovation in the arts and cultures). This nationalist direction utilizes innovative strategies for comprehensive development of communities, and maximizes reforms on all levels, complemented by multimedia dissemination, towards encompassing positive social change.

Under this initiative, fundamental studies on social processes, indigenous knowledge, and Filipino arts, history and culture will be conducted towards an increased awareness and appreciation of the Filipino identity and heritage. For the past five years (2017-2021), this initiative has produced copyrights of nature's presence, and seven dances of life and sound tenderness, monographs documenting the state of traditional music and dance, and Cebuano songs, and an e-dictionary for language preservation and use among indigenous group.

In valuing the arts, culture and heritage using science, technology and innovation, it is imperative that diverse studies on preservation, conservation and uses for equity and nation building have to be conducted in addressing the gaps in misappreciation, improper use, and lack of policy supporting promotion, valuing its economic benefit and securing safety.

For 2022-2028, areas of research include:

1. Heritage and Arts for Tourism and Creative Industries (HATCI) This will look into and investigate the artistic and cultural dynamics of selected creative industry sectors for a much deeper perspective, understanding and support to maximize its potentials in contributing to the productivity of the creative industry sectors, as well as its potentials for agro or cultural tourism. HATCI will also document Philippine indigenous knowledge, culture, and heritage.
 - a. Documentation of Philippine indigenous knowledge, culture, and heritage
 - Extant arts, music, and language
 - Indigenous technology in Filipino expressive culture
 - b. Filipinnovation of Arts, Culture and Heritage for Tourism and Creative MSMEs/Industries
 - Documentation, preservation and knowledge transfers
 - Industry-based assessments
 - Value chain analysis
 - Art history
 - Modernization, digitization and/or use of artificial intelligence (AI)
 - Characterization/analysis of materials
2. Defense and Security - Kapakanan ng Tao sa Oras ng Pandemya (DaS - KTOP) This will include issues that concern sovereignty such as biosecurity, cybersecurity, public safety and welfare. It will also include studies on the socio-economic dimension of the COVID-19 pandemic which threatened public health safety and welfare of the Filipinos, under the Kapakanan ng Tao sa Oras ng Pandemya (KTOP) Program. These researches will aid in policy making and help individuals and organizations in adapting new measures in different settings.

- a. National security and sovereignty
 - Biosecurity
 - Cybersecurity
 - Territorial Integrity
 - Public safety and security
- b. Socio-economic dimension of the COVID-19 pandemic and health emergencies
 - Assessment of remote and/or blended learning
 - Employment
 - Livelihood sustainability
 - Emerging e-commerce (MSMEs, informal sector)
 - Work-from-home
 - Behavioral response; socialization processes

PRIORITY AREAS FOR 2022 – 2025

1. Heritage and Arts for Tourism and Creative Industries (HATCI)
 - a. Documentation of Philippine indigenous knowledge, culture, and heritage (Extant arts, music and language)
 - By specific indigenous group
 - Site-specific (geographical)
 - b. Filipinovation of Arts, Culture and Heritage for Tourism and Creative Music Industry
 - AI-aided preservation of culture and use of arts
 - Scoping and scanning the industry
 - Value chain analysis
2. Defense and Security (DaS - KTOP)
 - a. National security and sovereignty
 - Cybersecurity
 - Review of cybersecurity policies
 - IT and communication
 - Data protection in the government sector
 - b. Socio-economic dimension of the COVID-19 pandemic and health emergencies
 - Assessment of remote and/or Blended learning
 - Emerging e-commerce (MSMEs, informal sector)
 - Work-from-home
 - Behavioral response; socialization processes
 - Recovery plan/mechanism (education, social, tourism, economic, care system)

PRIORITY AREAS FOR 2026 – 2028

- 1. Heritage and Arts for Tourism and Creative Industries (HATCI)
 - a. Documentation of Philippine indigenous knowledge, culture, and Heritage
 - Extant arts, music, and language
 - Indigenous technology in Filipino expressive culture
 - b. Filipinovation of Arts, Culture and Heritage for Tourism and Creative Wood and Bamboo MSMEs
- 2. Defense and Security (DaS - KTOP)
 - a. National security and sovereignty
 - Biosecurity
 - Public Safety and security
 - b. Socio-economic dimension of the COVID-19 pandemic
 - Information and communications technology (ICT) application for remote/blended teaching-learning and/or management tools
 - Emerging e-commerce (MSMEs, informal sector)
 - Work-from-home
 - Behavioral response; socialization processes
 - Post-Pandemic studies

PROPOSED BUDGET FOR INCLUSIVE NATION-BUILDING (2022 – 2028)

2022	2023	2024	2025	2026	2027	2028
4.825 M	76 M	112.956 M	120 M	130 M	146 M	161 M

II-3. POLICY RESEARCH

As an advisory body to the government, as mandated in Act 4120, the Council funds Policy Research to address issues related to public welfare, hence, will need legislation that is based on scientific inquiry and evidence. Research projects address problems related to public welfare. They fall under two tracks: (1) demand-driven research projects --- where the issues are identified by solons from the Lower House or the Senate, and (2) Council-directed research projects --- where the issues are identified by the Governing Board. The objective of Policy Research is to provide the science to aid legislation, hence, promote evidence-based policymaking in the country.

The output of a Policy Research project may include a draft policy proposal/recommendation or a policy statement which will be shepherded to appropriate Committees/Offices in the two Houses and/or relevant government agencies.

PRIORITY AREAS FOR 2022 – 2025

The policy research areas initially identified by the Governing Board are as follows:

- Waste to energy
- Future Earth
- Music heritage
- Hunger
- Mother tongue-based education

PROPOSED BUDGET FOR POLICY RESEARCH (2022 – 2028)

2022	2023	2024	2025	2026	2027	2028
3.8 M	5 M	7 M	9 M	11 M	13 M	15 M

For all the NIBRA, cross-cutting themes include gender, KAPS (knowledge, attitude, practices, skills), policy studies, valuation and cost benefit-analysis, impact studies, and DRR/CCA dimensions will be considered.

National Unified Health Research Agenda

The Philippines is committed to health research and development as a means of safeguarding the right to health and improving the quality of life of Filipinos. Filipino health is fundamental to the country's socioeconomic agenda and remains a pillar of the vision of Ambisyon Natin 2040. Imminently, the Philippine government seeks to build livable communities by 2028 that guide Filipinos towards healthy choices and ensure access to health services. Research is a powerful tool to advance health by enabling effective measures, new understanding of health phenomena, and development of interventions.

Central to the government's strategy for boosting health through research is the Philippine National Health Research System (PNHRS). PNHRS embodies inclusivity, excellence, equity, recognizing health's multidimensional impact across economic, political, educational, and scientific systems nationwide. The PNHRS was institutionalized through agreements among core implementing agencies: the Department of Science and Technology (DOST), the Department of Health, the Commission on Higher Education, and the University of the Philippines Manila - National Institutes of Health.

Research agendas aid research-to-policy translation, enhance research efficiency, strengthen health research systems, and harmonize research priorities across multiple stakeholders. Research that is driven by a well-designed research agenda is likely to have a significant impact on knowledge or practice in the short- to medium-term.

The National Unified Health Research Agenda (NUHRA) is the prime instrument of the PNHRS to direct activities and funding for health research. It serves as a platform to garner local, national, and global backing for health research priorities. The NUHRA aims to address the health needs of the population aligned with the nation's health sector goals. The periodic review and formulation of the NUHRA every six years is a response to the evolving nature of health issues, public policies, scientific progress and societal changes.

The NUHRA 2023-2028 is the fourth iteration of the Philippine health research agenda by the PNHRS. The NUHRA 2023-2028 is a response to intricate health systems and challenges, fueled by a growing research community, and evolving societal, political, and health dynamics in the Philippines.

NUHRA 2023-2028: ALIGNING RESEARCH WITH HEALTH SYSTEM GOALS

Given its 6-year life span, the NUHRA is developed at a certain point in time, then continuously implemented through a changing health context. The NUHRA 2023-2028 comes at a critical juncture in the evolution of the Philippine health system. It recognizes major shifts and considerations so that it can contribute to the long-term goals of the health sector.

Universal health care and the role of local health systems

The implementation of Universal Health Care (UHC) marks a transformative step towards ensuring that all Filipinos have access to quality health services they need without suffering financial hardship. Central to this vision is the strengthening and empowerment of local health systems.

By fostering collaboration between national and local governments, healthcare providers, and communities, the Philippines aims to create a responsive health system that meets the unique needs of every Filipino. This recognizes the importance of local knowledge, resources, and leadership in achieving health for all. It also underscores the need for research that informs policy and practice at the local level, ensuring that UHC is implemented in a way that is both effective and equitable.

Holistic and intersectional research for health systems strengthening

The NUHRA 2023-2028 embraces a holistic and intersectional approach to health research. Health is influenced by a complex interplay of biological, social, economic, and environmental factors. There should be a commitment to supporting research that transcends traditional boundaries. This means encouraging interdisciplinary collaboration and integrating insights from fields such as public health, economics, sociology, environmental science, and more. By taking a whole-system view, research aligned with the NUHRA 2023-2028 can uncover the root causes of health challenges and develop solutions that are innovative and sustainable.

Evidence-based and participatory policy- and decision-making in health

The Philippine health system is committed to fostering a culture where evidence directly informs policy and practice, and diverse stakeholders participate in the decision-making process. By aligning research priorities with national health goals, the NUHRA 2023-2028 aims to ensure that policies and interventions are grounded in sound evidence. The involvement of diverse stakeholders means policy and practice are also responsive to the needs and preferences of those they are meant to serve.

PRINCIPLES OF NUHRA 2023-2028 DEVELOPMENT

Kingdon multiple streams approach

In the Kingdon multiple streams approach, policy change happens when three independent streams converge (Figure 1)

- 1. problems which are conditions that need to be changed,
- 2. policies that are ideas or solutions floating around, and
- 3. politics which are changes in a policymaker's perceptions of public opinion or national mood.

Figure 1. The Kingdon multiple streams approach

Policy entrepreneurs pair their preferred solutions to problems in politically favorable conditions by waiting for a rare policy window to press for their ideas. A rare policy window may open through an election or a key stage in a budgetary cycle. The PNHRS' 6-year cyclical process to develop a NUHRA also presents a rare policy window for Filipinos to participate in the government's policy making process.

Bottom-up prioritization with top-down inputs

Describing the research priority setting (RPS) process as bottom-up or top-down refers to directionality of influence. In the bottom-up approach, prioritization is delegated to the scientific community, firms, civil society organizations, or community representatives. On the other hand, top-down priority setting refers to governments deciding on which priorities to allocate resources to the bottom-up strategy may promote shortsightedness and the status quo as opposed to novelty. Conversely, top-down may cause tension with existing structures and capabilities of researchers and research implementing agencies.

The combination of bottom-up and top-down approaches may mitigate biases in RPS activities through the involvement of more actors and interests. Evidence shows that stakeholder diversity is a fundamental condition for successful priority setting. Priorities receive greater attention from policymakers when co-produced by research implementers. Apart from generating priorities that are relevant to health needs the bottom-up approach also facilitates ownership of priorities. Complemented by top-down priority steering, the combination approach aids in minimizing research duplication and engendering shared responsibility in the eventual implementation of research priorities.

Nominal group technique

The nominal group technique is a consensus-building process that involves assembly of small groups, equal participation using round robin discussion, clarification of ideas with the group, and voting or ranking of ideas.

Round robin discussions promote tolerance of conflict ideas and facilitate maintaining a written record and guide. Equal participation has the potential to manage power differences in multisectoral processes, such as those observed in the development of the NUHRA 2017-2022.

The process of multiple round robin discussions enables the establishment of an important behavior pattern where, by the second or third round, each member becomes an achieved participant in the group. Rounds of voting or ranking of ideas punctuated by discussions also increase judgmental accuracy by dissecting inconsistent voting patterns and providing the opportunity to rediscuss items which are perceived as receiving too many or too few votes

Markers of consensus

Consensus-building processes are often ended when consensus is deemed to have been reached, but this condition is often subjective. It is advisable to declare the consensus threshold value a priori to maintain the validity and reliability of the final decision, as well as the transparency of the decision-making process.

In an analysis of controlled feedback provided in a consensus-building Delphi study, greater consensus was achieved with succeeding rounds and responses were more stable when participants were told beforehand of an established threshold of group agreement at 75%. This number was also consistent with systematic reviews that found the median threshold of included studies at 75%.

Multi-criteria decision analysis

Multi-criteria decision analysis (MCDA) is a framework of analytical techniques that support decision-making in the setting of variable criteria that may be in conflict with each other. MCDA aids in promoting consistency, transparency and legitimacy of decisions. The following MCDA approaches were applied to the NUHRA 2023-2028 development:

- 1. Defining the decision problem
- 2. Selecting and weighting criteria
- 3. Ranking
- 4. Reporting results, deliberation, decision, communication, and implementation

Optimization of the RPS process

Recognizing the need for efficiency and accuracy, the NUHRA 2023-2028 development embraced the use of on line tools and automation to streamline the RPS process. This allowed for easy data collection, collation, and analysis using spreadsheets, which may even be exported to more advanced statistical analysis applications. These tools create more opportunities for stakeholder engagement and inclusivity by amplifying reach and allowing individual participants to respond to the surveys independent of other stakeholders.

By leveraging digital platforms and automated calculations, NUHRA 2023-2028 development gathered insights, analyzed data, and identified research priorities with greater speed and precision. The optimization of the RPS process through technology is a commitment to innovation and continuous improvement, ensuring that research efforts are aligned with the needs and aspirations of Filipinos.

THE NUHRA 2023-2028 RESEARCH PRIORITY SETTING METHODOLOGY

The NUHRA 2023-2028 was developed in six steps aligned with previous RPS activities and frameworks, including the PNHRs Guidelines for Health Research Prioritization.

- 1. **Participant identification** - Identify participants to be part of the RPS process, with aid from the Research Agenda Management Committee, the Philippine Council for Health Research and Development (PCHRD), and all Regional Health Research and Development Consortiums (RHRDC)
- 2. **Information gathering** - Contextualization through national health sector directions and regional health status.
- 3. **Regional workshops** - 17 regional multi stakeholder workshops with 467 participants across the country to identify, score, and rank the top 10 regional health research priorities per region.

- 4. **Synthesis of regional priorities** - Thematic synthesis of 170 research priorities generated from the 17 regional workshops to form the initial NUHRA 2023-2028 themes and subthemes.
- 5. **Additional topics** - Seeking additional topics not capture by regions from national stakeholders.
- 6. **Validation of the NUHRA 2023-2028** - Seeking feedback on the provisional NUHRA 2023-2028 with 55 national stakeholders

1. Participant identification

Each RHRDC's member list and the NUHRA 2017-2022 stakeholder list served as the initial participant pool for the RPS process. These were updated with aid from the RHRDCs, who have a better understanding of the health research system in their area. Only 30 to 40 participants could be accommodated per region given available resources. Considerations in participants per region were the following:

- Institutions/individuals that the consortium closely and frequently work with
- Institutions/individuals with power to represent interest groups (women, patients, indigenous people [IPs], differently a bled, etc)
- Ideally a good mix of stakeholders from different backgrounds and institutions
- Institutions/individuals that wield influence to promote or hinder research agenda implementation
- Groups that are dependent on the outputs of consortium activities

2. Information gathering

Grounding RPS in real world context entails the production of materials that describe the country's current health system and status at the national and regional levels. The project team reviewed literature, policies, and strategies that shed light on national health sector directions. For the 17 regions, this entailed rapid review of regional burdens of illness, health system status, and previous regional research priorities. Both outputs were summarized as and presented during workshops.

3. Regional workshops

Workshops were conducted in 17 regions from 17 April to 19 June 2023 for the identification of regional health research priorities. The workshops were attended by 467 participants from the public and private sector, non-government organizations, associations/societies, and academe. Most participants were from consortium member institutions (85.9%) and women (62.3%).

1. Contextualization

To ground stakeholders in a similar understanding of the prevailing problem structures, the project team presented the national health sector directions, regional health status, the region's 2017-2022 research priorities, and research funding opportunities.

2. Generation and consolidation of health research topics

Participants were divided into small groups then instructed to brainstorm up to 3 health research topics independently and individually. These topics were presented in round-robin fashion within each group.

After the round-robin, participants had the opportunity to express their opinions and thoughts on the topics presented by their peers. This discussion allowed the groups to deliberate and make decisions on whether to omit, consolidate, or retain research topics. Each group presented their brainstorming outputs to the plenary.

Facilitators consolidated the outputs to form the initial list of research priorities. These were presented to and approved by workshop participants.

3. Selecting prioritization criteria

Participants selected prioritization criteria lifted from the World Health Organization Special Program for Research and Training in Tropical Diseases - Research Priorities for the Environment, Agriculture and Infectious Diseases of Poverty. This list was developed by an expert group as measures of performance against which research priorities could be classified and scored.

Criteria selection occurred in 3 steps that identified the number of criteria to be used, which criteria will be selected, and how important these criteria were (Annex A). This process was facilitated through the use of QR codes and supported by Google Forms, Sheets, and Slides linking and automation. The number of criteria used in regions ranged from 5 to 7. Across regions, 13 of the 15 criteria were selected (Annex B).

4. Scoring and ranking health research topics

Workshop participants prioritized and ranked health research topics. Through a QR code linked to a Google Form, participants independently, individually, and anonymously assigned a score of 0-100 to each health research topic per criterion. The score of each research topic was computed using a simple weighted-sum approach.

5. Presentation of the top 10 regional health research priorities

The top 10 health research priorities were immediately presented after all on line forms were submitted. Results of each regional workshop are presented in Annex C. Each RHRDC can accommodate more research priorities in their agenda after the workshop. However, only the top 10 priorities were considered as inputs to NUHRA 2023-2028 in the interest of fairness to other RHRDCs.

4. **Synthesis of regional priorities**

The 170 research priorities from the regional workshops were consolidated using qualitative research techniques such as content and thematic analysis to reveal common themes. This step was assisted by the Artificial Intelligence tool ChatGPT Plus with the plug-in LinkReader (version 4.0). To correct for the inherent bias observed in ChatGPT, the following steps were taken in its assistance of synthesizing regional research priorities 1:

- 1. ChatGPT Plus was provided context on NUHRA 2023-2028 development
- 2. It was asked to create themes and subthemes from the 170 research topics generated from 17 regional workshops in the Philippines, and to treat all topics as equals.
- 3. Each synthesis version was recorded on Google Docs.
- 4. Each synthesis was meticulously checked by the project team in case
 - a. priorities were misplaced or ignored,
 - b. subthemes were duplicated as main themes, or
 - c. subthemes were duplicated un
- 5. Project team finalized the themes and subthemes of the draft NUHRA 2023-2028.

5. **Additional Topics**

National level stakeholders were sent a summary of the NUHRA 2023-2028 development, situational reports, and the draft NUHRA 2023-2028. Stakeholders were given an opportunity to propose additional research topics through a Google Form survey. The additional topics were incorporated into the draft NUHRA 2023-2028 with assistance from ChatGPT Plus (version 4.0).

6. Validation of the NUHRA 2023-2028

A total of 55 national stakeholders were convened for a validation of the NUHRA 2023-2028 themes on 19 July 2023. The project team-oriented stakeholders on the methodology for NUHRA 2023-2028. Feedback was sought on the draft NUHRA 2023-2028, specifically on themes and subthemes. Comments were incorporated to create the final NUHRA 2023-2028. The themes of the NUHRA 2023-2028 are presented in alphabetical order.

NUHRA 2023-2028: Themes and Subthemes

Disease Management

The study and implementation of strategies to prevent, diagnose, manage, and treat diseases, particularly chronic and communicable diseases.

- **Non-communicable Diseases (NCDs)**
Studies on the burden, prevention, diagnosis, treatment, and management of these diseases, with an emphasis on:
 - enhancing the quality of services in rural areas,
 - addressing access to treatment barriers, and
 - understanding the impact of chronic diseases on the population.
- **Communicable Diseases**
 - Disease surveillance at all levels of government, including the use of geographic information system mapping of disease incidence.
 - The effects of climate change on health, particularly in relation to the increased risk of infectious diseases.
- **Diseases of Rapid Urbanization and Industrialization**
The health impact of environmental changes, occupational health diseases, and the triple burden of disease (communicable diseases, NCDs, and injuries) in urban and industrial settings.

Halal in Health

The application of Halal principles in the context of health.

- **Development and Production of Halal Pharmaceuticals**

- Research, development, and production of pharmaceutical products that comply with the principles of Halal.
- Exploring the use of Halal-certified ingredients in drug production.
- Investigation on the processes involved in certifying pharmaceuticals as Halal, and the regulatory frameworks that govern this.
- Halal Food and Nutrition
- The integration of Halal principles into the food and beverage industry. It covers the entire food supply chain, from the sourcing of ingredients to the preparation and packaging of food products.
- The promotion of Halal food and nutrition in mainstream markets.

Health Security, Emergency, and Disaster Risk Management

The study and implementation of strategies to prepare for, respond to, and recover from health emergencies and disasters. This applies the concept of One Health, which is a focus on crises that may originate in the interface between humans, animals, and the environments in which they interact.

- Disaster Risk Reduction and Climate Change Adaptation of Health Systems
- Capacity assessment to deliver health services during and after disasters or climate-related events.
- Identification of disaster and climate change risks per region and tailoring
- health systems strategies and measures to these risks.
- Research on improving health infrastructure adaptation.
- Enhancement of health worker capacity to respond to emergencies.
- Environmental Health and Sanitation
- The impact of specific environmental factors on health (air and water quality, waste management, exposure to hazardous substances) and developing strategies to mitigate these impacts.
- Evaluating the effectiveness of current sanitation practices in preventing diseases and developing new practices based on identified gaps.

Health Technology and Innovation

The development and application of innovative solutions to health challenges.

- **Drug Discovery and Development**

Development of new drugs and therapies to address prevalent diseases in the Philippines.

- **Biotechnology and Biomedical Devices**

Development and validation of diagnostic kits, as well as the creation of innovative biomedical devices to improve health outcomes.

- **Frontiers in Health Technologies**

The use of artificial intelligence, big data, machine/deep learning, and other 4th Industrial Revolution elements to develop a technology-driven future for the healthcare sector. Specific areas of focus could include brain health, nuclear and precision medicine, and space health.

- **Health Product Regulation and Assessment**

The evaluation and improvement of robust regulatory frameworks for health products and technologies, as well as its impact on health outcomes.

Health of Vulnerable Populations

Research for the benefit of populations that are underserved due to factors such as socioeconomic status, geographical location, gender, race, ethnicity, age, or disability towards reduction of disparities and equitable health opportunities.

- **Health of Indigenous Cultural Communities (ICCs)**

- The health status and health-seeking behaviors of these communities.
- Improving access to healthcare services.
- Development and evaluation of culturally appropriate health programs and interventions for ICCs

- **Transgender Health**

- Understanding the specific health needs and challenges of transgender individuals.
- Experiences of transgender individuals in accessing healthcare services.
- The impact of social stigma and discrimination on health outcomes of transgender individuals.

- **Geriatric Health**

- The impact of social, economic, and environmental factors on elderly health.
- Development and evaluation of interventions to address the specific health needs of the elderly, such as fall prevention programs, dementia care models, and health promotion activities tailored to this age group.

Health Promotion

Empowering individuals and communities to manage their health through education, the creation of health-supportive environments, and organization of societal actions for health promotion and protection. This calls for multidimensional research, including the application of participatory action research methods.

- **Health Promotion, Communication, and Education**
Development, implementation, and evaluation of strategies to promote health and prevent diseases at the community and population level.
 - Effectiveness of health communication campaigns and health education programs.
 - Barriers to health information access.
 - The impact of social media on health-seeking behavior of Filipinos.
- **Health Literacy**
 - Assessment of health literacy in different population groups.
 - The development and testing of interventions to enhance health literacy.
 - Misinformation and/or dis information's impact on health literacy.
- **Healthy Governance**
 - The impact and assessment of health policies and regulations on population health.
 - The effectiveness of health governance structures and processes.
 - The role of leadership in health promotion.
- **Healthy Settings**
 - Studies on the healthiness of various settings (e.g., schools, workplaces, neighborhoods) and the development and evaluation of interventions to make these settings healthier.
- **Innovative Approaches in Health Promotion and Education**
 - The use of digital technologies in health promotion.
 - Development, implementation, and effectiveness of novel health education strategies.

Health Systems Strengthening Towards UHC

Understanding and improving the efficiency, effectiveness, quality, and responsiveness of health systems, all aimed at achieving UHC.

- **Health Governance and Policies**

- Effectiveness of current health governance structures and policies in achieving UHC.
- Impact of governance structures on health system performance and health outcomes.
- The assessment of UHC implementation in across regions.
- Research on health research-its governance, effectiveness and efficiency of policies to support health research, and the use of evidence in policy- and decision-making.

- **Health Service Delivery**

- Implementation and effectiveness of different service delivery models, particularly primary care and health care provider networks.
- Impact of health care provider networks on access to care and health outcomes.
- The use, acceptance, and integration of traditional, complementary, and integrative health care practices in the health system and their impact on health outcomes.
- Development of clinical pathways and clinical practice guidelines.

- **Health Financing**

- Sustainability of health financing under UHC, with a focus on cooperative governance across stakeholders and health system levels.
- Strategic purchasing of health services and products under UHC.
- Feasibility of financial policies to cover under-5 immunization.
- Impact of the Mandanas-Garcia ruling on health programs.

- **Health Human Resources**

- Assessing the welfare of healthcare workers.
- Research on and development of strategies for health workforce retention and strengthening.
- The inclusion of non-health professionals in the health workforce.

- **Health Information Systems (HIS)**

Research on the integration of local and healthcare provider network information systems and the use of health information for decision-making.

- **Improving Access to Medicines, Including Enhancements in Quality and Affordability**

Enhancing medicine quality and affordability through studies on optimizing the development, manufacturing, procurement, distribution, and utilization of essential medicines, vaccines, and healthcare products.

- **Evaluation of Health Systems and Programs**
 - Availability and use of evidence to inform policy and program implementation.
 - The impact of health facility enhancement programs.
 - Evaluation of community health team performance and impact on healthcare access.

Maternal, Newborn, and Child Health

The health and wellbeing of mothers, children, and adolescents.

- **Maternal, Child, and Neonatal Health**
 - Investigate the factors contributing to rising maternal, neonatal, and child mortality in different regions, with a special focus on geographically isolated and disadvantaged areas and IPs.
 - Evaluate the effectiveness and accessibility of reproductive, maternal, neonatal, and child health services across the country.
 - Assess the impact of health policies and programs on maternal, neonatal, and child health outcomes.
- **Immunization**
 - Evaluate the availability, coverage, and effectiveness of immunization programs for under-5 children in different regions.
 - Factors contributing to vaccine hesitancy and acceptance in various communities.
 - Assess the impact of health education and promotion strategies on improving immunization coverage.
 - Examine the potential of technological innovations, such as digital health interventions, in improving the delivery and monitoring of immunization services.

Mental Health

The prevalence, treatment, rehabilitation/management of mental health conditions.

- **Mental Health of Children, Adolescents, and Students**
 - Understanding the unique mental health challenges in these groups, including prevalence.
 - The implementation and effectiveness of school-based mental health programs and interventions.

- **Mental Health in the Workplace**
 - The prevalence of mental health issues among workers in different industries and occupational groups.
 - The impact of work-related stress on mental health.
 - Implementation and effectiveness of workplace mental health programs.
- **Mental Health Promotion**

Studies on the effectiveness of mental health promotion programs and the role of community-based and digital health interventions in promoting mental health.
- **Mental Health and Substance Abuse**

Prevalence of co-occurring mental health and substance use disorders and the effectiveness of integrated interventions for co-occurring disorders.
- **Emerging Interventions for Mental Health Across the Life Stages**
 - The role of digital technologies and novel therapeutic approaches in mental health care, and the impact of these interventions on mental health outcomes.
 - Tailoring of novel mental health interventions to different life stages.

Nutrition and Food Security

Ensuring that all individuals have access to sufficient, safe, and nutritious food to maintain a healthy and active life.

- **Food Security, Product Development, and Emerging Technologies**
 - Developing innovative agricultural techniques to increase food production.
 - Studying the impact of climate change on food security.
 - Development of functional foods.
 - Creating new food products that are both nutritious and appealing.
 - Exploring the use of technology in improving food distribution and reducing food waste.
- **Nutrition and Food Safety**
 - The impact of dietary habits on health outcomes.
 - Developing educational programs to promote healthy eating.
 - Investigating the prevalence of food borne illnesses and strategies to prevent them.
 - Evaluating the effectiveness of food safety regulations.

- **Addressing All Forms of Malnutrition Across Life Stages**

- Identifying the causes of various forms of malnutrition.
- Developing interventions to improve nutritional status.
- The impact of malnutrition on health and development across different life stages.
- Evaluating the effectiveness of policies and programs aimed at reducing malnutrition.

- **Multisectoral Nutrition Interventions**

Developing strategies to coordinate efforts across sectors to improve nutrition and evaluating the effectiveness of multisectoral interventions in reducing malnutrition and promoting health.

Sexual and Reproductive Health

Ensuring that all individuals can have a satisfying and safe sex life, the capability to reproduce, and the freedom to decide if, when, and how often to do so.

- **Adolescent Sexuality and Reproductive Health**

- Understanding the unique challenges and needs of adolescents in the context of sexual and reproductive health, including teenage pregnancy and sexually transmitted diseases.
- The impact of cultural, societal, and educational factors on adolescent sexual behavior and reproductive health outcomes.
- Effective interventions to promote safe sexual behaviors among adolescents.

- **Reproductive Health and Rights**

- Effectiveness of current reproductive health policies and programs.
- Barriers to accessing reproductive health services across regions and communities.
- The impact of health governance on reproductive health outcomes.

- **Sexual Health Education**

- Effectiveness of sexual health education curricula in schools and community settings, focusing on their impact on knowledge, attitudes, and behaviors related to sexual health.
- Innovative, digital, or peer-led strategies to enhance accessibility and impact of sexual health education in underserved populations.

- **Gender-based Violence**

- The prevalence, causes, and impact of gender-based violence, as well as factors that perpetuate it.
- Evaluating and improving current interventions and policies on gender-based violence.

Philippine Development Plan 2023-2028

Overview of the Philippine Development Plan 2023-2028

The Philippine Development Plan (PDP) 2023–2028 is a plan for deep economic and social transformation to reinvigorate job creation and accelerate poverty reduction by steering the economy back on a high-growth path. This growth must be inclusive, building an environment that provides equal opportunities to all Filipinos, and equipping them with skills to participate fully in an innovative and globally competitive economy.

The PDP 2023–2028 is based on President Ferdinand R. Marcos Jr.’s 8-point socioeconomic agenda that tackles immediate, on-the-ground concerns—high inflation, scarring due to COVID-19 and the tight fiscal space; address long-standing, critical constraints to generating more jobs, quality jobs, and green jobs over the medium term; and provide the necessary enabling environment—level playing field, and peace and security.

The underlying theme of PDP 2023–2028 is transformation...

Taking off from the lessons learned especially during the pandemic, the PDP 2023–2028 takes on the underlying theme of transforming the economic and social sectors and institutions for a prosperous, inclusive, and resilient society. The transformation agenda is broken down into:

Digitalization. Digital transformation of government will result in more efficient and faster service delivery to the people, more transparency, and fewer opportunities for corruption at various levels. Digitalization can also help the government build better data systems that will create better programs, such as more targeted social protection enabled by the national ID through PhilSys; and better link job seekers to employment opportunities through the expansion of the automated job and applicant matching system, PhilJobNet, created by the Department of Labor and Employment (DOLE). Compliance with regulations may also increase with digital filing and digital payment systems.

The COVID-19 pandemic has forced a wave of digital adoption across the country. An important development is that as more institutions and businesses digitalized, the proportion of consumers that entered the digital marketplace has also expanded rapidly. The rapid and massive migration of people into the digital space is an opportunity to push toward fully digitalizing sectors that have not been able to pivot their processes to maximize the potential efficiency brought about by digitalization.

Servicification. Servicification fosters inter-sectoral linkages to create synergies for more value-adding opportunities, expansion of products and markets, and more efficient delivery network. The Philippines has had a strong competitive advantage in services, which has accounted for a large proportion of GDP and employment both domestically and internationally, albeit in lower productivity jobs. Where the country has been unable to compete successfully is in expanding manufacturing, which, for many other countries, has been the driver of job generation. The evolution of these sectors has blurred the line between manufacturing and service jobs, as manufacturing now requires more service-related labor, which has become more mobile and transmittable via digital means.

Servicification as a strategy means pursuing policies that will build ecosystems around economic clusters identified as potential sources of high growth, to attract more investments and expand its demand for higher productivity jobs. Priority servicification can also be targeted toward the industries of ICT, creatives, tourism, and logistics to move up the global value chain.

Dynamic Innovation Ecosystem. Innovation will translate knowledge and ideas into new products, and/or new and better processes. This requires an ecosystem involving knowledge and R&D institutions, product and process design, marketing, and entrepreneurs. Government will support the creation of innovation ecosystems and their evolution to becoming a dynamic ecosystem that eventually generates not only more, but quality jobs.

Enhanced Connectivity. As an archipelago, the Philippines has unique challenges with connectivity. Digital connectivity is only one form, as physical connectivity through infrastructure and transport is similarly important to link markets to each other; connect urban centers to rural areas; and facilitate the movement of people whether for employment, business and marketing transactions, or even socialization and recreation. Communities should be linked to these opportunities through the development of local road networks that reduce the costs of transport, while also adopting active mobility options and e-vehicles. In addition to investing in connectivity domestically, there are also opportunities to ramp up the connectivity of the country to the rest of the world. Increasing the capacity of airports can revitalize tourism; upgrading ports and improving maritime safety can facilitate the movement of goods, thereby promoting trade and making the country more attractive to investments.

Greater collaboration between local and national government. The PDP seeks to bring local governments in as equal partners in the development agenda of the country. As frontline service providers, LGU performance can spell the difference between regional development and regional stagnation.

One of the major developments in the governance landscape of the Philippines is the Mandanas-Garcia ruling of the Supreme Court in 2018. The ruling meant that the internal revenue allotments (IRA) of local governments would increase by about 23 percent in keeping with the spirit of the Local Government Code of 1991.³² This led to a “re-devolution” of programs and functions to local government units (LGU) as national agencies faced smaller budget allocation.

Operationalizing the Mandanas-Garcia ruling is an opportunity to optimize the sharing of responsibility between local and national government. Over the medium term, there will be close coordination through capacity-building programs and mentoring for LGUs, especially in areas where national government support will be needed. These include important human development investments, notably in health, social welfare, disaster resilience, and local infrastructure. Thus, the completion of Devolution Transition Plans (DTP) will be fast-tracked and operationalized to improve each LGU’s capacity for delivering public services and raising local revenues.

Partnership with the private sector. There are multiple areas to expand the role of the private sector to deliver more benefits to the public. The government’s role is to provide calibrated incentives to priority industries and foster an enabling business environment to allow job-generating businesses and industries to grow. Reconfiguring public–private partnerships (PPP) can also help in addressing cross-cutting issues of a weak competition environment and the digital divide, as well as boost the country’s campaign to attract foreign investments. The tight fiscal space that will constrain public investments for the next few years provides a rationale for favoring PPPs in enhancing and upgrading infrastructure. Larger private sector participation in areas such as housing, transport, digital, and other related large infrastructure can free up public funds for investments in human capital to address, for instance, the scarring from the pandemic in health care and education.

...that is integral in all the strategies of the PDP.

The overarching goal of the PDP 2023–2028 is to achieve economic and social transformation for a prosperous, inclusive, and resilient society. The strategies are organized corresponding to the following objectives: (a) develop and protect capabilities of individuals and families; (b) transform production sectors to generate more quality jobs and produce competitive products; and (c) foster an enabling environment encompassing institutions, physical and natural environment, which promotes a prosperous, inclusive and resilient society.

Evaluation Agenda for the Philippine Development Plan 2023–2028

NEDA and the Department of Budget and Management (DBM) adopted the National Evaluation Policy (NEP) Framework in 2015¹ in line with the government’s continuing efforts to strengthen its results orientation (See Figure 16.1). The National Evaluation Policy Framework underscores the need to develop an evaluative culture in the government by providing the framework for the purposive conduct of evaluations in support of good governance, transparency, accountability, and evidence-based decision-making.

As NEDA takes the lead in the formulation of the PDP and oversees its implementation, the agency is in the strategic position to be at the helm in the systematic, rigorous, and impartial assessment of its progress.

Evaluation and the Public Sector Management Cycle

A national evaluation agenda will be crafted to set out the priority evaluations that the government will pursue as a means of measuring and obtaining evidence on results derived from strategies and priority interventions laid out in the plan and the RM. Evaluation will particularly play key roles in (a) informing further articulation of the PDP and implementation of programs; (b) conveying progress achieved against priority areas of investment; and (c) promoting transparency and accountability by making evaluation results accessible to all branches of government, and most importantly, to the public. Toward this end, the government will adopt the following key strategies:

- a) **Undertake scoping studies to identify knowledge gaps and the corresponding evaluation studies to create evidence that will inform** the implementation of priority programs and projects of this administration. These evaluative studies are also intended to inform updating of the current PDP and the formulation of the successor Plan. Agencies should draw on existing evaluation initiatives if available; if not, evaluations may be commissioned.
- b) **Strengthen the collection, analysis, and use of evaluation data to promote evidence-based and data-driven decision-making.** At the outcome level of the PDP, the government will continue to collect data on the situation of the Filipino people through regular surveys and explore the application of new and innovative methods to gather data to be used for evaluation.
- c) **Support the enactment of a National Evaluation Policy to accelerate efforts in institutionalizing evaluation practice in the government.** The National Evaluation Policy comprises necessary instruments for guiding the practice of monitoring and evaluation within national development programs as they provide principles and standards for data collection and management, utilization, and financing, among others.
- d) **Strengthen the capacity of agencies to conduct and utilize evaluations.** To effectively develop capacities, technical knowledge of evaluations at the individual level should be complemented by opportunities for hands-on application. Nevertheless, the government should also aim to establish a structured training program for evaluation that is widely available, along with supplementary learning resources such as handbooks.
- e) **Effectively communicate evaluation findings to increase utilization and influence of evaluations.** Capacity development and the practice of evaluations will be supported by a culture of evidence-based decision-making to ensure its mainstreaming. This entails having an institutionalized evaluation unit to manage and advocate for evaluation activities within each agency of the bureaucracy. This unit will ensure that prioritization and utilization of evaluations are integrated into higher-level processes such as agency planning and project development. Documentation of monitoring and evaluation activities and learning also ensure that new program teams can leverage institutional knowledge built from previous projects.

The NEDA Secretariat will also consult with the PDP Advisory Committee on the assessment of strategies and their effectiveness in achieving the targets and outcomes. The PDP Advisory Committee will be convened during the midterm update preparations, and more frequently if necessary.

Strategy Framework of Philippine Development Plan 2023–2028

Capabilities of individuals and families will be developed to enable them to participate in growth opportunities (Chapter 2).

- **Good health will be promoted (Subchapter 2.1).** Health care strategies will be comprehensive and will focus on building an ecosystem in communities for health care providers, and an environment where individuals can make healthy choices (e.g., nutritious affordable food and health literacy).
- **Opportunities for transformative lifelong learning will be expanded (Subchapter 2.2).** The quality of education at all levels will be improved by expanding access to quality learning resources, enhancing the curriculum, and improving the competencies of teachers. The evaluation protocol for learning outcomes will also be improved by involving third-party institutions to assess students’ proficiency across all levels. TVET programs will be improved to make them more responsive to industry needs. Higher-education institutions will be strengthened to perform a greater role in knowledge co-creation and serve as innovation hubs and incubation centers.
- **Livable communities established for human and social development (Subchapter 2.3).** Communities and human settlements will be planned and upgraded in a way that offers equitable, inclusive, and resilient opportunities for improving human well-being while contributing to the economic vitality of the community. This will be pursued through the promotion of social environment, improvement of environmental quality, and upgrading of the built environment. All of which will be supported by a governance system that is accessible and ensures sustainability of livable communities.

Social protection (SP) systems will be made more efficient with improved targeting and digitalized processes for faster response to the needs of the most vulnerable (Chapter 3).

- **Amidst the possibility of accelerated inflation owing to natural and external shocks, the priority is to ensure food security and proper nutrition, especially among the most vulnerable (Subchapter 3.1).** A sufficient and stable supply of food will be ensured, primarily through improved productivity of agri-food systems, including storage, transport, and logistics. Measures to prevent and address wasting, stunting, and obesity will be implemented through supplementary feeding, nutrition education, and nutrition promotion campaigns.
- **Social protection systems will be strengthened (Subchapter 3.2).** SP programs will be enhanced to reduce the risks faced by Filipinos and mitigate the impact of shocks. Critical to this is the establishment of a universal, modern, and integrated SP system to improve targeting, rationalize interventions, and facilitate the timely delivery of SP services.

Jobseekers and those currently working will have more opportunities to improve their income-earning ability (Chapter 4).

- Contents of training modules and curricula for human capital development will be continuously updated to match the needs of emerging in-demand occupations. The updating will also cover professional standards and licensure examinations.
- Employment facilitation services will be enhanced to include career development support, and an active labor market information system.
- Everyone will have access to opportunities to increase their income-earning abilities by the effective enforcement of anti-discrimination laws. Migrant workers will also have access to these opportunities to facilitate their reintegration back into the domestic economy.

The production sectors will be transformed to provide high-quality, high-skill, and stable employment opportunities for the fast-growing Filipino workforce. The strategies in each sector are categorized into three major groups: (a) expand markets, (b) promote value-adding, and (c) foster inter-sectoral linkages.

Agriculture and agribusiness will be modernized (Chapter 5). Primarily, production efficiency will be improved through farm clustering or consolidation, adoption of improved technology, and access to inputs. More innovation hubs and farm demonstration sites will be established and the Province-led Agriculture and Fisheries Extension System will be strengthened. The blue economy will be developed with the full implementation of the Fisheries Management Act plans, and the upgrading of Technology Outreach Stations, and National Technology Centers, among others.

Opportunities for greater value-adding will be created by expanding business partnerships between primary producers and other entrepreneurs, and by strengthening the capacity of primary producers to process raw materials, understand markets, and ensure that food safety and quality standards are met.

Government will rationalize investments in the sector to promote the interconnectedness of multimodal transport and logistics, particularly for perishable products. Use of mobile platforms and channels will be encouraged for marketing, payment, and product delivery. Institutional capacity to formulate plans, conduct R&D, provide extension services, and undertake monitoring and regulation will be enhanced with the use of modern technology and better information systems.

Industry will be revitalized (Chapter 6). Domestic production and supplier base will be expanded, particularly corresponding to the value chains of the following industry clusters: (a) industrial, manufacturing, and transport (IMT); (b) technology, media, and telecommunication (TMT); (c) health and life sciences (HLS); and (d) modern basic needs (MBN). This entails enhancing business-matching activities and intensifying support through the provision of common service facilities, marketing assistance and even time-bound performance-based incentives. Servicification will be promoted, including the adoption of Industry 4.0, IoT, etc. This will be done through co-locating industry and service enterprises, and including academic institutions, and providing more platforms for collaboration.

Services sector will be reinvigorated (Chapter 7). Demand for services will be expanded by actively promoting the country's tourism, culture, creative sector, and Information Technology-Business Process Management (IT-BPM). Adoption of holiday economics will also be undertaken to boost domestic tourism, promote local products, and encourage inter-cultural exchanges. Streamlining regulations to allow 24/7 operations of transport and logistics operations will also increase demand. Value-adding to diversify "product" offering and improve "consumption" experience will be encouraged by instituting accreditation protocols; improving access to physical and digital infrastructure; and developing technology parks, centers of creative excellence and innovation, creative talent hubs, and improved shared service facilities for MSMEs.

Finally, capacities of institutions providing business advisory services, and of communities and LGUs hosting the investments and events will be continuously upgraded.

Establishing a dynamic innovation ecosystem is at the heart of the transformation agenda of the PDP 2023-2028 (Chapter 8). The innovation ecosystem involves interlinkages between and among social scientists, basic R&D institutions, product engineers, design and marketing specialists, and entrepreneurs who bring the ideas and all these players together.

Over the medium term, government will (a) provide a nurturing environment for basic R&D, and knowledge creation; (b) support market-driven and customer-centered R&D; (c) scale up

technology adoption, utilization, and commercialization; and (d) promote an innovation culture and entrepreneurship. Government will make use of a combination of financial and technical support to academic and skills training institutions, business incubators, and startups. Government will also establish physical and digital platforms to encourage greater collaboration between and among the ecosystem players.

Trade and investments will be promoted to improve the competitiveness of domestic industries, increase demand for Philippine products and generate more jobs (Chapter 9). International trade will continue to be a major strategy to expand markets, diversify sources for the cumulation of raw and intermediate materials, and increase competitiveness. Thus, government will adopt a purposive, assertive, and forward-looking position in negotiating regional trade agreements. Renewed focus will be given to the survival, growth, and expansion of local firms in the export and domestic markets in order to drive productive employment, and increase incomes.

Government will also position the services sector as the foremost supplier of tradeable intermediate services. To this end, support will be provided to training and retraining programs for the sector and facilitate access to the necessary physical and digital infrastructure. Foreign direct investments (FDI), on the other hand, will be harnessed as drivers of export growth, sources of vital technology, and critical enablers of the country’s long-term climate action. Government will launch an international campaign (“Make it Happen in the Philippines”) to raise awareness of the new business climate given the amendments to the FIA, RTLA, PSA, and the CREATE Law. The Inter-agency Investment Promotion Coordination Committee will ensure proper alignment of promotion strategies and various ordinances among national and local governments and investment promotion agencies.

Businesses will be assured of a healthy regulatory environment and a level playing field (Chapter 10). The strategy is to ensure firm and consistent enforcement of the Philippine Competition Act and competition-related issuances. At the same time, regulations will be subjected to regulatory impact assessment (benefits of the regulation to society vs. the cost of compliance, monitoring, and enforcement) to ensure that these are effective in addressing unegative externalities and not simply adding to the cost of doing business in the country.

Macroeconomic stability will be ensured (Chapter 11).

- **The health of the financial sector will be enhanced (Subchapter 11.1).** This will improve the efficiency of the financial sector in its role as intermediary between savers and investors, thereby promoting sustained economic growth. The strategies aim to broaden and deepen financial inclusion, and accelerate financial innovation, while ensuring financial sector health. On financial inclusion, the strategies include promoting financial literacy and facilitating access to financial services and instruments. On financial innovation, government institutions will adopt a “regulatory sandbox” approach for new innovations, promote RegTech, and address information gaps to encourage innovations. To ensure financial health, government institutions will intensify consumer protection, and undertake macro- and micro-prudential measures.
- **Sound fiscal management, including a conducive tax regime, will be fostered (Subchapter 11.2).** These are necessary conditions to foster investor confidence in the economy and ensure macroeconomic stability. As it stands, a medium-term fiscal framework has been proposed and approved by President Marcos, Jr.; and endorsed by Congress. This is an initial step in assuring markets of the government’s resolve to exercise fiscal discipline in spending, fiscal programming and debt management.

Individuals, businesses, and civil society will enjoy better connectivity (Chapter 12).

Investments in the appropriate infrastructure can help reduce the cost of electricity, ensure water security, and lower the cost of logistics. Such investments will improve access to people, goods and services and information, and promote growth that is more inclusive. Given the limits to government resources and capabilities, PPPs will be further encouraged. Infrastructure sectoral master plans and road maps will be prepared to provide a more comprehensive understanding of the infrastructure gaps and needs, and thus serve as a sound basis for identifying priority infrastructure programs, activities, and projects, including those that may be best pursued through PPP modalities.

Filipinos and residents of the Philippines will enjoy peace and security and an efficient justice system (Chapter 13).

- **Lasting peace and security enable a stable environment for a strong and vibrant economy (Subchapter 13.1).**
- **At the same time, an efficient justice system characterized by integrity, fairness, accessibility, and a proper regard for the rule of law is necessary for fostering a high-trust society and a favorable business climate (Chapter 13.2).**

Private sector and civil society will observe marked improvements in bureaucratic efficiency and the practice of good governance (Chapter 14).

Good governance entails bolstering public accountability and integrity and deepening participatory governance that ensures that marginalized sectors (e.g., women, children, indigenous peoples, persons with disabilities

and in Geographically Isolated and Disadvantaged Areas [GIDA]) have concrete roles and significant influence in all stages of public decision-making.

Given the tight fiscal space, the government must pursue bureaucratic efficiency to maximize the benefits from public spending. Doing so involves rightsizing and a whole-of-government approach in reengineering systems and procedures; accelerating digital transformation in government; and raising the productivity performance of agencies, as well as the competencies of public servants.

Finally, the Plan recognizes the need for collective action to mitigate the climate crisis and strengthen our resilience to disasters (Chapter 15). The priority is to enhance the adaptive capacity of communities and ecosystems that are most vulnerable to natural hazards and climate change. This will be supported by an improved knowledge and data ecosystem, and good governance.

We commit to the following target outcomes over the medium term...

Over the next six years, the development agenda of the Philippines will be guided by the headline targets that prioritize poverty reduction and inclusive growth. While navigating external headwinds, the country will rebuild the losses from the pandemic and invest in improving areas where deep weaknesses were apparent in the pandemic response, for example: in health and responsiveness of social protection; and in mainstreaming resilience throughout the bureaucracy (e.g., local governments, finance, education, disaster risk reduction, and energy security) and communities. This development agenda aims to get the Philippines back on track toward achieving upper middle-income country status by 2025.

Maintain high levels of economic growth in the medium term, rising from 6.0 to 7.0 percent in 2023 to 6.5 to 8 percent from 2024 to 2028. Sustained high levels of growth is a necessary condition for meeting the AmBisyon Natin 2040.

Transform the production sectors toward generating more and better-quality jobs and enabling the competitiveness of enterprises in domestic and international markets. The Philippines aims to continue its progress among the innovation achievers of the region by rising in rank in the Global Innovation Index (GII) from a baseline of being 59th out of 132 countries in 2022. Similarly, the country will be ranked among the top 33 percent in the Global Competitiveness Index by 2028.

Create more and better-quality jobs. Although unemployment is nearing pre-pandemic levels in 2022 at 5.7 percent, there is much room to improve the quality, productivity, and stability of employment. By 2028, the target unemployment rate is within 4.0 to 5.0 percent, and the percentage of wage and salary workers in private establishments to total employed is within 53 to 55 percent.

Reduce poverty incidence to 9 percent by 2028. This is expected to result from sustained economic growth that generates more and better-quality jobs and is supported by an efficient SP system.

Keep food and overall prices low and stable. Food and overall inflation will be kept within 2.0 to 4.0 percent. This will then reduce subsistence incidence to 2.5 to 3.5 percent.

Ensure fiscal discipline. National government deficit to GDP ratio will be gradually brought down from 6.5 percent during the first half of 2022 to 3.0 percent in 2028. Outstanding government debt to GDP ratio will also be gradually reduced from 63.7 percent in September 2022 to 51.1 percent by end-2028.

Table 1.1 Table of Headline Indicators

INDICATOR	BASELINE (YEAR)	ANNUAL TARGETS						MEANS OF VERIFICATION
		2023	2024	2025	2026	2027	2028	
Gross domestic product (GDP) increased (growth rate, %)	5.7 [2021] 7.7 [Q1-Q3 2022]	6.0-7.0	6.5-8.0	6.5-8.0	6.5-8.0	6.5-8.0	6.5-8.0	National Accounts of the Philippines (NAP); Philippine Statistics Authority (PSA)
Global Innovation Index improved (GII) rank (Chapter 8)	59 th out of 132 [2022]	57 th	54 th	52 nd	49 th	46 th	43 rd	GI Report
Global Competitiveness Index (GCI) rank and score improved (Chapter 8)	Top 45% Score: 61.9 [2019]	Top 43% Score: 62.1	Top 41% Score: 62.7	Top 39% Score: 62.9	Top 37% Score: 64.3	Top 35% Score: 64.9	Top 33% Score: 65.1	World Economic Forum Global Competitiveness Report
Unemployment rate decreased (%)	5.4 [Ave. Jan, Apr, Jul, Oct 2022]	5.3-6.4	4.4-4.7	4.8-5.1	4.0-5.0	4.0-5.0	4.0-5.0	Labor Force Survey (LFS), PSA
Percentage of wage and salary workers in private establishments to total employed increased (%)	49.6 [Ave. Jan, Apr, Jul, Oct 2022]	50.3-50.7	50.9-51.5	51.4-52.4	51.9-53.3	52.5-54.1	53.0-55.0	LFS, PSA
Gross national income per capita increased	USD3,640 [2021]	USD4,130- USD4,203	USD4,454- USD4,592	USD4,814- USD4,920	USD5,256- USD5,563	USD5,645- USD6,056	USD6,044- USD6,571	World Bank, International Monetary Fund
Poverty incidence reduced (% of population)	18.1 [2021]	16.0-16.4	*	12.9-15.2	*	10.0-10.5	8.8-9.0	Family Income and Expenditure Survey (FIES), PSA
Food inflation rate kept stable (%)	5.7 [Jan-Nov 2022]	2.5-4.5	2.0-4.0	2.0-4.0	2.0-4.0	2.0-4.0	2.0-4.0	PSA
Headline inflation rate kept stable (%)	5.6 [Jan-Nov 2022]	2.5-4.5	2.0-4.0	2.0-4.0	2.0-4.0	2.0-4.0	2.0-4.0	PSA
National Government (NG) deficit to GDP ratio declined (%) (Subchapter 11.2)	6.5 [Q1-Q3 2022]	6.1	5.1	4.1	3.5	3.2	3.0	Bureau of Treasury (BTr)
Outstanding NG debt stock to GDP ratio reduced (%) (Chapter 11.2)	63.7 [Sept 2022]	60-62	57-61	56-59	54-58	50-55	48-53	BTr

...by adopting a whole-of-society approach.

The transformation objectives for each part of the PDP, set against a backdrop of the urgency for post-pandemic recovery, will require strong collective action. The high-level framework laid out in this chapter situates each sectoral strategy and is further covered in greater depth in the succeeding chapters in this PDP. The strategies integrate the transformation agenda that are needed for a prosperous, inclusive, and resilient society.

Through coordinated action involving a whole-of-government and whole-of-society approach, the country can regain its footing from the impacts of the pandemic, maintain stability in the face of persistent external headwinds, and ease the path of Filipinos toward progress.

Through partnerships and collaborations among the public sector, private industry, civil society, and all communities working toward the common goal of bringing a comfortable and stable life to all Filipinos, the targets of AmBisyon Natin 2040 remain within reach.

This document is organized into five parts. Part I introduces the objectives, context, and overall strategy of PDP 2023–2028. Part II covers the strategies for developing the potential of Filipinos through sustained human and social investments while simultaneously providing social safety nets to mitigate the impact of risks. Part III discusses ways that seek to transform sectors in agriculture, industry, and services through market expansion, value addition, and inter-sectoral linkages. The cross-cutting strategies of promoting trade and investment, innovation, and healthy competition and regulatory quality are also covered. Part IV discusses strategies that will create an enabling environment through good governance and bureaucratic efficiency; ensuring sound macroeconomic fundamentals; infrastructure development; peace, security, and justice; and climate action. Finally, Part V reviews the implementation and monitoring of the Plan over the next six years.

Each chapter/subchapter is organized into four sections. The first section, Assessment and Challenges, discusses the most recent data showing progress in the sector, followed by the constraints or weaknesses faced by stakeholders in the sector. The second section illustrates the Strategy Framework, which then frames the discussion of the Strategies in the third section. The chapter/subchapter ends with the priority Legislative Agenda that the Executive Branch, in consultation with various stakeholders, consider as critical in unlocking the constraints faced by the sector.

Research and Development Direction and Focus

The 2024–2028 Research Targets aligned with the University Development Plan toward becoming a leading research-driven national polytechnic university. The research development direction focuses on strengthening the university’s culture of innovation, productivity, and international research competitiveness.

The university aims to increase the number of Scopus/WoS-indexed publications, externally funded researches, patented outputs, copyrighted works, and technology-based innovations. It also highlights the importance of expanding faculty and student participation in research presentations, publications, and creative works.

The upward arrows in the figure symbolize the university’s continuous growth and progress in research productivity, while the targets emphasize quality, visibility, and societal impact. Overall, the university’s research focus is directed toward:

- Enhancing research quality and international recognition
- Encouraging innovation, patents, and commercialization
- Increasing research collaboration and external funding
- Promoting student and faculty research engagement

Producing outputs that contribute to community development and national progress

These strategic targets serve as measurable indicators to ensure that research activities support academic excellence, technological advancement, and sustainable development.

Research Roadmap 2024 – 2028

PUP R&D Sector Organizational Structure

The R&D Sector of the University is mandated to the following functions: (1) Provide leadership in strategic planning in research and extension; (2) Assist the University in the generation of the resources needed to support its research and extension program planning and implementation with the college deans and campus directors; (4) establish strong linkages with other agencies to promote the search and extension programs of the University; and (5) Plan and implement a human resource development program for research and extension.

To fully realize its mandate, the R&D Sector was structured and composed of the following Offices, Institutes, and Centers (as approved by the Board of Regents).

Services

1. Externally Funded Research Monitoring
2. Internally Funded Research Monitoring
3. International Paper Presentation Financial Assistance
4. National Paper Presentation Financial Assistance
5. University Publication Assistance
6. Publication Incentive
7. Citation Incentive
8. Dissertation Financial Assistance
9. Thesis and Dissertation Financial Grant
10. Merit Promotion based on Publication and Citation
11. Ethics Clearance Certification
12. Research Linkages

RMO Regular Capacity Building Programs / Projects

1. International Research Conference On Higher Education
2. Project Nips (National And International Presentation For Students)
3. Project Recite (Research Citations through Institutional Trainings and Engagement)
4. Pathways To International Refereed Journal Publication
 - a. Science, Technology, Engineering, and Mathematics
 - b. Computer Science, Information System, and Technology
 - c. Education
 - d. Business
 - e. Humanities, Social Sciences, and Communication

- 5. Project Brief (Building Research for Internal and External Funding) Training-Workshop on Writing Research Proposals for Grant-in-Aid)
- 6. Gawad Tuklas: Outstanding Researcher Award
- 7. Gawad Lathala: International Publication Excellence Award

Office of the Vice President for Research, Extension, Planning, Development

Research Officials	Educational Qualification	Designation	Functions
DR. ANNA RUBY P. GAPASIN 	Doctor in Educational Management	Vice President for Research, Extension and Development	a. Assists the University President in the direction, supervision and management of all matters pertaining to research, extension and development policies b. Coordinates the work of all to research, extension and development departments for harmonious functioning c. May represent the University President in Official and/or social functions d. Recommends and implements policies related to research, extension, and development and e. Performs such other duties that the University President may assign from time to time f. Recommends policies relative to research planning and program/project development. g. Recommends plans, programs and projects h. Implements policies on Research and development programs of the University i. Oversees the operation of the Research Sector of the university j. Submits regular reports to management

ANGELINA E. BORICAN, DEM 	Doctor in Educational Management	Assistant to the Vice President for Research, Extension and Development	a. Assists the Vice President for Research, Extension and Development in the direction, supervision and management of all matters pertaining to research, extension and development policies b. Coordinates the work of all to research, May represent the Vice-President for Research, Extension and Development in official and/or social functions c. Recommends plans, programs and projects d. Implements policies on research planning and development programs of the University e. Oversees the operation of Research, Extension and Development f. Submits regular reports to management and g. Performs such other duties that the Vice President for Research, Extension, Planning and Development may assign from time to time
Rolan J. Malvar, DSc 	Doctor of Sciences	Director, Extension Management Office	a. actively participate in the pursuit of social and community development to contribute to the empowerment of its beneficiaries, partner barangays and government and private organizations in collaboration with its partner colleges, branches, and campuses through relevant and responsive extension programs designed to address their needs

Jackie D. Urrutia, PhD

Director,
Research
Managem
ent
Office

- a. Coordinates the work of all to research, extension and development departments for harmonious functioning
- b. Recommends policies relative to research and program/project development.
- c. Implements policies on research planning and development programs of the University
- d. Submits regular reports to management and
- b. Performs such other duties that the Vice President for Research, Extension, Planning and Development may assign from time to time

EMEJIDIO C. GEPILA,
JR. MATELA

Master of
Arts in
Teaching,
English
Language
Arts

Director,
Research
Publicatio
ns Office

- a. Produces and distributes all University publications, students' newspapers, faculty journals, and newsletter for administrative personnel including informative archival and motivational materials in the form of magazines, brochures, posters, etc., and
- b. Implements other publication projects of the University.

Ginno L. Andres, D.Eng. Engineer		Director, Intellectual Property Management Office	 a. Provide assistance to researchers to secure attractive returns in the long term from the bulk of valuable research outcomes and intellectual property. b. Assist researchers in identifying partners within the academe, other businesses and investors to promote translation of research innovations into new products through advice and support for early-stage research and development. c. The IPMO provides a portfolio of new technologies created through University research for licensing or collaborative development.
MELCAH P. MONSURA, PHD Doctor of Philosophy		Director, Research Institute for Human and Social Development	 a. Assumes a leading role in the local development of the various disciplines comprising the social sciences b. Recommends research works in the areas of social sciences, human rights, political and socioeconomic issues, and other related disciplines b. Monitors the operations of the various Centers under the Institute c. Undertakes research studies on Human Rights, Labor, and Gender Development d. Invites foreign scholars/lecturers/researchers who will work in partnership with the Institute to provide talks and discourse on the discipline e. Represents the University in seminars and forum related to the discipline f. Publishes books and journals and contemporary literary pieces to add to the knowledge on the Human and Social Development

			g. Creates local and international network in the academe, public and private sectors, and civil society groups.
Joseph Reylan B. Viray, PhD	PhD in Philippine Studies	Director, Institute for Culture and Language Studies	a. Exercise overall supervision of the 4 Centers (CSH, CCW, CLLS, CPH) Conducts researches and plans faculty development programs b. Supervises curriculum development in the institute
			
Armin S. Coronado, PhD	PhD in Microbiology	Director, Institute for Science and Technology Research	a. Promotes science and technology (S&T) b. Integrates holistic programs to implement various strategies science and technology research c. Pursuing researches in the field of life science and physical science, mathematics engineering, computer science and information technology as well as nutrition and food technology
			
JEROME P. PERMEJO,MA		Director, Gender and Development Office	a. Promote and uphold human rights in advocating gender sensitivity and responsiveness in the academe, research, and extension sector, including mainstreaming gender and development in the policies, programs, and processes of the University, its branches, and campuses for the general welfare of the organization and its clients.
			

Orlando D. Tubola, MSECE	Master of Science in Electrical and Computer Engineering	Director, Research Institute for Strategic Foresight and Innovation	a. Conduct, support, facilitate, and promote interdisciplinary research that addresses pressing societal problems b. through its Center for Future Research. c. Support, facilitate, incubate, and promote interdisciplinary innovation through the Center for Future Innovation. d. Conduct and facilitate future thinking and innovation workshops, trainings and courses through the Center for Future Training.
-----------------------------	---	--	--

PUP Sto. Tomas Campus Research Unit Profile and Functions

Research Personnel	Educational Qualification	Designation	Functions
DR. ARMANDO A. TORRES	Doctor in Educational Management	Campus Director	a. Approves and recommends and implements policies related to research which are aligned with the University Research Agenda; b. Assists in the implementation of policies of research development programs of the campus a. Prioritizes research programs that have significant impact and contribution of the campus attainment of a globally competitive education, improvement of the quality of life and social development.

ENGR. LIZA MARIE B. NUEVO 	Doctor in Engineering Management (Thesis Writing)	HEAD, ACADEMIC PROGRAMS	a. In charge of the academic programs and monitor the target research outputs of the campus; b. Coordinates the work of all research program units; oversees the operation of the different program units. c. Provides assistance to the director in the implementation of policies on research and development programs of the campus d. Monitors the implementation of the approved internally and externally funded research projects based on the approved guidelines of the University
ASSOC. PROF. ABEGAIL A. MALABUYOC 	Doctor of Educational Management (On going) Master of Arts in Education major in Educational Management Master in Information Technology	Research and Extension Coordinator	a. Prepare/Initiate research proposals and research-related projects; b. Manage and monitor implementation of the approved college research project; c. Prepare and provide the data needed by the IPO and other centers/offices under the OVPRED (all data requirements shall be coursed through the RMO) d. Prepare and submit quarterly report on the research-related accomplishments of the colleges/branches/clusters; e. Organize/co-organize research colloquium, symposia, workshops, trainings for the college/branch/cluster in coordination with the research institute/centers; and f. Perform other related functions as maybe assigned by the VPRED through the RMO Director

Institutional Research Agenda

The University adopts a clear, practical, and realizable University Research Agenda that is meant to (1) be aligned with the strategic plan of the University; (2) unify the direction and framework of the research activities of the University; (3) align the research efforts of the University with the thrust and priorities of the National government agencies e.g. Department of Science and Technology (DOST), National Economic and Development Authority (NEDA), Commission on Higher Education (CHED), among others; and (4) generate researches, scientific innovations, speculative and theoretical paradigms which are expected to propel economic, scientific, social, cultural and technological development. The University Research Agenda is categorized into five general themes, to wit: (1) peace, security and poverty reduction; (2) accelerating infrastructure development through science and technology; (3) competitive industry and entrepreneurship; (4) social and cultural development; and (5) conservation, protection and rehabilitation of the environment towards sustainable development.²

Agenda 1: Poverty Reduction, Peace and Security

This research theme addresses three important national and global issues that mankind is squarely faced: poverty, peace and security. The University is in the belief that these issues are interrelated—solving one means solving others.

A. Poverty Reduction Studies

The University works with the paradigm that the poverty issue is multidimensional and is driven by multifarious causes. Poverty studies therefore should cover the many facets of the causes and effects of poverty as well as the ways of addressing them. They should also be linked with peace and security concerns of localities, regions and countries.

The studies should reveal the relationships of poverty to security, human rights, governance, lack of education, and limited access to social services for according to Kofi Annan, development cannot be enjoyed without security and security cannot be enjoyed without development. Roles and models on local resource and local actors mobilization, increasing productivity and creativity, community-driven development, and development partnerships between public and private sector should likewise be included among the focus of poverty studies.

The following research topics are herein identified for poverty reduction according to different dimensions:

(1) Economic Dimension

- a. Agrarian reform and industrialization
- b. Agri-business
- c. National and local economic policies
- d. Growth and equity
- e. Local/community and distributive economics
- f. SMEs, cooperatives and social enterprise
- g. Food sufficiency and productivity
- h. Corporate social responsibility
- i. Supply chain management
- j. Micro-finance/micro lending strategies
- k. Employment and industrial relations
- l. Other related topics

(2) Social, Political and Cultural Dimension

- a. Knowledge and Belief systems
- b. Social Welfare
- c. Local Government Studies
- d. Public-private partnership
- e. Public personnel management and development
- f. Human development and social protection
- g. Quality of Life
- h. Good governance
- i. Public health concerns
- j. Informal settlers
- k. Other related topics

(3) Educational Dimension

- a. Educational technology and innovation
- b. Student support services
- c. Professional development and faculty support
- d. Quality assurance
- e. Curriculum development
- f. Institutional development
- g. Educational Policies and legislation
- h. Outcome-based education

- i. Transformative education
- j. Teacher and student achievements
- k. Home-School-Community collaboration
- l. Academe-industry linkages
- m. Alternative learning system
- n. Graduate tracer studies
- o. Distance education/learning
- p. Transnational education (ASEAN integration)
- q. Other related topics

B. Peace and Security Studies

Peace and security studies and researches are expected (1) to understand the causes of armed conflicts, religious disagreements, cultural clashes, war, terrorism, genocide, human rights violations and others; (2) to develop ways and devises to prevent and resolve identified peace and security problems; and ultimately (3) to build peaceful and just communities, systems, and societies. Obviously, these types of studies require interdisciplinary approaches and expertise. Henceforth, researches with the following topics could meet the above expectations:

(1) Understand the causes of armed conflicts, religious disagreements, cultural clashes, war, terrorism, genocide, human rights violations and others with focus or emphasis on:

- a. Democratization,
- b. Ethnographic and ethnicity studies,
- c. Human growth and development,
- d. International relations and trans-border issues,
- e. Internationalization,
- f. Knowledge and Belief systems,
- g. Macroeconomics and globalization issues,
- h. Migration,
- i. National and human security,
- j. Policy studies;
- k. Political dynamics,
- l. Religion and Philosophy,
- m. Social Issues,
- n. Social Movements,
- o. World politics, and
- p. Other related topics.

(2) Develop ways to prevent and address identified peace and security problems, through conduct of studies on:

- a. Organizational and development communication,
- b. Cross-cultural communication,
- c. Peace and conflict resolution,
- d. Psycho-trauma and crisis intervention,
- e. Translation studies,
- f. Ethno-linguistics,
- g. Behavioral and psychosocial researches, and
- h. Other related topics.

Agenda 2: Accelerating Infrastructure Development through Science and Technology

Consistent with the National Government's thrust, the University is determined to effect significant economic growth, human development and social protection through acceleration of infrastructure development. Undoubtedly, infrastructure development is one of the major priorities of the national government as it is clearly and concretely outlined in the recent National Economic and Development Authority agenda. The University, in support to the government's efforts, provides the country with research-based studies, scientific and engineering innovations that will enable both the government and private sectors to hasten infrastructure development which can be both hard and soft infrastructure. The "hard" infrastructure refers to the large physical networks necessary for the functioning of a modern industrial nation, whereas "soft" infrastructure refers to all the institutions or systems which are required to maintain the economic, health, and cultural and social standards of a country.

The University identified the following areas and topics to concentrate on which are categorized as one, Hard Infrastructures which are meant to support the drivers of economic growth such as tourism, agriculture and industry; and two, Soft Infrastructures which are meant to provide the necessary services for human development and social protection such as education, health, among others:

A. Hard Infrastructures

- a. Urban and Rural Housing
- b. Structural Engineering
- c. Energy-related Infrastructure and facilities (e.g. power sources, upgrade of existing power plants, etc.)
- d. Transportation technology
- e. Flood Control and Management
- f. Irrigation Systems
- g. Resettlement Frameworks
- h. Water Supply and Treatment Facilities
- i. Urban gardening
- j. Mechatronics
- k. Other related topics

B. Soft Infrastructures

- a. E-governance
- b. Software development and applications
- c. Management Information Systems/Reporting Systems
- d. Internet and Web applications development
- e. Data engineering and Ubiquitous computing
- f. Knowledge management
- g. Mobile computing systems
- h. Network security and issues
- i. Bioinformatics
- j. Natural products
- k. Computational and Theoretical Science
- l. Mathematical and Statistical Modelling
- m. Simulation
- n. Pure and Applied Mathematics Research
- o. Material Science Research
- p. Instrumentation Research
- q. Other related topics

Agenda 3: Competitive Industry and Entrepreneurship

The University recognizes the country's need to strengthen the competitiveness of its industries particularly those which are driving the nation forward in terms of economic growth such as tourism, agriculture, skilled manpower in ICT and language proficiency, retail, exports, investments and banking.

Furthermore, PUP is one with the National Government in its objective of assuring rapid and sustained growth for the country. In view of this, the University, with its various academic and research arms, identifies important research topics and areas which can be explored to reveal important trends, issues and challenges confronting these industries; and to discover devices and ways to address these challenges. The following research topics are hereunder identified: Another related facet of this research theme is entrepreneurship. Along this line, the University has identified the following research topics and areas:

- a. Business processing and outsourcing
- b. Market for Agriculture Industry
- c. Cooperative management
- d. Resource Management
- e. Quality Management
- f. Small and Medium Enterprises (SMEs)
- g. Industry needs analysis
- h. Human resource management practices and issues
- i. Work values
- j. Micro and macro economics
- k. Investments and banking systems and operations
- l. E-commerce
- m. Management and organization
- n. National and Local Economic Policy research (NEDA, LGU projects, DTI)
- o. Livelihood and Business Development
- p. Product Development and Innovation
- q. Incubation and commercialization
- r. Other related topics

Agenda 4: Social and Cultural Development

Culture and society are linked to each other. Generally, culture is an important element of social development. The University, with its strong Academic/ Research Centers and Institutes pertaining to cultural and social studies, is bent to support the National Government in the (1) creation of intellectual potential; (2) building of human capital; (3) popularization of culture, arts and heritage; (4) forging social integration; (5) promotion of national identity through local and national historiography; (6) prevention of social pathologies; (7) initiation and establishment of cooperation; (8) advancement and promotion of national solidarity and patrimony; and (9) reduction of disproportions of personal development of citizens as a form of social advancement.

The following research topics are identified in order to direct the University research activities along the line of cultural and social development:

- a. Communication and Society
- b. Heritage Studies/ Intangible cultural heritage/Heritage preservation
- c. Historiography
- d. Philosophical Studies
- e. Popular culture
- f. Sociological Studies
- g. Literature, Performing Arts, Visual Arts, Folk Arts
- h. Filipino worldview
- i. Filipino culture
- j. Media Laws and Ethics
- k. Media literacy
- l. Information campaign and evaluation, advertising/public relations principles and case studies
- m. Human growth and development studies
- n. Organizational behavior, multiple intelligences, giftedness and learning disabilities
- o. Psychology and society
- p. Other related topics

Agenda 5: Environmental Conservation, Protection and Rehabilitation towards Sustainable Development

Conservation, protection and rehabilitation of the environment is a significant factor in the maintenance of community's sustainability. It includes the sustainable use and management of the natural resources such as water, natural energy, air, wildlife and minerals. The University recognizes this as a very important element of national development.

The following research areas and topics have been identified to generate knowledge to supplement the existing body of works regarding the management, care, use and exploitation of the natural resources:

- a. Biodiversity
- b. Climate Change mitigation and adaptation
- c. Disaster management, preparedness and monitoring
- d. Energy Conservation
- e. Environmental conservation, preservation, protection and stewardship
- f. Global warming
- g. Urban ecology
- h. Other related topics

**Adequate and Relevant
Projects/Activities to Achieve
Objectives
Research**

The Planning Process

Using a roadmap concept, it demonstrates the university’s step-by-step direction toward becoming a research-driven institution through continuous improvement and achievement of measurable research targets.

Each year represents a phase of development where the institution strengthens its research culture by increasing research publications, externally funded studies, patents, copyrighted outputs, creative works, and community-based innovations. The roadmap also emphasizes faculty and student participation in research presentations, international publications, and collaborative engagements.

The curved road symbolizes the continuous journey of growth, monitoring, and evaluation of research performance, while the milestones indicate the university’s commitment to sustainability, innovation, and quality assurance. Overall, the image reflects a strategic and systematic plan to ensure that research initiatives contribute to academic excellence and institutional development.

Research Presentation Conferences

The University is encouraged to present and disseminate their research outputs in national or international professional conferences. Research presentations may be done in the form of oral (either virtually or in person) or poster presentation in the following venue: 2.1 University-wide, National, or International conferences organized by the University through the Office of the President for Research, Extension, Planning and Development; 2.2 Research Forum organized in the college level; 2.3 Research colloquium organized by student organizations; and 2.4 National or International research fora of the scientific and professional organizations. These conferences are intended to encourage healthy discussions among researchers, exchange of new ideas and research findings establish linkages between research institutions and attract future researchers.

Publication and Citation Incentives

(EXECUTIVE ORDER No. 22, Series of 2024 REVISED POLICY ON IMPLEMENTING GUIDELINES ON UNIVERSITY PUBLICATION ASSISTANCE (UPA) AND PUBLICATION AND CITATION INCENTIVES) The Polytechnic University of the Philippines aims to enhance its research culture in a highly competitive world of knowledge production. As part of the global academic community, it intends to increase research works for broader dissemination and utilization. To achieve this, the University adopts the following new set of policies on incentives for publication and citation.

Any of the following persons may apply for university publication assistance, publication, and citation incentives:

- 1.1 regular faculty member with permanent or temporary status of the University regardless of rank;
- 1.2 permanent administrative employee of the University;
- 1.3 faculty member with a permanent or temporary status/permanent administrative employee of the University in collaboration with a researcher from other universities and/or external agencies;
- 1.4 faculty member with permanent or temporary status/permanent administrative employee of the University in collaboration with student researchers from the University;
- 1.5 retired faculty and administrative employees who once held a permanent position during the paper/article was published and when he/she was cited.

AMOUNT OF ASSISTANCE AND INCENTIVES

For UPA, the publication assistance shall be not more than Fifty Thousand (₱50,000) pesos for Web of Science – Core Collections and Scopus-Indexed Journals (Q1 to Q4) in a year. In the case the faculty was able to publish two (2) or more articles in journals in Q1 and/or Q2, the faculty can request for another support can be up to the maximum of ₱50,000.00 per year.

For each publication, the applicant shall receive the following incentives:

Type of Publication	Incentive
Scopus-Indexed Journal (Q1)	₱75,000.00
Scopus-Indexed Journal (Q2)	₱60,000.00
Scopus-Indexed Journal (Q3/Q4)	₱50,000.00
Book (Scopus/WoS-Core Collections Indexed Journal)	₱30,000.00
Web of Science (WoS) Core Collection/s	₱40,000.00
Conference Proceedings (Scopus/WoS-Core Collections Indexed Journal)	₱30,000.00
PUP Institutionalized Journal	₱15,000.00
Book Chapter (Scopus/WoS-Core Collections Indexed Journal)	₱10,000.00
Systematic Literature Review (Scopus/WoS-Core Collections Indexed Journal, regardless of quartile rank or conference proceedings)	₱20,000.00
Funded Research (University/External Agency Funded) – Scopus/WoS-Core Collections Indexed Journal	₱60,000.00

For each citation, the applicant shall receive the following incentives. Each paper/article is entitled to receive not more than ten (10) citation incentives.

Type of Citation	Incentive per Citation
Scopus-Indexed Journal (Q1)	₱5,000.00
Scopus-Indexed Journal (Q2)	₱4,000.00
Scopus-Indexed Journal (Q3–Q4) / Web of Science (Core Collections)	₱3,000.00
Conference Proceedings (Scopus-Indexed Journal / Web of Science Core Collections)	₱2,000.00
PUP Institutionalized / University Journal	₱1,000.00

REAP3 (Research Activities: Production, Presentation, and Publication/Patent)

EXECUTIVE ORDER: No. 26, Series of 2020
SUBJECT: GUIDELINES ON ReAP3 (RESEARCH ACTIVITIES: PRODUCTION, PRESENTATION, AND PUBLICATION/PATENT) FOR REGULAR FACULTY MEMBERS
DATE: December 29, 2020

Article 1: Purpose

Pursuant to national and institutional guidelines such as the National Budget Circular (NBC) 461; Civil Service Memorandum Circular (MC) No. 19, series of 2005; Manual on Position Classification and Compensation for Faculty Positions in State Universities and Colleges; Department of Budget and Management (DBM) and Commission on Higher Education (CHED) Joint Circular (JC) No. 1-A, series of 2003; PASUC Advisory No. 52, series of 2019; and Office of the President (OP) Memorandum Order No. 020, series of 2016; this order is being issued to prescribe the guidelines on research production, presentation, and publication/patent for regular faculty members. Further, this intends to sustain the significant achievements of the past PUP administrations in strengthening the research culture in the University and to meet the quality standards for a higher education institution set by CHED and other national and international regulating and accrediting institution. The burgeoning research potentials of faculty members, compliance with institutional, national, and international Guidelines and standards will lead to a stronger and internationally-recognized Polytechnic University of the Philippines.

Article 2: Coverage

This order shall apply to all regular faculty members in any academic program level of all academic units of the University.

Article 3: Guidelines

Section 1. Definition of Terms

- 1.1 “Research Activities” refers to research production, presentation and publication.
- 1.2 “Research Production” refers to knowledge, discovery, or invention made through scientific processes.
- 1.3 “Research Presentation” refers to the dissemination of research results through oral presentation in a conference, forum, or colloquium conducted either as “in-person” activity or virtually using audio-video technology.
- 1.4 “Research Publication” refers to dissemination of research results through various international/national/local refereed journals with established reputation and/or indexed in various scientific databases like Scopus, Web of Science (WoS), Excellence in Research for Australia (ERA), ASEAN Citation Index (ACI), and PASUC-Recognized.
- 1.5 “Patent” refers to a government authority or license conferring a right or title for a set period, especially the sole right to exclude others from making, using, or selling an invention.
- 1.6 “Research Collaboration” refers to the combined efforts of regular faculty members during the conduct, presentation, and publication of research work.
- 1.7 “Refereed Journal” refers to publication material that contains articles that have been through a peer-review process
- 1.8 “Scopus” refers to a huge multidisciplinary database with citations and abstracts from peer-reviewed journal literature, trade journals, books, patent records, and conference publications. It provides tools for tracking, analyzing, and visualizing search results.
- 1.9 “WoS” refers to Web of Science. It is a collection of citation indexes representing the citation connections between scholarly research articles found in the most globally significant journals, books, and proceedings in the sciences, social sciences and art & humanities.
- 1.10 “ERA” refers to Excellence in Research for Australia. It is a national assessment exercise managed by the Australian Research Council (ARC), which aims to identify and promote excellence across the full spectrum of research activities occurring within Australia's higher education institutions

- 1.11 “ACI” refers to ASEAN Citation Index. It is the central regional database designed and set up to index all bibliographic records and citations of all quality ASEAN research outputs published in ASEAN scholarly journals. Member countries of the ACI are Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, the Philippines, Singapore, Thailand, and Vietnam.
- 1.12 “Regular Faculty Members” refers to a faculty member with plantilla item positions and with no administrative designation. As used in this Guidelines, it is limited to those whose ranks are at least associate professor in any academic program of the University.
- 1.13 “Faculty Designee” refers to a regular faculty member with administrative designation. As used in this Guidelines, it is limited to those whose ranks are at least associate professor in any academic program of the University.
- 1.14 “Research and Development Cycle (R&D Cycle)” refers to a period of two (2) calendar years within which a regular faculty member or a faculty designee must submit evidence of participation in all research activities.
- 1.15 “Corresponding Author” refers to the individual who, when working on a research work with multiple authors, takes primary responsibility to coordinate with the research journal where they intend to publish. S/he may or may not be the lead author.

Section 2. General Provisions

- 2.1 Each regular faculty member shall participate and complete all research activities every R&D Cycle.
- 2.2 Research activities may be (a) a sole or a collaborative effort; (b) funded by self, the University, or an external agency; and (c) community-based action research, basic research, or applied research.
- 2.3 For collaborative research publication, a research article from a thesis or dissertation is allowed provided that a notarized co-authorship agreement with the student researcher/s is entered into stipulating that the regular faculty member is the corresponding author.
- 2.4 For each research work leading to invention, a utility model, industrial design or patent must be applied at the Intellectual Property Management Office.
- 2.5 For every internal or external research collaboration, all regular faculty members must observe the prescribed minimum role/involvement and the University Guidelines on Research Ethics. In case that the research work is not completed within the allowable period of one (1) year for internally-funded research and three

(3) years for externally-funded research, the researcher/s may extend the project subject to the approval of the University or the funding agency. With the approved extension, the researcher/s is/are still considered compliant with the R&D cycle. Otherwise, the research collaboration is considered terminated.

2.6 Researcher must mention in all their research works the name of the University as author/s’ affiliation.

Section 3. Responsibilities

1.6 Regular Faculty Member

1.6.1 Research Production

- 1.6.1.1 A regular faculty member whose rank is Associate Professor must participate in a research work, at least, as an assistant team leader or co-lead researcher in every R&D Cycle
- 1.6.1.2 A regular faculty member whose rank is Full/College/University Professor must, lead a research work or conduct a research work as a sole researcher in every R&D Cycle.

Academic Rank	Minimum Role/Involvement
Associate Professor	Asst. Team Leader/Co-Lead Researcher
Full/College/University Professor	Team Leader/Lead Researcher/Independent Researcher

1.6.2 Research Paper Presentation

- 1.6.2.1 A regular faculty member whose rank is Associate Professor must present research results in any national or international research conference every R&D Cycle. In the case of collaboration, one (1) research presentation shall be credited to the entire team.
- 1.6.2.2 A regular faculty member whose rank is Full/College/University Professor must present research results in any international conference every R&D Cycle. In the case of collaborative effort, one (1) research presentation shall be credited to the entire team.

Academic Rank	Minimum Role/Involvement
Associate Professor	National/International Conference
Full/College/University Professor	International Conference

1.6.3 Research Publication

- 1.6.3.1 A regular faculty member whose rank is Associate Professor must publish research results as co-author or lead author in every R&D Cycle in any international, national, or local refereed journal with an established reputation.
- 1.6.3.2 A regular faculty member whose rank is Full/College/University Professor must publish research results as lead author or sole author in every R&D Cycle in any research journal indexed by Scopus, WoS, ERA, and/or ACI and/or recognized by CHED/PASUC.

Academic Rank	Minimum Role/ Involvement	Classification of Research Journal
Associate Professor	Co-author	Any international, national, or local refereed journals with an established reputation
Full/College/University Professor	Lead Author	Any research journal indexed by Scopus, WoS, ERA, ACI, or CHED?PASUC-recognized research journal

Section 4. Working Hours

- 1.1 The working hours of the regular faculty members and faculty designees are herein set in accordance with CSC MC No. 19, s. 2005: SUC Merit System, Chapter 5 Working Hours, to wit:

Faculty members, except those covered by special laws, shall render not less than eight (8) hours of work a day for five (5) days a week or a total of 40 hours a week exclusive of time for lunch. The 40 hours a week may include time for teaching, student consultation, research and extension work, and other activities relevant to teaching, e.g. preparation of lessons, checking of papers, etc., which shall be left to the discretion of the governing board of the SUC.

Each head of the department in the SUC may allow flexible working hours for his/her faculty members so they can perform their four-fold functions of instruction, consultation, research, and extension services, provided that the prescribed forty hours of work per week shall strictly be implemented.

- 1.2 All regular faculty members in the PUP-System shall abide by the following regular working hours scheme.

Academic Rank	Teaching	Consultation	Research	Extension	Other Activities	Total
---------------	----------	--------------	----------	-----------	------------------	-------

Associate Professor	9 hours	5 hours	16 hours	5 hours	5 hours	40
Full/College /University Professor	6 hours	5 hours	19 hours	5 hours	5 hours	40

1.3 All faculty designees across colleges, branches, and campuses in the University shall abide by the following working hours scheme.

Academic Rank	Teaching	Research	Administrative Work	Total
Chief/Chairperson/ Associate Dean/Assistant Director	3 hours	9 hours	28 hours	40
Executive Director/Director/Dean	0 hours	12 hours	28 hours	40

1.4 A Report on Official Time must be observed by all regular faculty members and faculty designees.

1.5 Part-time and temporary teaching loads must be considered as an overtime-actual-service-work and must be outside of the 40-hours of work per week.

Section 5. Deliverables

1.1 All regular faculty members and faculty designees must submit the following proofs of compliance:

Research Activity	Evidence
Research Production	Semestral progress report, terminal report, and publication format
Research Presentation Paper	Certificate of Paper Presentation
Research Publication	Acceptance Letter, Published Research Work, Proof of Indexing
Patent/Utility Model	Certificate of Invention from IPOPhil

1.2 Submission of proof of compliance must be made three (3) days before the holiday break of every calendar year to the following offices.

Academic Rank	Minimum Role/Involvement
Research Production Research Paper Presentation	Research Management Office
Research Publication	Research Publication Office
Patent Utility Model Industrial Design	Intellectual Property Management Office

Section 6. Sanctions

1.1 A Regular faculty member and/or a faculty designee who fails to comply with this Guidelines for at least one (1) R&D Cycle shall be ineligible for the following:

- 1.1.1 all financial rewards and incentives consistent with other existing relevant University rules and regulations until the faculty member has complied Section 3 of this Guidelines;
- 1.1.2 six (6) units of part-time teaching load in the semester following the R&D Cycle of non-compliance until the faculty member has complied with Section 3 of this Guidelines;
- 1.1.3 twelve (12) units of part-time teaching load in the semester following the second of two consecutive R&D Cycles of non-compliance until the faculty member has complied with Section 3 of this Guidelines; and
- 1.1.4 teaching load in any graduate program in the University System in the semester following the R&D Cycle of non-compliance until the faculty member has complied with Section 3 of this Guidelines.

1.2 The Sanctions enumerated in this section shall become effective in 2022 at the end of the first Cycle.

Article 4: Saving Clause

Cases not covered by the provisions of this Guidelines shall be submitted to the Office of the President for resolution.

Article 5: Repealing Clause

All previous issuances and other provisions that are inconsistent with any of the provisions of this Guidelines are deemed amended, repealed, and superseded accordingly.

Article 6: Effectivity

The Guidelines shall take effect upon the approval of the PUP Board of Regents in its 171st meeting last December 10, 2020.

(Sgd.) MANUEL M. MUHI, DTech, ASEAN Engr.

President

**A LEADING COMPREHENSIVE
POLYTECHNIC UNIVERSITY IN ASIA**

Research Grant

Incentives granted to faculty researchers

Type of Incentive	Brief Description and Legal Basis
1. Research Paper Presentation Incentives	For international conferences, the University shall provide for the actual expenses which only include registration fee, lowest round-trip airfare cost, and daily subsistence allowance (DSA) in reference with United Nations, Development Programme (UNDP) rates. Provided that the amount of financial assistance for conferences held within ASEAN, Hong Kong and Taiwan shall not exceed Seventy-Five Thousand pesos (Php 75,000) and One Hundred Thousand pesos (Php 100,000) for conferences held outside ASEAN, Hong Kong and Taiwan. Provided further that the detailed projected expenses are well justified and with documentary evidence provided. For national conferences, the usual financial assistance allowed by circulars/guidelines issued by the Department of Budget and Management (DBM) and the Commission on Audit (COA) shall apply. This incentive is in accordance with the decision made by the PUP Board of Regents in its 155th Regular Meeting.
2. Publication and Citation Incentives	For paper publication, the applicant shall receive the amount of Fifty Thousand Pesos (Php 50,000) if published in OS/ISI/SCOPUS-indexed publications, thirty thousand pesos (Php30,000.00) for CHED Recognized Journals, Twenty Thousand Pesos (Php 20,000) for PASUC accepted journal article, and ten thousand pesos (Php10,000.00) for institutionalized/University Journal. For each citation, a cash incentive of Three thousand Pesos (Php 3,000) for WOS/ISI/SCOPUS, two thousand pesos Php2,000.00) for CHED Recognized Journal, one thousand pesos (Php1,000.00) for PASUC Accepted Journal Article, and five hundred (Php500.00) for Institutionalized/University Journal. This incentive is in accordance with the decision made by the PUP Board of Regents in a Memorandum Order No. 29s2019.

3. Invention Disclosure Incentives	The Invention Disclosure Incentives is granted to inventors, researchers, faculty members, students, and administrative staff of the Polytechnic University of the Philippines, who as part of their usual duties and scholarly activities carry on research which may be supported in part, or in whole, by the University or by grants and contracts with outside sponsors. Recognizing that many new ideas, discoveries, and inventions inevitably flow from university research to practical and commercial application, it is in the interest of the University to encourage the development of such new ideas, discoveries and inventions; to reduce these inventions to practical and commercial application where resources permit; and to give adequate recognition and incentive to the inventors by having them share in the proceeds from any invention. The main purpose of the Invention Disclosure Incentives is to encourage innovation and increase patenting activity in the University. The University acknowledges the necessity to provide policies to promote and encourage excellence, creativity and innovation in research and other scholarly works by identifying and protecting the rights of the University, its faculty, staff and students. Based on Memorandum Order No. 21s2019, the following incentives shall be granted for Inventions to wit: Section 4.0 Incentive Schemes 4.1 A total amount of Php100,000.00 is awarded per patent invention to faculty member/s, students, and administrative personnel who are issued/granted a certification from the Bureau of Patents, Intellectual Property Office -Philippines (IPO-PHIL). Each stage of patent application will have a corresponding amount of incentive, as follows: STAGES OF APPLICATION OF AMOUNT OF INCENTIVE *Decision to Grant Patent Php 10,000.00 *1st Publication of Patent in IPO Gazette Php 15,000.00 *2nd Publication of Patent in IPO Gazette Php 25,000.00 *Issuance of Patent Certificate Php 50,000.004.
------------------------------------	--

	4.2 For faculty members, students, and administrative personnel who are granted a certificate of Utility Model/Industrial Design, a fixed amount of Php20,000 is awarded per technology. 4.3 A Faculty member or administrative personnel is entitled to "One Rank Vertical Promotion" for any "sole patent invention" once a patent certification is issued/granted and "One Step Increment" for any "sole Utility Model/Industrial Design" once a certification is issued/granted by the Bureau of Patents, Intellectual Property Office of the Philippines. 4.4 A regular faculty with technical expertise who acted as patent drafter of patentable R&D output/invention outside of his official functions shall likewise be entitled to receive incentive once certified by the Bureau of Patents, Intellectual Property Office of the Philippines with the following incentive scheme: *Patent Php 30,000.00 Utility Model (Petty Patent) *Php 10,000.00 Industrial Design (Design Patent) *Php 10,000.00 4.5 The grant of incentive is applicable only to patent, utility model or industrial design application filed through the Intellectual Property Management Office of the University. However, no incentive shall be granted to those applications without the name "POLYTECHNIC UNIVERSITY OF THE PHILIPPINES" as CO-APPLICANT. 4.6 If the invention is a result of collaboration among multiple inventors from the University and outside entity, the incentive shall be shared by the collaborating inventors in accordance with the determination of their participation or contribution in the authorship or invention.
--	---

4. Thesis and Dissertation Incentives	The University shall provide thesis and dissertation grant to full time faculty members or permanent administrative employees towards the completion of a graduate degree. The grant is intended to (1) motivate the University manpower/personnel to improve their qualification and sharpen their intellectual skills and scholarship; and (2) promote within the University the importance of advance and graduate education. This incentive is in accordance with the decision made by the PUP Board of Regents in its 155th Regular Meeting.
5. Gawad Tuklas: Outstanding Researcher Award	A Gawad Tuklas Awardee shall receive One Hundred Thousand Pesos (Php 100,000) and a plaque. Each finalist shall receive Ten Thousand Pesos (Php 10,000) and a certificate of recognition. This incentive is in accordance with the decision made by the PUP Board of Regents in its 155th Regular Meeting.

6. Merit Promotion on the Basis of Research Publication and Citation	The University, as approved by the Board of Regents during its 142nd Regular Meeting held on October 18, 2013 per Board Resolution No. 985, provides an opportunity for faculty members to avail of merit promotion scheme on the basis of research publication and citation. In this promotion scheme, a faculty member who has published a paper or is cited in national or international refereed or peer reviewed journals (ISI/Scopus-indexed) shall be entitled to either one rank or sub-rank promotion. The objectives of the scheme are (1) to encourage and reinforce research productivity of faculty members; (2) to provide due reward to faculty members who actively involve themselves in research undertakings; and (3) to motivate faculty members to be more vigorous in their responsibility as academic researchers. This incentive is in accordance with the decision made by the PUP Board of Regents in its 155th Regular Meeting.

Utilization and Commercialization of Research Outputs

The utilization and commercialization of academic studies is to be treated as “the process in which ideas, knowledge, and innovation would be conveyed to tangible assets including benefits that satisfy society and economy at a large scale. The university R&D output is an important source of significant technological innovation. This is because universities are known for talent promoters in the knowledge economy, which are operating as an essential infrastructure towards building such capacities for nations and regions to survive and succeed in the knowledge economy.

Hence the utilization and commercialization of technological and scientific knowledge generated within universities, research centers, laboratories that are publicly funded by research organizations is increasingly regarded via policymakers as input for regional economic growth to be sustainable and developed.

The Intellectual Property Management Office (IPMO) is the forefront for developing and implementing policies and guidelines that encourage the creation, invention, dissemination, utilization, and commercialization of intellectual property in the university. Specifically, it provides assistance to researchers to secure attractive returns in the long term from the bulk of valuable research outcomes and intellectual property. It also assists researchers in identifying possible partners within the academe, other businesses, and investors to promote translation of research innovations into new products through advice and support for early-stage research and development. The IPMO provides a portfolio of new technologies created through university research for licensing or collaborative development.

The Center for Technology Transfer and Enterprise Development Office supervise and manage all matters concerning the transfer of technology, both in terms of commercial and non-commercial means on the day-to-day operations of the Innovation and Technical Support Office. The Office establishes and collaborates with network of commercial and venture contracts and promotes the advancement of innovation within and outside the University.

The institution specifically observed the approved process below for the utilization and commercialization of research outputs in the university.

Research Utilization Projects

Linkages in Research

Patents and Intellectual Property Rights

Patents

A faculty member, employee, and students whose work has been patented and applied for utility model and industrial design will be given the following incentives.

Utility Model/Industrial Design	P 5,000.00
Decision to Grant Patent	P10,000.00
Publication of Patent in IPO Gazette	P15,000.00
Issuance of Patent Certificate	P25,000.00
PCT Application	P50,000.00

Intellectual Property Rights

The research proponent, unless otherwise stipulated in the contract or agreement, shall own the authorship and share copyright ownership with the University. The researcher shares in royalties from copyrights, patents, or other intellectual property rights derived from the research output as stipulated in the PUP IP Policy.

General Conditions and Provisions

1. The researcher/s shall comply with the requirements stipulated in the Revised Research and Development Manual to be eligible for any of the monetary and non-monetary support and incentives.
2. Any of the aforementioned support and incentives shall be granted on the condition that the research output shall be presented in a national or international conference, and/or published in a refereed national or international journal.
3. The name of the Polytechnic University of the Philippines as the author/s' institutional affiliation be explicitly demonstrated in any conference program/proceedings and/or journal publication.
4. The implementation of this policy shall strictly adhere to the BOR-approved Implementing Guidelines. *(See Appendix F – Implementing Guidelines of the Policy on University Research and Development Support, Funding and Incentives).*

Incentives/Grants/Assistance/Supports/Funding/Recognition

Incentives granted to faculty researchers

Type of Incentive	Brief Description and Legal Basis
1. Research Paper Presentation Incentives	For international conferences, the University shall provide for the actual expenses which only include registration fee, lowest round-trip airfare cost, and daily subsistence allowance (DSA) in reference with United Nations, Development Programme (UNDP) rates. Provided that the amount of financial assistance for conferences held within ASEAN, Hong Kong and Taiwan shall not exceed Seventy-Five Thousand pesos (Php 75,000) and One Hundred Thousand pesos (Php 100,000) for conferences held outside ASEAN, Hong Kong and Taiwan. Provided further that the detailed projected expenses are well justified and with documentary evidence provided. For national conferences, the usual financial assistance allowed by circulars/guidelines issued by the Department of Budget and Management (DBM) and the Commission on Audit (COA) shall apply. This incentive is in accordance with the decision made by the PUP Board of Regents in its 155th Regular Meeting.
2. Publication and Citation Incentives	For paper publication, the applicant shall receive the amount of Fifty Thousand Pesos (Php 50,000) if published in OS/ISI/SCOPUS-indexed publications, thirty thousand pesos (Php30,000.00) for CHED Recognized Journals, Twenty Thousand Pesos (Php 20,000) for PASUC accepted journal article, and ten thousand pesos (Php10,000.00) for institutionalized/University Journal. For each citation, a cash incentive of Three thousand Pesos (Php 3,000) for WOS/ISI/SCOPUS, two thousand pesos Php2,000.00) for CHED Recognized Journal, one thousand pesos (Php1,000.00) for PASUC Accepted Journal Article,and five hundred (Php500.00) for Institutionalized/University Journal. This incentive is in accordance with the decision made by the PUP Board of Regents in a Memorandum Order No. 29s2019.

3. Invention Disclosure Incentives	The Invention Disclosure Incentives is granted to inventors, researchers, faculty members, students, and administrative staff of the Polytechnic University of the Philippines, who as part of their usual duties and scholarly activities carry on research which may be supported in part, or in whole, by the University or by grants and contracts with outside sponsors. Recognizing that many new ideas, discoveries, and inventions inevitably flow from university research to practical and commercial application, it is in the interest of the University to encourage the development of such new ideas, discoveries and inventions; to reduce these inventions to practical and commercial application where resources permit; and to give adequate recognition and incentive to the inventors by having them share in the proceeds from any invention. The main purpose of the Invention Disclosure Incentives is to encourage innovation and increase patenting activity in the University. The University acknowledges the necessity to provide policies to promote and encourage excellence, creativity and innovation in research and other scholarly works by identifying and protecting the rights of the University, its faculty, staff and students. Based on Memorandum Order No. 21s2019, the following incentives shall be granted for Inventions to wit: Section 4.0 Incentive Schemes 4.1 A total amount of Php100,000.00 is awarded per patent invention to faculty member/s, students, and administrative personnel who are issued/granted a certification from the Bureau of Patents, Intellectual Property Office -Philippines (IPO-PHIL). Each stage of patent application will have a corresponding amount of incentive, as follows: STAGES OF APPLICATION OF AMOUNT OF INCENTIVE *Decision to Grant Patent Php 10,000.00 *1st Publication of Patent in IPO Gazette Php 15,000.00 *2nd Publication of Patent in IPO Gazette Php 25,000.00 *Issuance of Patent Certificate Php 50,000.004. 4.2 For faculty members, students, and administrative personnel who are granted a certificate of Utility Model/Industrial Design, a fixed amount of Php20,000 is awarded per technology.
------------------------------------	--

	4.3 A Faculty member or administrative personnel is entitled to “One Rank Vertical Promotion” for any “sole patent invention” once a patent certification is issued/granted and “One Step Increment” for any “sole Utility Model/Industrial Design” once a certification is issued/granted by the Bureau of Patents, Intellectual Property Office of the Philippines. 4.4 A regular faculty with technical expertise who acted as patent drafter of patentable R&D output/invention outside of his official functions shall likewise be entitled to receive incentive once certified by the Bureau of Patents, Intellectual Property Office of the Philippines with the following incentive scheme: *PatentPhp 30,000.00 Utility Model (Petty Patent) *Php 10,000.00 Industrial Design (Design Patent) *Php 10,000.00 4.5 The grant of incentive is applicable only to patent, utility model or industrial design application filed through the Intellectual Property Management Office of the University. However, no incentive shall be granted to those applications without the name “POLYTECHNIC UNIVERSITY OF THE PHILIPPINES” as CO-APPLICANT. 4.6 If the invention is a result of collaboration among multiple inventors from the University and outside entity, the incentive shall be shared by the collaborating inventors in accordance with the determination of their participation or contribution in the authorship or invention.
4. Thesis and Dissertation Incentives	The University shall provide thesis and dissertation grant to full time faculty members or permanent administrative employees towards the completion of a graduate degree. The grant is intended to (1) motivate the University manpower/personnel to improve their qualification and sharpen their intellectual skills and scholarship; and (2) promote within the University the importance of advance and graduate education. This incentive is in accordance with the decision made by the PUP Board of Regents in its 155th Regular Meeting.

5. Gawad Tuklas: Outstanding Researcher Award	A Gawad Tuklas Awardee shall receive One Hundred Thousand Pesos (Php 100,000) and a plaque. Each finalist shall receive Ten Thousand Pesos (Php 10,000) and a certificate of recognition. This incentive is in accordance with the decision made by the PUP Board of Regents in its 155th Regular Meeting.
6. Merit Promotion on the Basis of Research Publication and Citation	The University, as approved by the Board of Regents during its 142nd Regular Meeting held on October 18, 2013 per Board Resolution No. 985, provides an opportunity for faculty members to avail of merit promotion scheme on the basis of research publication and citation. In this promotion scheme, a faculty member who has published a paper or is cited in national or international refereed or peer reviewed journals (ISI/Scopus-indexed) shall be entitled to either one rank or sub-rank promotion. The objectives of the scheme are (1) to encourage and reinforce research productivity of faculty members; (2) to provide due reward to faculty members who actively involve themselves in research undertakings; and (3) to motivate faculty members to be more vigorous in their responsibility as academic researchers. This incentive is in accordance with the decision made by the PUP Board of Regents in its 155th Regular Meeting.

Designation of Faculty Researcher/s

REPUBLIC OF THE PHILIPPINES
POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
OFFICE OF THE PRESIDENT

BAGONG PILIPINAS

PUPDTS No. 2026-004993

February 4, 2026

SPECIAL ORDER
No. 0761 s. 2026

Pursuant to Section 4(g) of Republic Act No. 8292 and by virtue of Board Resolution No. 3419, series of 2023, dated 14 December 2023 and Executive Order No. 38, series of 2025, dated October 20, 2025, the designation of **ASSOC. PROF. ABEGAIL A. MALABUYOC** as **RESEARCH AND EXTENSION COORDINATOR AND SPECIAL DISBURSING OFFICER, PUP STO. TOMAS, BATANGAS CAMPUS**, this University, is hereby extended effective **March 1, 2026**, in addition to her duties as Associate Professor IV.

In her capacity as such, Assoc. Prof. Malabuyoc shall be entitled to vacation and sick leave credits in lieu of the teacher's leave and a reduced teaching load from five (5) to three (3) regular subject/s per week pursuant to the provisions Executive Order No. 29, series of 2025. Likewise, she shall be authorized to render three (3) administrative night services pursuant to the provisions of Executive Order No. 170 and E.O. 29, with compensation at the rate of **2,044.90 per night** of actual service rendered.

This extension of designation shall be valid for one (1) year unless earlier revoked, without prejudice to extension.

This amends S.O. No. 0185, s. 2026 dated January 19, 2026.

MANUEL M. MUHI, DTech.
President

A LEADING COMPREHENSIVE
POLYTECHNIC UNIVERSITY IN ASIA

CURRICULUM VITAE

ABEGAIL ALA MALABUYOC

Address: No. 216 Barangay San Luis, Sto. Tomas, Batangas, 4234 Philippines
Email address: aamalabuyoc@pup.edu.ph *Mobile No.:* 09984124933

PROFESSIONAL SUMMARY

Experienced Associate Professor with 27 years of service at the Polytechnic University of the Philippines. Strong background in ICT education, academic administration, and research. Engaged in curriculum development, extension services and faculty development

EDUCATIONAL ATTAINMENT

- Doctor in Educational Management
PUP Open University System (ongoing)
- Master of Arts in Education major in Educational Management
Philippine College of Health and Sciences, Inc., 2018
- Master in Information Technology (Non-Thesis)
PUP Graduate, 20025
- Post Baccalaureate in Computer Technology
PUP Open University, 2000
- Bachelor in Business Education
PUP Sta. Mesa, 1994

ELIGIBILITY

- Licensure Examination for Teacher
- Civil Service Examination in Sub-Professional Level

EXPERIENCE HIGHLIGHTS

- ASSOCIATE PROFESSOR IV**
PUP Sto. Tomas Campus (September 2024 to Present)
- Research and Extension Coordinator**
PUP Sto. Tomas Campus (July 1, 2025 to present)
- Extension Management Cluster Coordinator**
PUP Sto. Tomas Campus (February 2020 to June 30, 2025)

TRAINING AND SEMINARS

Attended more than 25 seminars including:

PAFTE Conferences
Extension Capability Building Activities
International Multidisciplinary Research and Extension Conference

SKILLS AND MEMBERSHIPS

Computer literate
Member: PSITE, PAFTE, VRA Inc., PICE 2, NBEA Philippines
Engage in teaching, mentoring, extension, and administrative leadership

RESEARCH AND PUBLICATIONS

Embracing Educational Software Integration: A Gateway to Enhance Learning in the Digital Age
7th International Conference on Informatics and Computational Sciences (ICICoS 2024)
July 16-20, 2024 at Semarang, Central Java, Indonesia

Predicting Licensure Examination Performance Using Data Mining Techniques
Presented at the International Conference on Business and Industrial Research
(ICBIR) 2023

Technostress and Academic Productivity of Students in a Higher Education Institution
Presenter – International Research Conference on Higher Education (IRCHE)
2021 PUP via ZOOM

The University Research and Development Council (UREDCO)

The University Research and Development Council (UREDCO) is constituted to serve as a policy-recommending body for the University research & development plans and programs, and the clearinghouse of ideas, specifically in the priority-setting, implementation and evaluation of the R&D program of the University.

The UREDCO is headed by the University President, with the Vice President for Research, Extension, Planning and Development (VPREPD) as vice chair and the directors of the research institutes, chiefs of offices and centers under the OVPREPD and the designated academic area research coordinators, college deans and branch/campus directors as members. It shall meet once a year and may hold special meetings when necessary.

The University Research Evaluation Committee (UREC)

The University Research Evaluation Committee (UREC) is an ad hoc committee that undertakes review of research proposals submitted for possible university funding. The Committee meets every quarter and holds special meetings when necessary.

The Office of the Vice President for Research, Extension, Planning and Development (OVPREPD)

The Office of the Vice-President for Research, Extension, Planning and Development (OVPREPD) is the lead implementer of the policies and programs of the University’s research and development functions. It coordinates the research activities of the various colleges, campuses, branches and extensions of the University.

The Vice President for Research, Extension, Planning and Development (VPREPD) shall discharge the following duties and responsibilities:

1. Assists the University President in the direction, supervision and management of all matters pertaining to research, extension, planning and development policies;
2. Coordinates the work of all research, extension, planning and development institutes and departments for harmonious functioning;
3. Represents the University President in official and/or social functions, as the case maybe;
4. Recommends and implements policies related to research, extension, planning and development
5. Submits regular reports to management and external bodies like DBM, COA, CHED, CSC and others; and
6. Performs such other duties that the President may assign from time to time.

The VPREPD is supported by the Assistant to the Vice-President for Research, Extension, Planning and Development (AVPREPD) with the following functions:

1. Assists the Vice President for Research, Extension, Planning and Development in the direction, supervision and management of all matters pertaining to research, extension, planning and development policies;
2. Coordinates the work of all to research, extension, planning and development departments for harmonious functioning;
3. Represents the Vice President for Research, Extension, Planning and Development in official and/or social functions, as the case maybe;
4. Recommends and implements policies related to research, extension, planning and development;
5. Recommends plans, programs, projects, and policies relative to research planning and program/project development to the VP for Research, Extension, Planning and Development;
6. Assists in the implementation of policies on research, planning and development programs of the University;
7. Oversees the operation of the Research, Extension, Planning and Development office;
8. Submits regular reports to the management; and
9. Performs other duties that the Vice President for Research, Extension, Planning and Development may assign from time to time.

Offices/Institutes/Centers under the OVPREPD

The Offices/Institutes under the OVPREPD are headed by the directors and are assisted by office/center chiefs. *(See Figure 1 or the OVPREPD Organizational Structure)* In the case of the research institutes and centers, faculty researchers maybe designated to conduct research projects. These offices are as follows:

1. **Research and Extension Management Office (REMO)**
 - 1.1 Center for Research Management Services (CRMS)
 - 1.2 Center for Extension Management Services (CEMS)
2. **Institutional Planning Office (IPO)**
 - 2.1 Planning Section (PS)
 - 2.2 Evaluation and Monitoring Section (EMS)
3. **Institute for Science and Technology Research (ISTR)**
 - 3.1 Center for Life Sciences Research (CLSR)
 - 3.2 Center for Physical Sciences Research (CPSR)
 - 3.3 Center for Engineering and Technology Research (CETR)
 - 3.4 Center for Mathematics and Computing and Information Sciences Research (CMCISR)

4. Institute for Social Sciences and Development (ISSD)

- 4.1** Center for Environmental Studies (CES)
- 4.2** Center for Public Administration and Governance Studies (CPAGS)
- 4.3** Center for Peace and Poverty Studies (CPPS)
- 4.4** Center for Human Rights and Gender Studies (CHRGs)

5. Institute for Cultural Studies (ICS)

- 5.1** Center for Creative Writing (CCW)
- 5.2** Center for Philosophy and Humanities (CPH)
- 5.3** Center for Social History (CSH)
- 5.4** Center for Education Research (CER)

6. Institute for Labor and Industrial Relations (ILIR)

- 6.1** Center for Labor Research and Publications (CLRP)
- 6.2** Center for Labor Education and Training (CLET)

7. Institute for Data and Statistical Analysis (IDSA)

- 7.1** Center for Statistical Studies (CSS)
- 7.2** Statistical Training Section (STS)

8. Intellectual Property Management Office (IPMO)

- 8.1** Innovation and Technology Support Office (ITSO)
- 8.2** Center for Technology Transfer and Enterprise Development (CTTED)

9. Publications Office (PO)

- 9.1** Editorial and Layout Section (ELS)
- 9.2** Printing and Production Section (PPS)

Functional Statement of the Various Offices/Institutes/Centers

Research and Extension Management Office (REMO)

This is the research and extension arm of the University that takes charge to initiate new research activities; to manage, monitor and assist in grant applications, research project evaluation, monitoring as well as identifying funding windows for approved research proposals and projects. REMO is also in charge of the implementation of the university extension program and serves as support arm for college/branch extension activities. In particular, REMO conducts research and extension capability-building programs to encourage and train the academic and non-academic staff on research and consultancy, and secures research and extension grants and projects. Furthermore, REMO is the support arm of the University Research and Evaluation Committee (UREC). Cluster Research and Extension Coordinators (RECs) are designated under the Office to facilitate, coordinate and monitor the research and extension program of the University.

The following are the core functions of the Office:

1. Recommends plans, programs, projects, and policies relative to research planning and program/project development to the Vice-President for Research, Extension, Planning and Development;
2. Assists in the implementation of policies on research, planning and development programs of the University;
3. Prioritizes research programs that have significant impact and contribution to the University's research thrusts and priorities;
4. Conducts institutional researches that would address efficiency and effectiveness of the services offered by the University to its stakeholders and the larger community;
5. Provides administrative and technical support to University researchers and faculty members to harness their research capability and skills;
6. Assists the conduct of the student/faculty evaluation;
7. Provides technical assistance to faculty and students in the preparation of research designs and in the collection, processing, analysis and interpretation of research data; and
8. Establishes and maintains linkages with national institutions with similar educational goals to facilitate the conduct of various researches.
9. Oversees the operation of its attached centers.

REMO has two centers with distinct functions:

Center for Research Management Services (CRMS)

1. Conducts research evaluation
2. Monitors the implementation of the approved internal and external research projects
3. Forges research partnership and collaboration
4. Conducts fund-sourcing for research projects
5. Implements research capability-building program
6. Organizes programs and activities to motivate research production and publication
7. Conducts research dissemination (national and international conferences)

Center for Extension Management Services (CEMS)

1. Develops and implements the university extension program
2. Coordinates the college/branch extension activities
3. Develops partnership and collaboration with industry
4. Conducts extension monitoring and evaluation
5. Conducts extension-related activities

Institutional Planning Office (IPO)

The Office formulates and regularly updates the University's long-range plans and projects, monitors their implementation and submits institutional policy recommendations to the President, through the Vice President for Research, Extension, Planning and Development, and to the Board of Regents and maintains institutional databases. Specifically, the IPO performs the following functions:

1. Implements policies relative to planning conceptualization, monitoring and evaluation;
2. Coordinates with the academic and administrative support units pertaining to program planning and review processes;
3. Supervises the operation of the Planning Section and the Monitoring and Evaluation Section;
4. Serves as representative of the University on matters relating to data exchange with other government agencies; and
5. Submits periodic reports to the management.

IPO has two sections with the following functions:

Planning Section (PS)

1. Provides technical assistance in planning and program development to the various operating units in the University;
2. Integrates the plans of the different operating units into a University plan;
3. Prepares projection on University enrollment and graduates;
4. Estimates funding requirements for faculty and administrative personnel, infrastructure and maintenance, and operating expenses for the various services and facilities of the University;
5. Prepares short and medium-term plans for the University;
6. Prepares periodic reports for the management and improvement of key processes;
7. Develops/analyzes university strategic indicators and performance measures generated out of institutional data from all sectors of the university;
8. Assesses institutional needs of the University;
9. Conducts evaluative studies on areas with strategic importance to the University; and
10. Provides the management with information that suggests the policy formulation and decision making.

Monitoring and Evaluation Section (MES)

1. Undertakes monitoring and evaluation of the status of the various programs and projects of the University;

2. Undertakes performance evaluation of the various units in the University in relation to the plans and programs projected for the year;
3. Periodically reviews the University's short-term and mid-term plans and makes recommendations on the required reformulations/revisions in the plan;
4. Prepares periodic report for management;
5. Monitors the accessibility of the programs, plans and projects to all sectors of the University;
6. Evaluates the extent to which the project is able to achieve its general objectives/goals;
7. Undertakes a systematic measuring and tracking programs of activities and results; and
8. Develops collaborative team environments.

Institute for Science and Technology Research (ISTR)

The Institute integrates holistic programs to implement various strategies in pursuing S&T researches in the field of life science, physical science, mathematics, engineering, computing and information sciences. It promotes scientific consciousness and develops relevant R&D expertise in the academe to develop indigenous scientific and technological base and, thus, contribute to the attainment of national industrialization. The following are the core functions of ISTR:

1. Formulates plans and programs and implementing strategies for science and technology (S&T) research and development (R&D) for the university;
2. Promotes the university S&T research agenda and motivates faculty members and students through lectures, workshops and symposia;
3. Generates research proposals for internal and external funding source;
4. Develops ideas and strategies for income generation and technology transfer from the outputs of research activities;
5. Evaluates research proposals submitted for funding from the S&T researchers of the university;
6. Monitors and assesses progress of on-going researches, mentors and assists S&T researchers (from inside and outside the university) through consultancies and sharing the use of the research laboratory;
7. Monitors and ensures the implementation of biosafety practices research conducted in the university;
8. Publishes research outputs in scientific journals;
9. Presents research outputs conducted at the institute thru oral and poster presentation to national and international scientific fora;
10. Develops, establishes and maintains linkages with private and government research institutions both local and foreign;
11. Regularly publishes the PUP Journal of Science and Technology; and

12. Releases news items, updates, announcements and scientific activities of the institute through the Scitech Newsletter.

ISTR has the following Centers and functions:

Center for Life Sciences Research (CLSR)

1. Formulates plans and programs towards the development of research in the life sciences area;
2. Establishes and maintains linkages with private and government academic and research institutions for mutual transfer of knowledge and skills as well as collaborate with them in conducting common research interests;
3. Continuously prepares research proposals in life science area;
4. Undertakes preliminary investigations and actual experimentations on research areas of life sciences;
5. Strengthens manpower capabilities by organizing trainings, national and international scientific meetings, conventions and conferences, forums and symposia;
6. Provides assistance, consultancy, as well as mentoring of faculty members and students from inside and outside the university in biological researches; and
7. Disseminates research results and outputs through publication in refereed national and international journals and presentation of research outputs to national and international scientific fora;

Center for Physical Sciences Research (CPSR)

1. Formulates plans and programs towards the development of research in the physical science areas;
2. Establishes linkages with private and government academic and research institutions for mutual transfer of knowledge and skills as well as collaborate with them in conducting researches of common interests;
3. Strengthens manpower capabilities by organizing trainings, national and international scientific meetings, conventions and conferences, forums and symposia;
4. Provides assistance, consultancy, as well as mentoring of faculty members and students from inside and outside the university in biological researches; and
5. Disseminates research results and outputs through publication in refereed national and international journals and presentation of research outputs to national and international scientific fora.

Center for Engineering and Technology Research (CETR)

1. Formulates and adopts a comprehensive engineering technology research plan from the university;
2. Provides direction for multidisciplinary research in different engineering specialization;
3. Establishes and maintain collaborations of research with different departments of the university to develop researches that can be commercialized;
4. Prepares research proposals for submission to national and international funding windows;
5. Establishes collaborations with funding institutions and organizations for sourcing of funds for research activities;
6. Undertakes designs and engineering research works to complement research and development functions;
7. Maintains a creative environment that rewards and encourages innovation;
8. Holds meetings, exhibits and visits and other activities that can be conducive to the promotion or attainment of the different engineering researches;
9. Promotes, assists and where appropriate, undertakes the transfer of the results of scientific and technological research and development to their end-users;
10. Implements programs for strengthening scientific and technological capabilities through manpower training, infrastructure and institution-building;
11. Strengthens manpower capabilities by organizing trainings, national and international scientific meetings, conventions and conferences, forums and symposia;
12. Provides assistance, consultancy, as well as mentoring of faculty members and students from inside and outside the university in biological researches; and
13. Disseminates research results and outputs through publication in refereed national and international journals and presentation of research outputs to national and international scientific fora.

Center for Mathematics and Computing and Information Sciences Research (CCISR)

1. Formulates and adopts a comprehensive mathematics, computing and information technology research plan from the university;
2. Provides direction for the different multidisciplinary computing research such as technology innovation and promotion, natural language processing and machine vision;
3. Establishes and maintain collaborations of research with different departments of the university to develop researches that can be commercialized;
4. Prepares research proposals for submission to national and international funding windows;
5. Establishes collaborations with funding institutions and organizations for sourcing of funds for research activities;

6. Undertakes mathematics, computing and information research works to complement research and development functions;
7. Maintains a creative environment that rewards and encourages innovation;
8. Holds meetings, exhibits and visits and other activities that can be conducive to the promotion or attainment of the different engineering researches;
9. Promotes, assists and where appropriate, undertakes the transfer of the results of scientific and technological research and development to their end-users;
10. Strengthens manpower capabilities by organizing trainings, national and international scientific meetings, conventions and conferences, forums and symposia;
11. Provides assistance, consultancy, as well as mentoring of faculty members and students from inside and outside the university in biological researches; and
12. Disseminates research results and outputs through publication in refereed national and international journals and presentation of research outputs to national and international scientific fora.

Institute for Social Sciences and Development (ISSD)

Serves as the research hub of the social sciences and development disciplines. Institutionalizes researches and encourages experimentations and empirical research on various approaches on social development and conducts thematic seminar-workshops and conferences; and publishes journals as well as clearing house that supports the research requirements of the College of Social Sciences and Development. ISSD has the following functions:

1. Provides leadership and supervises the day to day operation of the Institute;
2. Recommends research works in the areas of social sciences, human rights, political and socioeconomic issues, and other related disciplines;
3. Monitors the implementation of the various Centers under the Institute;
4. Undertakes research studies on Human Rights, Labor and Gender Development;
5. Invites foreign scholars/lecturer/researchers who will work in partnership with the Institute to give lectures and discourse on the discipline;
6. Publishes books and journals and contemporary literary pieces to add to the knowledge on the Social Sciences and Development; and
7. Creates local and international network in the academe, public and private sectors, and civil society groups.

ISSD has the following Centers and functions:

Center for Environmental Studies (CES)

1. Develops plans and programs on environmental and ecological studies in the University;
2. Provides technical, consultative and advisory services to the University officials relative to environmental concerns;
3. Undertakes activities to promote environmental awareness in the University; and
4. Takes up projects, conducts training programs, and builds database on environmental studies.

Center for Public Administration and Governance Studies (CPAGS)

1. Engages in capacity-building, research and extension services in public administration and governance;
2. Formulates plans and programs towards the development of researches and studies on public administration, governance and related issues;
3. Undertakes researches, organizes lectures, symposia, conferences and the like promoting effective and efficient public administration and governance;
4. Establishes linkages and networking activities with groups and agencies having similar objectives;
5. Publishes papers and documents on field experience and theoretical studies on public administration and governance;
6. Establishes Professorial Chairs, and Student/Faculty Exchange Programs for the study of public administration and governance; and
7. Provides consultancy and advisory services on public administration and governance research, as well as retooling public servants in education for citizenship and genuine political participation.

Center for Peace and Poverty Studies (CPPS)

1. Undertakes research and recommends policy for development focusing on poverty alleviation, human development, conflict, peace and regional development;
2. Formulates plans and programs towards the development of research and studies on peace and related issues;
3. Undertakes researches, organizes lectures, symposia, conferences and the like that promotes peace;
4. Establishes linkages and networking activities with groups and agencies having similar objectives;
5. Publishes papers and documents on field experience and theoretical studies on peace building;

6. Provides consultancy and advisory services on peace research and development studies; and
7. Establishes Professorial Chairs, Fellowship Grants and Scholarships for Faculty and Student Exchange Programs for the study of peace, justice and democracy;

Center for Human Rights and Gender Studies (CHRGs)

2. Plans and develops curricular programs in human rights and gender and development. The CHRGs provides trainings and symposia and establishes the University Gender and Development focal point system.
3. Formulates plans and programs towards the development of a curricula in human rights education;
4. Establishes and maintains linkages with national and international organizations and educational institutions engaged in similar activities to facilitate research;
5. Assists in the development of curricula and training of faculty and students;
6. Develops training programs to prepare faculty members to handle courses in human rights education; and
7. Conducts researches to enrich and update human rights program related to education curricula.

Institute for Cultural Studies (ICS)

Fosters research-based and workshop-led outputs and activities across divisional and disciplinary boundaries. The Institute promotes and engages with interpretative or hermeneutic, historical, social and political sciences, and theoretical works in the Arts and allied disciplines. The Institute has the following functions:

1. Establishes an archive of published and unpublished researches, works, and personal papers associated with the formation of the Institute and its associated centers;
2. Constructs and houses special library of cultural studies publications;
3. Fosters linkage with universities, local and abroad;
4. Organizes regular symposia and conferences both local and international;
5. Establishes professorial chairs, fellowship grants, and scholarships and faculty and student exchange program in cultural studies and associated disciplines;
6. Augments disciplinary expertise for curricular development in order to deliver informed course teaching in undergraduate and graduate programs of the University; and
7. Promotes assistance to undergraduate and graduate students and faculty working on cultural studies and associated disciplines.

ICS has the following Centers and functions:

Center for Creative Writing (CCW)

1. Holds weekly workshops that will develop writing skills of students, leaders and staff enabling them to create works that can be included in the production and publication of anthologies, literary journals and books;
2. Launches regular discussions among teachers, students and scholars about the newest, up-to-date and important books, multi-media and other related topics in the arts;
3. Holds fora, symposia and seminars on the ever-changing methods and issues dealing with literature from local and international scope;
4. Builds a special and unique library for cultural studies and produces publications that can be accessed and utilized by students, diligent writers, scholars and other intellectuals for research and study;
5. Creates an organization of writers that will develop, train, ascertain and embody the literature produced by our university and make it known in and out of PUP;
6. Regularly produces issues of literary journals, anthologies and other works that will herald PUP as one of the newest for progressive and patriotic literature;
7. Establishes link to other institutional and cultural organizations in and out of PUP that can assist the center in its plans for activities, projects and productions; and
8. Launches yearly community work to chosen places/areas that could be helped and trained by the center with regard to the creation of mini libraries and in producing standard knowledge in the creative writing discipline.

Center for Humanities and Philosophy (CHP)

1. Assists the University in establishing linkages with institutions specializing in the areas of humanities, philosophy, cultural studies, art practices, heritage promotion and preservation;
2. Formulates, supervises and monitors the implementation of the programs and services by the Center;
3. Conducts and publishes researches, papers, transcripts, articles and monographs, books and journals; and
4. Conducts fora, trainings, workshops, roundtable discussions and seminars in the areas of humanities and philosophy.

Center for Social History (CSH)

- 1. Establishes and maintains an archive of published and unpublished researches, works, and personal papers associated with the formation of the Institute and its associated centers;
- 2. Constructs and houses special library of cultural studies publications;
- 3. Fosters linkage with universities locally and abroad;
- 4. Organizes regular symposia and conferences both local and international;
- 5. Establishes professional chairs, fellowship grants, and scholarship and faculty and student exchange program in cultural studies and associated disciplines;
- 6. Augments disciplinary expertise for curricular development in order to deliver informed course teaching in undergraduate and graduate programs of the University; and
- 7. Promotes assistance to undergraduate and graduate students and faculty working on cultural studies and associated disciplines.

Center for Education Research (CER)

- 1. Supports R&D projects of colleges, branches and campuses offering education courses;
- 2. Supports the University in promoting poverty reduction studies focusing on education;
- 3. Publishes a research journal on education incorporating contemporary theories and empirical methodologies on the discourse and practice of education;
- 4. Helps promote educational innovations; and
- 5. Assists in establishing partnerships and linkages with educational institutions and professional organizations.

Institute for Labor and Industrial Relations (ILIR)

Its focus is to create labor programs and research studies on labor and industrial relations, to serve as workers' education and training center, to establish networks and linkages among labor groups and organizations while providing support services.

ILIR has the following functions:

- 1. Conducts researches and studies for faculty and students development programs relevant to labor and industrial relations for social transformation;
- 2. Publishes journals and other education materials including curriculum initiatives focusing on labor, industrial relations and national development;
- 3. Organizes information campaigns, trainings, seminars, educational activities, support services such as financial system analysis and other advocacies for labor rights and standards;

4. Maintains SALIKSIKAN, a labor resource center to house research materials and serves as educational center for students, faculty and employees on labor and national development; and
5. Establishes volunteer groups, initiates linkages and networking activities with groups, agencies, offices and organizations having similar objectives.

Center for Labor Research and Publications (CLRP)

1. Conducts and assists in research studies on labor and society linking academic research to the concerns and struggle of labor for national development and social transformation.
2. Promotes labor-related researches, theses and dissertations and conducts colloquia (public presentation of research papers) with the initiative, support and cooperation of departments, colleges and agencies of the university.
3. Publishes *Braso*, the official journal publication of the institute.
4. Establishes and coordinates a board of editors, referees and contributors for the institute’s publication and educational materials.
5. Maintains and enriches a resource center (SALIKSIKAN) as repository of reading materials, audio-visual materials and other education tools and aids for the perusal of students, employees, and faculty of the university and workers and labor advocates outside the university.

Center for Labor Education and Trainings (CLET)

2. Conducts regular information campaigns, seminars and trainings and other educational activities and prepares corresponding educational materials.
3. Facilitates resource speakers and trainers for labor issues and labor-related education activities and trainings.
4. Establishes a pool of speakers, trainers and experts composed of faculty members, employees and students to respond to requests for speakers, trainers and facilitators within and outside the university.
5. Organizes and maintains volunteer groups to help the institute in providing services to the workers and communities; and other advocacies of the institute and the university.
6. Establishes network and partnerships with individuals, labor organizations and institutions, local and international government, non-government organizations and universities on issues and advocacies for the rights and welfare of workers and tillers.

Institute for Data and Statistical Analysis (IDSA)

This Institute serves as the University's facility for statistical consultancy and processing of research data of faculty members, students and staff of PUP, as well as researchers from other institutions/organizations. The IDSA offers statistical training for internal and external clients. It also functions as generator/provider of data requirements of business, government and non-governmental organizations through surveys and other scientific methods of data collection.

IDSA has two sections with the following functions:

Center for Statistical Studies (CSS)

1. Accepts statistical consulting services from individuals or institutions in the private and public sectors;
2. Provides expert or responsible advice/assistance on data gathering, data organization, processing and analysis to undergraduate and graduate student researchers.
3. Analyzes and interprets institutional statistical information (like demographic profile of faculty and administrative employees, performance of PUP graduates in licensure examinations, etc.);
4. Coordinates with Research and Extension Management Office (REMO) and Information and Communications Technology Office (ICTO) on the analysis of the Online Faculty Evaluation of Students;
5. Facilitates the conduct of Client Satisfaction Survey and analyzes the survey results to measure the performance of the academic and non-academic offices of the University;
6. Establishes and maintains linkages and collaboration with national institutions and organizations like the Philippine Statistics Authority (PSA), which are engaged in similar activities to facilitate research; and
7. Collates, evaluates and interpret institutional data that will be used to develop the University Statistical Bulletin.

Statistical Training Section (STS)

2. Exposes faculty members and graduate and undergraduate students to actual use of popular statistical software through seminar-workshops and in-house trainings;
3. Schedules training courses and organizes lectures, seminar and workshops on the use of statistical software; and
4. Prepares manuals and training descriptions for participants.

Intellectual Property Management Office (IPMO)

The Office is responsible for developing and implementing policies and guidelines that encourage the creation, invention, dissemination, utilization and commercialization of intellectual property in the University. In particular, IPMO has the following major functions:

1. Provides assistance and advice to the stakeholders on intellectual property rights and ensures that these rights are protected and promoted in the manner that will be beneficial for both the creator/author/inventor and the University;
2. Facilitates and promotes university-industry partnerships through technology transfer, and generates income for the university through the commercialization of products and services derived from its R & D processes;
3. Recommends effective support for inventors through various incentive mechanisms to fast-track technology processes in the university; and
4. Coordinates / collaborates with the various institutes and colleges to facilitate the execution of agreements, affidavits, applications, and other documents relating to works and inventions.

The IPMO directly supervises the following offices, with their respective functions:

Innovations and Technology Support Office (ITSO)

1. Boosts the Intellectual Property creation in the academe by facilitating access to global science and technology information;
2. Provides skills training in patent searching;
3. Renders patent search services;
4. Organizes a community of patent information users;
5. Provides skills training in patent drafting and prosecution;
6. Renders patent drafting services;
7. Organizes a community of experts to participate in patent examination;
8. Advices researchers on Intellectual Property issues and rights;
9. Renders IP audit and evaluation services;
10. Serves as a depository of patent-related documents, papers and statistics; and
11. Conducts seminars and fora on Intellectual Property Rights.

Center for Technology Transfer and Enterprise Development (CTTED)

1. Assists researchers to identify possible partners within the academe, other businesses and investors to promote translation of research innovations into new products;
2. Collaborates with the various colleges, research institutes/centers, and other units in the University on matters concerning technology transfer and commercialization;
3. Establishes and collaborates with network of commercial and venture contracts, and promote the advancement of innovation within and outside the University;
4. Pursues commercialization through expert market analysis, intellectual property protection, and license and partnership negotiation;
5. Provides licensing support;
6. Provides assistance to researchers to secure attractive returns in the long term from the commercialization of valuable research outcomes and intellectual property;
7. Provides a portfolio of new technologies created through University research for licensing;
8. Collaborates with industry and other stakeholders on technology creation, adoption and commercialization;
9. Assesses University inventions/innovations for their commercial potential;
10. Assists in the disclosure and patenting processes;
11. Assists in facilitating transfer agreements and in raising capital for the University; and
12. Conducts seminars and trainings on technology transfer and commercialization of research products.

Publications Office (PO)

The Publications Office takes charge of ensuring the efficient and effective production of high-quality university publications that include, but are not limited to, the PUP Annual Report, university research journals, monographs and other publications.

Collectively, the Publications Office performs the following functions:

1. Prepares layout, performs technical editing, prepares for publication and/or prints the University research journals;
2. Prepares layout and/or prints the University's Annual Report;
3. Prepares layout and prints monthly issues of *The Observer*;
4. Supervises publication of the midyear and year-end *Memorabilia*;
5. Prepares layout and/or prints souvenir programs, commemorative issues of periodicals, and other printed materials;
6. Prints various University forms, office forms and other printing requirements during University activities; and
7. Performs other tasks as maybe required by the VP for Research, Extension, Planning and Development.

Editorial and Layout Section (ELS)

- 2. Performs technical editing work on books, manuals, magazines and other materials;
- 3. Provides graphic designing services for tarpaulin, logo, poster, certificates, and other printed materials;
- 4. Provides typesetting/layouting services for journals, newsletters and brochures; and
- 5. Facilitates conduct of photoshoot for the *Memorabilia*.

Printing and Production Section (PPS)

PUP Sto. Tomas Campus Research Ethics Committee (CREC) effective AY 2024-2025

July 27, 2023

Dr. MANUEL M. MUHI
President
This University

Thru: **Prof. PASCUALITO B. GATAN**
Vice President for Branches and Satellite Campuses

Dear Dr. Muhi:

The Polytechnic University of the Philippines Sto. Tomas Branch would like to request for the issuance of a Special Order to the following for being part of the Research Committee in addition to their task for the School Year 2022-2023

RESEARCH COMMITTEE
ACADEMIC YEAR 2022-2023

Chairman – Engr. Liza Marie B. Nuevo

Co-Chair – Ms. Jori Lace R. Basbas

Language and Format Editing Representatives – Dr. Ginalyn Panghulan, Ms. Resylyn Cabrera

Ms. Anna Mariel Ramos, Mr. Fidel Maliksi,

Ms. Annabelle Salud

Ethics Board Representative – Engr. Verna Magnaye and Dr. Melanie Castillo

Members:

Psychology Program – Dr. John Mark Distor

Accountancy Program- Assoc Prof. Romelyn C. Endozo

Industrial Engineering Program- Engr. Romeo G. Ilagan and Engr. Ruel Tuan

A. Bonifacio Street, Poblacion 2, Sto. Tomas, Batangas 4234

Thru: **Engr. Liza Marie B. Nuevo**
Head, Academic Programs

Dear Sir:

Greetings of peace and goodwill!

May I humbly request from your good office the creation of PUPSTB Research Committee with the following functions:

- formulate/initiate revisions of PUPSTB Research Thrusts & Priorities attuned to the needs of the branch
- develop/adopt policies and guidelines concerning research-related activities in consonance with the university policies on research
- organize/co-organize research capacity-building activities
- prepare/initiate/monitor research proposals and research-related projects
- initiate action researches among clustered course programs
- monitor regular tracer studies
- assist the branch in its technology adoption, utilization, and commercialization of research outputs, utility models, and systems design
- monitor copyrighting and patenting of the branch's research production
- establish linkages with local/national/international agencies for funding support and assistance
- promote collaborative and interdisciplinary researches from within and outside of the branch
- support student, staff, and faculty GAD-related researches
- assist PUPSTB Extension Committee in its research-related needs
- support concerned faculty to meet the requirements of ReAP3

Attached is an endorsed list of officers and members for your approval.

Thank you for your usual courtesies and support.

Respectfully yours,

Dr. Ariel P. Tuazon
Faculty Researcher

THE COUNTRY'S 1ST POLYTECHNIC

Sample of Ethics Clearance Certificates from Ethics Board Committee

Republic of the Philippines
POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
OFFICE of the VICE PRESIDENT for RESEARCH, EXTENSION, and DEVELOPMENT
RESEARCH MANAGEMENT OFFICE
UNIVERSITY RESEARCH ETHICS CENTER

Date: 17 October 2025

TO/FOR: Janna Mae H. Macatangay
Jomar G. Castillo
John Stephen Galanilla
Ken Aeron R. Milorin
Edcel R. Esquivel
Jamiel Bryan T. Reaño

Subject: Ethical Clearance

From: *Aldimaratae*
Aileen Camille B. Dimatatac
Chief, Research Ethics Section

This is to inform you that the documentary requirements you submitted for your research project titled: **"TODARESCUE: A MOBILE APP SOLUTION FOR IMPROVING SAFETY AND EFFICIENCY IN TRICYCLE TRANSPORT"** passed the evaluation of the PUP Research Ethics Committee (REC) under the requirements set by the Philippine Health Research Ethics Board (PHREB).

UREC Code	2025-0517
Type of Review	EXPEDITED
Approval Date	17 October 2025
Expiry Date	16 October 2026
PUP-UREC Decision	Approved

The standard conditions of this approval are as follows:

1. Conduct the project following the submitted and approved research protocol and other documentary requirements.
2. If changes are to be made in the research project/study that will affect the research participants, an amendment of the research protocol must be submitted to urec@pup.edu.ph before implementing such changes.
3. When ethical clearance is about to expire, the researcher must apply to resubmit the research protocol.
4. A final report/terminal report must be submitted when the research project/study is complete.
5. Researchers must advise the PUP-UREC (email: urec@pup.edu.ph) in writing if the research project/study has been discontinued.
6. You may now commence your research project/study. Good luck.

Chief, Research Ethics Section

This is to inform you that the documentary requirements you submitted for your research project titled **"LANDAS: A 2D GAMIFIED MOBILE APPLICATION ON PHILIPPINE HISTORY THROUGH CULTURAL GAMEPLAY AND IMMERSIVE LEARNING"** passed the evaluation of the PUP Research Ethics Committee [REC] under the requirements set by the Philippine Health Research Ethics Board (PHREB).

UREC Code	2025-0520
Type of Review	FULL
Approval Date	17 October 2025
Expiry Date	16 October 2026
PUP-UREC Decision	Approved

The standard conditions of this approval are as follows:

1. Conduct the project following the submitted and approved research protocol and other documentary requirements.
2. If changes are to be made in the research project/study that will affect the research participants, an amendment of the research protocol must be submitted to urec@pup.edu.ph before implementing such changes.
3. When ethical clearance is about to expire, the researcher must apply to resubmit the research protocol.
4. A final report/terminal report must be submitted when the research project/study is complete.
5. Researchers must advise the PUP-UREC (email: urec@pup.edu.ph) in writing if the research project/study has been discontinued.
6. You may now commence your research project/study. Good luck.

THE COUNTRY'S 1ST POLYTECHNIC

Systematic And Effective Procedures Research

Environment of Research

Research Management

Research and Extension Management Office (REMO)

This is the research and extension arm of the University that takes charge to initiate new research activities; to manage, monitor and assist in grant applications, research project evaluation, monitoring as well as identifying funding windows for approved research proposals and projects. REMO is also in charge of the implementation of the university extension program and serves as support arm for college/branch extension activities. In particular, REMO conducts research and extension capability-building programs to encourage and train the academic and non-academic staff on research and consultancy, and secures research and extension grants and projects. Furthermore, REMO is the support arm of the University Research and Evaluation Committee (UREC). Cluster Research and Extension Coordinators (RECs) are designated under the Office to facilitate, coordinate and monitor the research and extension program of the University.

The following are the core functions of the Office:

1. Recommends plans, programs, projects, and policies relative to research planning and program/project development to the Vice-President for Research, Extension, Planning and Development;
2. Assists in the implementation of policies on research, planning and development programs of the University;
3. Prioritizes research programs that have significant impact and contribution to the University's research thrusts and priorities;
4. Conducts institutional researches that would address efficiency and effectiveness of the services offered by the University to its stakeholders and the larger community;
5. Provides administrative and technical support to University researchers and faculty members to harness their research capability and skills;
6. Assists the conduct of the student/faculty evaluation;
7. Provides technical assistance to faculty and students in the preparation of research designs and in the collection, processing, analysis and interpretation of research data; and
8. Establishes and maintains linkages with national institutions with similar educational goals to facilitate the conduct of various researches.
9. Oversees the operation of its attached centers. REMO has two centers with distinct functions:
 - Center for Research Management Services (CRMS)

1. Conducts research evaluation
2. Monitors the implementation of the approved internal and external research projects
3. Forges research partnership and collaboration
4. Conducts fund-sourcing for research projects
5. Implements research capability-building program
6. Organizes programs and activities to motivate research production and publication
7. Conducts research dissemination (national and international conferences)

Research Administrator

University Research Process, Proposal, and Review

PUP encourages its faculty members and staff to submit research proposals to be funded by the University. Proposals submitted will be evaluated by the University Research Evaluation Committee (UREC) according to the research program areas in which they belong (Please refer to Chapter 1 for the University Research Agenda).

The UREC is composed of seven members, namely:

- **Chair:** The Vice President for Research, Extension, Planning and Development
- **Vice-Chair:** The director of research institute relevant to the proposal/s under consideration
- **Members:** Chief of the OVPREPD Office/Center relevant to the proposal/s under consideration;
- Two (2) faculty experts from the colleges/branches/campuses;
- Two (2) industry experts relevant to the proposal/s under consideration.

Because of the differing academic expertise required in each research program area, each will have two (2) UREC faculty experts of its own. These faculty experts will be selected by the VPREPD upon the recommendation of the college deans concerned. Only the VPREPD will sit regularly in all the UREC meetings. Industry experts will be invited to sit in the Committee to be recommended by the college dean. The Director of the Research and Extension Management Office (REMO) shall constitute the Committee’s secretariat. Proposals that have satisfactorily met the UREC standards based on the approved criteria will be endorsed by the VPREPD to the University Executive Committee for University funding (See Appendix ___ - UREC Evaluation Criteria) The second task of the UREC is to review the terminal research reports of the completed projects. The UREC shall give their assessments of the report within two weeks after its submission by the proponent/s. The UREC approval is one of the three requirements before the proponent/s can be paid their honoraria.

Call for Research Proposal

OVPREPD shall encourage and invite faculty and staff from colleges, branches departments and other offices to submit research proposals for possible funding through call for papers in university publications, PUP website and other means. Call for Research Proposals starts on the 1st quarter of the year. Researchers must have their proposals evaluated first at the department and college/branch levels for possible endorsement to the REMO. The REMO shall post acceptance of research proposals online through the official PUP website under the OVPREPD link and send an acceptance letter to the official email address of the proponent.

The project proponent/s is/are required to submit the research proposal following the prescribed format (See Appendix _ - PUP Research Proposal Format). REMO will conduct initial technical evaluation of the submitted proposals based on the prescribed format before its endorsement to the UREC. If found not in compliance with the prescribed format, the proposal will be returned to the proponent/s.

The proponent submits his/her research proposal in three copies to the Department for endorsement to the College/Campus/Extension Committee for evaluation. If found to be worthy of endorsement, such proposal will be forwarded by the College Dean or Campus/Extension Director to REMO for categorization by program area.

Part of the proposal to be submitted are the following which can be found in the appendices:

Terms of Reference (Form 1)

- Line Item Budget (Form 2)
- Schedule of Outputs/Tranche Releases (Form 3)
- Work Plan (Form 4)

The research proponent/s must ensure that biosafety concerns are addressed prior to the approval of the proposal. All research proposals must comply with the biosafety indexes pursuant to Executive Order No. 430 otherwise known as Creating the National Committee on Biosafety of the Philippines and its mandates (See Appendix C – Executive Order No. 430).

Review and Evaluation

Proposals that fall within the scope of the University Research Agenda will be classified according to which research program area they belong. A University Research Evaluation Committee (UREC) specific for each program area will be formed to review and evaluate the proposals submitted. The proponents/s will be asked to present the proposal to the Committee. After studying the proposals individually, the UREC members will convene for deliberations. A final decision will be made when all issues relating to the proposal being evaluated have been discussed and resolved.

The project proponent/s may be summoned by the UREC, if necessary, to clarify points that may be raised in the deliberations.

Proposals that require revisions will be sent back to the proponents with suggestions from the UREC. Revised drafts must be submitted to the UREC not later than one month after the proponent’s receipt of the UREC’s evaluation. The project proponent/s shall be notified of the evaluation results at least a week after the UREC’s quarterly meeting. All communications from the UREC regarding evaluation results shall be made with strict confidentiality.

If, for some reasons, the University cannot finance the proposed research, it shall, through the REMO, purposely search, negotiate and mobilize sources of research funds from both local and foreign institutions. Whenever available, the particular research guidelines of prospective funding agency/ies will be provided to the proponent/s.

It is the OVPREPD-REMO’s responsibility to ensure that the proponent/s have satisfied the minimum requirements set by the external funding agency/institution before the University President endorses the proposal.

Endorsement by the UREC

Proposals applied for University funding and have passed UREC screening will be endorsed to the University Executive Committee for final approval and inclusion in the proposed University budget. On some occasions, the University Executive Committee members may ask the project proponent/s to appear before them to clarify points pertinent to the proposal/s.

As a general policy, the completion of any previously approved University research project by a proponent is a requirement for the approval of any new application for university funding and/or endorsement for external funding by the same.

The Executive Committee has the final approval of the proposal/s. It has the authority to disapprove the proposal and may ask the UREC to reevaluate it based on the comments of the EXECOM members.

Approval of the Research Proposal

Once the EXECOM approved the research proposals, the proponent/s and PUP will enter into research contract/MOA before the release of funds and implementation of the research project. The agreement will be the basis of implementation of the research project. (See Appendix _ - Sample Contract/MOA)

Criteria in Thesis and Dissertation Grant

Upon approval of the administration, a fulltime faculty member or administrative employees shall be provided grant to aid him/her in thesis/dissertation writing towards the completion of a graduate degree. The amount shall depend on the graduate level completed which is as follows:

- Master’s degree - P30,000.00
- Doctorate degree - P 50,000.00
- Post doctorate degree - P 80,000.00

A faculty member or employee who has been granted a thesis grant may still be eligible for a dissertation grant. No faculty or employee shall be afforded another thesis grant for a second master’s degree or a dissertation grant for a second doctorate degree. The aforementioned grant shall be provided on the condition that the research output is presented in a national or international conference and/or published in a national or international refereed journal.

Criteria for Dissertation Financial Assistance

Criteria for National Paper Presentation Financial Assistance

Criteria for International Paper Presentation Financial Assistance

Article 3 GENERAL PROVISION

Section 3 Amount of Support

- 3.1. Each keynote speaker, plenary speaker, resource speaker, and member of the organizing committee shall be receiving funding support to cover the most affordable economy-class-roundtrip-airfare; pre-departure expenses and return trip fees not exceeding ₱3,500 (per Executive Order 77, series of 2019 Section 11 and 12); and actual prevailing DSA during the IRA period but shall not exceed to 1,000 USD for every IRA to be held in ASEAN, Taiwan, and Hongkong.
- 3.2. Each keynote speaker, plenary speaker, resource speaker, and member of the organizing committee shall be receiving funding support to cover the most affordable economy-class-roundtrip-airfare; pre-departure expenses and return trip fees not exceeding ₱3,500 (per Executive Order 77, series of 2019 Section 11); and actual prevailing DSA during the IRA period but shall not exceed to 1,500 USD for every IRA to be held outside ASEAN, Taiwan, and Hongkong.
- 3.3. The DSA shall only start upon arrival at the country of destination and shall cease upon departure from that place at the following percentages:

Particulars	Percentage	To Cover
of arrival at the point of destination (regardless of time) and succeeding day/s thereof on official business	100%	ding (50%), meals (30%), and incidental expenses (20%)
departure for a permanent official station (regardless of time) if other than the date of arrival	50%	s (30%) and incidental expenses (20%)

- If the sending country or institution provides hotel/lodging, meals, and incidental expenses, the DSA shall not be allowed. Per Executive Order 77, series of 2019 Section 14(a), (b), and (c), claims of payment of DSA shall not require the presentation of bills and receipts.
- In the case that airfare is provided by the sending country or institution, only DSA shall be provided.
- 3.4. Invited keynote speakers, plenary speakers, resource speakers, and organizing committee members shall be given financial assistance, either the most affordable economy-class roundtrip airfare or DSA, provided that they shall not receive the same from their sending institution.

3.5. Honoraria of the keynote speakers, plenary speakers, and resource speakers shall be based on the existing and most recent Department of Budget and Management circulars on honoraria and other professional fees.

Criteria for University Publication Assistance

Publication Financial Support and Incentives

The University shall provide the following support and incentives for every publication (including empirical research essays, policy papers, theoretical papers) in local, national and international refereed publication, to wit:

8.1 Publication Financial Support and Incentives

Level of Publication	Financial Support/Incentive	
	Non-ISI- / Scopus-Indexed	ISI- / Scopus-Indexed
Local / Institutional Journals	Php2,000.00	-
National and CHED accredited Journals	Php10,000.00	Php30,000.00
International Journals	Php10,000.00	Php30,000.00

8.2 Citation Incentives

The University shall provide cash incentives of P20,000.00 for every work cited by other authors/scholars in an international ISI-/Scopus-indexed journal.

8.3 National and International Recognition Incentives

The University shall provide the incentives of P30,000.00 (for national level awards) and P50,000.00 (for international level awards) for a research publication recognized and awarded by prestigious national or international body of research organization/institution.

Criteria for Citation Incentive

For each citation, a cash incentive of Three thousand Pesos (Php 3,000) for WOS/ISI/SCOPUS, two thousand pesos Php2,000.00) for CHED Recognized Journal, one thousand pesos (Php1,000.00) for PASUC Accepted Journal Article, and five hundred (Php500.00) for Institutionalized/University Journal.

This incentive is in accordance with the decision made by the PUP Board of Regents in a Memorandum Order No. 29s2019.

Criteria for Invention Disclosure Incentive

Invention Disclosure Incentives

The Invention Disclosure Incentives is granted to inventors, researchers, faculty members, students, and administrative staff of the Polytechnic University of the Philippines, who as part of their usual duties and scholarly activities carry on research which may be supported in part, or in whole, by the University or by grants and contracts with outside sponsors. Recognizing that many new ideas, discoveries, and inventions inevitably flow from university research to practical and commercial application, it is in the interest of the University to encourage the development of such new ideas, discoveries and inventions; to reduce these inventions to practical and commercial application where resources permit; and to give adequate recognition and incentive to the inventors by having them share in the proceeds from any invention.

The main purpose of the Invention Disclosure Incentives is to encourage innovation and increase patenting activity in the University. The University acknowledges the necessity to provide policies to promote and encourage excellence, creativity and innovation in research and other scholarly works by identifying and protecting the rights of the University, its faculty, staff and students.

Based on Memorandum Order No. 21s2019, the following incentives shall be granted for Inventions to wit:

Section 4.0 Incentive Schemes

4.1 A total amount of Php100,000.00 is awarded per patent invention to faculty member/s, students, and administrative personnel who are issued/granted a certification from the Bureau of Patents, Intellectual Property Office -Philippines (IPO-PHIL). Each stage of patent application will have a corresponding amount of incentive, as follows:

STAGES OF APPLICATION OF AMOUNT OF INCENTIVE

- Decision to Grant Patent Php 10,000.00
- 1st Publication of Patent in IPO Gazette Php 15,000.00
- 2nd Publication of Patent in IPO Gazette Php 25,000.00
- Issuance of Patent Certificate Php 50,000.00.

4.2 For faculty members, students, and administrative personnel who are granted a certificate of Utility Model/Industrial Design, a fixed amount of Php20,000 is awarded per technology.

4.3 A Faculty member or administrative personnel entitled to “One Rank Vertical Promotion” for any “sole patent invention” once a patent certification is issued/granted and “One Step Increment” for any “sole Utility Model/Industrial Design” once a certification is issued/granted by the Bureau of Patents, Intellectual Property Office of the Philippines.

4.4 A regular faculty with technical expertise who acted as patent drafter of patentable R&D output/invention outside of his official functions shall likewise be entitled to receive incentive once certified by the Bureau of Patents, Intellectual Property Office of the Philippines with the following incentive scheme:

- PatentPhp 30,000.00 Utility Model (Petty Patent)
- Php 10,000.00 Industrial Design (Design Patent)
- Php 10,000.00

4.5 The grant of incentive is applicable only to patent, utility model or industrial design application filed through the Intellectual Property Management Office of the University. However, no incentive shall be granted to those applications without the name “POLYTECHNIC UNIVERSITY OF THE PHILIPPINES” as CO-APPLICANT.

4.6 If the invention is a result of collaboration among multiple inventors from the University and outside entity, the incentive shall be shared by the collaborating inventors in accordance with the determination of their participation or contribution in the authorship or invention.

Criteria for Internally Funded Research

Internally-Funded Research

Internally funded researches are university-sponsored projects that have been incorporated in the budget proposal for a given year. To be eligible for direct University funding, research proposals have to be submitted to the University Evaluation Committee (UREC) not later than first week of October of every year for screening and endorsement of the Committee. Upon approval of the University President through the recommendation of the Vice President for Research, Extension, Planning and Development (VPREPD), the actual funding for the approved project proposals will be provided on the fiscal year that follows.

A memorandum of Agreement (MOA) shall be entered into by the University and the proponent/s of the research project stipulating both the extent of support granted to the researcher/s and the project deliverables expected from the proponent. Monitoring of University-funded research rests on the Research and Extension Management Department (REMD). Disbursement of fund is subject to existing University accounting and auditing rules.

Criteria for Externally Funded Research

Externally-Funded Research

2.1 Funding Agency-supported Research

Proposals submitted to the REMD that have passed the screening or peer review, will be endorsed by the University to outside agencies for possible funding. In addition, REMD shall post titles and project descriptions in the internet to attract would-be sponsors.

The REMD will endorse eligible proposals to the proper agencies in accordance with their requirements and research priorities. Project monitoring rests on the REMD, although the proponents are not barred from reporting directly to their funding agency. Utilization of funds from external sources shall be decided by both the research proponents and funding agency to be stipulated in the MOA between the University and the funding agency.

2.2 Commissioned Research

The University, or outside agencies through the University, may commission a faculty member, an administrative staff member, or a group of faculty members/administrative staff to conduct research on a particular problem. Faculty members and/or administrative staff commissioned to conduct the research should prepare the proposal and submit the same to the UREC for evaluation and endorsement to the commissioning institution. In the case of a faculty member or a college who gets or is invited and commissioned to conduct the research, this should be properly reported to and coordinated by the REMD.

A MOA shall be entered into by the heads of both the University and the commissioning agency, or their authorized representatives, stipulating the obligations of the parties involved. Project monitoring rests on the REMD, although the proponents are not barred from reporting directly to the commissioning agency. Disbursement of fund is subject to existing University accounting and auditing rules.

Criteria for Gawad Tuklas

2.2 Gawad Tuklas

2.2.1 The nominee must have established a reputation in funded research works aligned to their field of specialization.

2.2.2 The nominee shall have at least two (2) completed and funded research works in the past six (6) years/ three (3) R&D Cycles before the nomination. These funded research works must have been coordinated, well-documented, and legally binding between and among researchers, the University, and/or the external agency.

2.2.3 The nominee shall have at least H-index three (3) on Google Scholar.

2.2.4 The nominee shall have at least three (3) publications in a research journal indexed in Scopus (regardless of quartile) and/or Web of Science-Core Collection.

2.2.5 The nominee must be the lead/co-lead/member of the research team in all the funded research works.

2.2.6 There shall be seven (7) recipients of this award per specialization: Education, BAF, EAD, HULACOM, Social Science, CSIST, and SMS.

2.2.7 The nominee, with a minimum of three (3) completed and funded basic research works, shall be considered for this award.

Type of Funded Research Works	Collaboration	Credits	Maximum Credits
Basic Research Work	Local Government Agency (barangay & municipal levels)	1	2
	Local Government Agency (city & provincial levels)	2	4
	Higher Education Institution (SUC, LUC, Private Universities and Colleges)	3	9
	National Government Agency (CHED, PNP, DOST, AFP, etc.)	3	9
	Non-Governmental Organization	1	2
	Government Owned and Control Corporation	1	2
	Foreign Institution/Organization	5	20

2.2.8 The nominee who is involved in a completed and funded research work with at least Php 5,000,000.00 of MOOE shall be considered for this award. Further, the amount granted shall be transferred to the University in full.

Type of Funded Research Works	Collaboration	Credits	Maximum Credits
Applied Research Work	Local Government Agency (barangay & municipal levels)	1	2
	Local Government Agency (city & provincial levels)	2	4
	Higher Education Institution (SUC, LUC, Private Universities and Colleges)	3	9
	National Government Agency (CHED, PNP, DOST, AFP, etc.)	3	9
	Non-Governmental Organization	1	2
	Government Owned and Control Corporation	1	2
	Foreign Institution/Organization	5	20

2.2.9 To qualify as a recipient of the award, a qualifying score of 10 credits shall be earned from both type of funded research works. Thus, the nominee shall earn credits in both types of research work.

2.2.10 The nominee with the highest earned credits shall per specialization shall receive the award.

Criteria for Gawas Lathala

2.3 Gawad Lathala

2.3.1 The nominee shall have at least H-index 5 on Google Scholar.

2.3.2 The nominee shall have at least four (4) research articles published and indexed in Scopus (regardless of quartile) and/or Web of Science-Core Collection in at least four (4) research journals indexed in Scopus and/or WoS Core Collection.

2.3.3 This excludes systematic review of literature (meta-analysis and bibliometric). However, research articles published using critical analysis approach and doctrinal legal research (black letter) methodology shall be considered.

Criteria	Minimum Qualification	Coverage
H-index (Google Scholar)	5	In the past three (3) years
Published research articles indexed in Scopus and/or WoS Core Collection	4	
Research journals where articles are published and indexed in Scopus and/or WoS Core Collection	4	

2.3.3 The topmost published researchers in each area of specialization: Education, BAF, EAD, HULACOM, Social Science, CSIST, and SMS (verifiable on Scopus and/or Web of Science Core Collection databases) in the past year, either teaching or non-teaching staff, shall receive the award.

2.3.4 In case a number of faculty members earned the same number of publications and are qualified for this award, they shall be recognized and awarded.

2.3.5 The Scopus/WoS Core Collection-indexing of submitted research works shall be active at the time of application and evaluation of the Award Committee.

Criteria for Merit Promotion

EXECUTIVE ORDER

No. 07, Series of 2024

TO : ALL CONCERNED

SUBJECT : REVISED POLICY ON MERIT PROMOTION THROUGH
RESEARCH PRODUCTION, PUBLICATION, AND CITATION

DATE : January 11, 2024

Article 1: PURPOSE

The University, as approved by the Board of Regents during its 142nd Regular Meeting held on October 18, 2013, per Board Resolution No. 985, provides an opportunity for faculty members to avail of a merit promotion scheme on the basis of research publication and citation. In this promotion scheme, as supported by Civil Service Commission Memorandum Circulars (CSC MC) No. 24 series of 2017 and No. 19 series of 2005 and DBM-CHED JC No. 3, series of 2022, a faculty member or an administrative staff who has published a paper or is cited in Scopus/WoS-indexed journals and/or produced research works funded by the University and/or external agency shall be entitled to multiple step increments. The objectives of the scheme are (1) to encourage and reinforce the research productivity of faculty members; (2) to provide the due reward to faculty members who actively involve themselves in research undertakings; and (3) to motivate faculty members to be more vigorous in their responsibility as academic researchers.

As the University envisions itself becoming the National Polytechnic University (NPU), it needs to leverage the recognition and potential of its faculty members. Hence, the need to enhance the policy for merit promotion through research publication and citation complementing the Institutional Development Plan (IDP) and landscape of the Research Sector.

Article 2: SCOPE

This policy shall apply to all regular, temporary status, part-time faculty members (with at least 12 hours of teaching load, and administrative staff of the University who are at least master’s graduates and have been serving the University in the last three (3) years.

Article 3: GENERAL PROVISION

Section 1 Definition of Terms

- 1.1 International Journal Publication refers to those that include papers authored by researchers/contributors from across geographic locations and with international editorial board composition. To gain points in this scheme, international journal publications must necessarily be indexed by WoS/Scopus.
- 1.2 Web of Science (WoS) refers to bibliographic database services, citation indexing, and analysis. Its databases cover thousands of academic journals in the fields of science, engineering, arts, humanities, business, etc. The indexing also provides information on each journal’s impact factor in its databases. Web of Science WoS is internationally recognized as the most reliable and reputable index of scholarly journals in the world. Further, it is previously known as the Institute for Scientific Information (ISI).
- 1.3 Scopus refers to bibliographic databases, citation indexing, and analysis. It covers thousands of peer-reviewed literature and journals from educational institutions and professional organizations.
- 1.4 Faculty Rank (Rank) refers to the academic ranks of faculty members in state universities and colleges (SUCs) based on a set of qualifications. These academic ranks are Instructor, Assistant Professor, Associate Professor, Professor, and College/University Professor.
- 1.5 Faculty Sub-Rank (Sub-Rank) refers to the academic sub-ranks of each faculty rank in SUCs. Each faculty rank has at least three (3) sub-ranks and eight (8) step increments. Please refer to the table below illustrating the faculty ranks and sub-ranks.

TABLE 1: Matrix of Faculty Ranks, Sub-Ranks, Salary Grades, and Step Increments

Faculty Rank	Faculty Sub-Rank	Salary Grade	Step Increment
Instructor	I	12	1-8
	II	13	1-8
	III	14	1-8
Assistant Professor	I	15	1-8
	II	16	1-8
	III	17	1-8
	IV	18	1-8
Associate Professor	I	19	1-8
	II	20	1-8
	III	21	1-8
	IV	22	1-8
	V	23	1-8
Professor	I	24	1-8
	II	25	1-8
	III	26	1-8
	IV	27	1-8
	V	28	1-8
	VI	29	1-8
College/University Professor		30	1-8

1.6 Full Timer refers to faculty members occupying permanent plantilla positions and rendering an equivalent of 40 hours of work a week.

1.7 Funded Research Works refers to research works that received funding support from the University and/or external agency.

1.7 Part-Time Appointment refers to an issued regular plantilla position, as permanent, if the requirements of the position are met. The appointment is submitted to the CSC as it involves an appointment to a regular plantilla position only that the work is part-time. Service under a part-time appointment is government service and forms part of the faculty member's service record.

1.7 Step Increment refers to the increase in salary from step to step within the salary grade allocation of the official or employees' position in recognition of meritorious performance.

1.8 Temporary Status refers to an appointment issued to a person who does not meet the education, training, or experience requirements of the position to which he/she is being appointed not exceeding one school year.

Section 2 Eligibility

2.1 Only permanent, temporary status, and part-time appointment faculty members with at least a master's degree can avail of this scheme.

2.2 Only permanent, temporary status, and part-time appointment faculty members who are affiliated with the university in the last three (3) years.

2.3 Regular administrative employees with at least a master's degree and are part-time faculty members of the University can avail of this scheme.

2.4 In the case of faculty applicants, they must have at least an h-index of two (2) proving their cumulative impact as a published research scholar verifiable on Google Scholar.

Section 3 Limitation

3.1 The application for merit promotion through research publication and citation shall be every after two (2) years.

3.2 The merit promotion shall always be subject to the availability of plantilla positions as determined by the Human Resource Management Department.

3.3 Applicants whose faculty rank is Associate Professor V Step 8 can avail of this merit promotion to a faculty rank of Professor provided that they have been accredited by PASUC.

3.4 Applicants whose current academic rank is Professor can avail of this merit promotion provided that they have been accredited by PASUC.

- 3.5 Faculty members who are newly promoted through DBM-CHED JC No. 3, Series of 2022 and President's Prerogative may avail of this merit promotion only after a year.
- 3.6 Published research articles that have been submitted for DBM-CHED JC No. 3, Series of 2022, previous merit promotion applications, and research awards shall not be considered in this merit promotion.
- 3.7 The validity of all documents pertaining to the awarded internally and externally funded research shall begin from the time this policy is approved by the Board.
- 3.8 The validity of the required citations and submitted research articles shall begin from the time this policy is approved by the Board.
- 3.9 All admin staff who are part-time faculty members with a full-time teaching load shall be entitled to this scheme. This merit promotion shall be limited only to their per-hour teaching rate.
- 3.10 In the case of multiple applicants in the same rank/sub-rank, it is subject to the availability of the plantilla position and approval by the Board.
- 3.11 The merit promotion of faculty members each year shall not be more than 5% of the total faculty members.

SECTION 4.0 EVALUATION

- 4.1 An ad hoc committee will be constituted by the Office of the Vice President for Research, Extension, and Development (OVPRED) to evaluate the documents submitted by the applicants. The Committee shall be composed of a Chair (Vice President for Research, Extension, and Development), Co-chairs (Faculty Regent and HR Director), a Faculty Evaluation Office (FEO) Director, and three members.
- 4.2 The results of the evaluation of the ad hoc committee will be submitted to the Research Management Office (RMO) which shall serve as the Secretariat.
- 4.3 The decision of the ad hoc committee will be forwarded to the Executive Committee for endorsement and confirmation by the Board of Regents.

Article 4: IMPLEMENTING RULES AND REGULATIONS

Section 1 Documentary Requirements

- 1.1 Letter of application to the University President through the Vice President for Research, Extension, and Development which states among others his/her research publications and citations.
- 1.2 Tabular list of research works that are completed and published research articles with citations each verifiable through Google Scholar, Scopus, and/or WoS. This does not include self-citation.
- 1.3 Tabular list of funded research works with proof of funding from the University and/or external funding agency, progress reports, terminal reports, etc.
- 1.4 Copies of published research articles and journal articles where the applicant’s research works/articles are cited.
- 1.5 Proof/s of the WoS Core Collection and/or Scopus indexing verifiable on the Scopus and WoS databases under the profile of the University.
- 1.6 In the case of faculty ranks of Associate Professor and Professor, proof of internally and/or externally funded research in the last 10 years from the time of application.
- 1.7 Certification from the Faculty Evaluation Office (FEO) stipulating that the submitted research works are not part and shall not be part of the applicant’s submission in the previous and succeeding DBM-CHED JC No. 3, Series of 2022 cycle.
- 1.8 Other incidental requirements as may be deemed necessary.

Section 2 Credit System

- 2.1 Only research works certified by FEO, stipulating that these were not submitted and shall not be submitted in DBM-CHED JC No. 3, Series of 2022; published in WoS Core Collection and/or Scopus-indexed research journals and are verifiable in their Scopus and/or WoS author’s accounts; and/or research production covered by a notarized contract or Memorandum of Agreement (MOA) shall be granted credits. Applicants can earn credits from research production and/or research publication.
- 2.2 Credit system shall be employed in assigning the required credits for promotion which are based on the faculty member’s current rank, and the level at which the work appeared for publication.
- 2.3 An applicant for the Instructor sub-ranks must earn at least 30 credits from publication with at least two (2) citations for each published research article to be considered for three (3) step increments.

2.4 An applicant for the Assistant Professor faculty rank and sub-ranks must earn at least 40 credits from publication with at least two (2) citations for each published research article to be considered for three (3) step increments.

2.5 An applicant for the Associate Professor faculty rank and sub-ranks must earn at least 50 credits from publication with three (3) citations for each published research article to be considered for three (3) step increments.

2.6 An applicant for Professor sub-ranks must earn at least 60 credits from publication with at least four (4) citations for each published research article to be considered for three (3) step increments.

2.7 The applicant may avail of a maximum of nine (9) step increments that may result in crossing faculty ranks provided that the applicant has accumulated or earned the required credits.

The table below illustrates the matrix for assigning credits for promotion based on cited research works.

Matrix for Assigning Credits for the Promotion of Faculty Members based on Cited Research Articles in WoS/Scopus-indexed Journals

Authorship	Scopus/WoS-Indexed Research Journal		Required Credit	Step Increment	Requirement
Sole	20 Credits	Q3-Q4 Scopus-indexed and WoS-Core Collection-Indexed research articles	Instructor 30 Credits	3	- h-index 1 - one (1) citation for each submitted published research article
	30 Credits	Q1-Q2 Scopus-indexed research articles		3	
Multiple	The credits shall be divided among the number of authors of the research article.		Assistant Professor 40 Credits	3	- h-index 1 - one (1) citation for each submitted published research article
			Associate Professor 50 Credits	3	- h-index 2 - two (2) citations for each submitted published research article - one (1) internally or externally funded research work in the last 10 years from the time of application
			Professor 60 Credits	3	- h-index 4 - four (4) citations for each submitted published research article - two (2) published research articles as a lead author - two (2) internally or externally funded research works in the last 10 years from the time of application

Matrix for Assigning Credits for the Promotion of Faculty Members based on Research Production

Required Credit	Step Increment	Role	Source of Fund	Amount of Research Grant	
				At least 1,000,000.00	Above 5,000,000.00
Instructor 30 Credits	3	Team Leader	PUP	5	10
	3		External	10	20
Assistant Professor 40 Credits	3	Research Staff/Member	PUP	3	5
Associate Professor 50 Credits	3		External	7	15
Professor 60 Credits	3				

Section 3 Process Flow Chart

ACTIVITY FLOW	RESPONSIBLE	DETAILS
START Receipt of duly endorsed application with complete documentary requirements.	RMO Staff	A duly endorsed request with complete documentary requirements will be forwarded for technical evaluation.
Conduct Technical Evaluation Yes RMO will inform the Requester through Letter that she shall submit other requirements for clarification No	RMO	The Research Management Cluster Coordinators under the RMO will accomplish the checklist for Technical Evaluation. If the application passed the technical evaluation, the request will be forwarded to the Chief of Research Evaluation and Monitoring Center (REMC) for further pre-ad-hoc evaluation and to schedule the convention of the ad hoc committee. In case the request lacks further details or clarification, RMO will return the request to the applicant.
REMC schedules the convention of the ad hoc committee.	OVPRED	Once the request was endorsed to the President through the Office of the Vice President for Finance. RMO will regularly monitor it through the assigned tracking number (PUPDTS) and will regularly update the requestee/applicant.
REMC endorses the results of the Ad Hoc Committee to the President.	OVPRED	Once the application was endorsed to the President through the Office of the Executive Vice President. RMO will regularly monitor it through the assigned tracking number (PUPDTS) and will regularly update the requestee/applicant.
A	RMO	Quarterly review of processes, risks, and opportunities submitted to the QMS Sector Head emanated from the research progress report

ACTIVITY FLOW	RESPONSIBLE	DETAILS
A Review and Improve Activities through Research Monitoring		
Targets achieve? Corrective Action END	RMO	The Research Management Office Director and Chief shall check if the targets set are achieved or not. If targets are not achieved corresponding corrective actions shall be undertaken focusing on achieving the targets set by the section.

Article 5: SAVING CLAUSE

Cases not covered by the provisions of this Policy shall be submitted to the Office of the President for resolution.

Article 6: REPEALING CLAUSE

All previous issuances and other provisions that are inconsistent with any of the provisions of this Policy are deemed amended, repealed, and superseded accordingly.

Article 7: EFFECTIVITY

Effective immediately upon the approval of the Board of Regents during its 183rd Regular Board Meeting held on December 14, 2023.

Reasonable Budget Research

Research Capacity

Research Budget

UNIVERSITY RESEARCH BUDGET (FUNDING, SUPPORT, AND INCENTIVES)

Research Funding: Internal or External

The proposal passes through two routes for possible funding—**university** or **external**.

1. University Funding:

If considered for university funding, the University Research Evaluation Committee (UREC), which is composed of seven (7) members, will meet and conduct an initial interview with the proponent/s

This will be followed by the UREC deliberation and decision-making. If found to be workable and feasible for university support, the proposal will be forwarded to the EXECOM for approval. If approved for direct university support through the PUP GAA:

1. Contract signing between the researcher/s and PUP will follow.
2. The project/research is then implemented/conducted and completed within a given period as stipulated in the contract.
3. A quarterly Progress Report and a Terminal Report shall be submitted to REMO.
4. The completed project shall be submitted for patenting/copyrighting to the IPMO before its presentation in a conference and publication in any research journal.
5. The publishable copy of the completed research shall be submitted for publication in university/external refereed journal.

2. External Funding:

If considered for external funding, the University shall endorse the research proposal to external funding agencies. Once approved by the funding agency, a MOA/Contract signing between the university and the funding agency will be conducted. The guidelines and procedures of the funding agency on research grants will be followed, provided it will not violate any policies of the university. If there are no guidelines prescribed by the funding agency, the university guidelines will be followed.

UNIVERSITY RESEARCH FUNDING, SUPPORT AND INCENTIVES

The University, through the Office of the Vice President for Research, Extension, Planning and Development (OVPREPD), concretizes its fundamental commitment to research by providing the necessary institutional support, funding and incentives for researchers. These benefits and rewards for researchers are designed to intensify the quantity and quality of research outputs produced by teaching and non-teaching personnel in the University, reinforce the culture of research, and contribute to knowledge generation, which is an indispensable function of an institution of higher learning.

Who are Eligible for Funding and Incentives

Any of the following parties may apply as a project proponent and be eligible for University support, funding and incentives:

1. An academic department or college in the University;
2. An administrative office or research institute/center in the University;
3. A duly recognized faculty and/or administrative organization in the University;
4. An individual or a group of full-time (regular and temporary) faculty members of the University;
5. An individual or a group of permanent administrative employees of the University;
6. A part-time faculty member, in collaboration with a regular faculty member of the University;
7. A bonafide student under the supervision and in collaboration with a regular faculty member of the University; and
8. A regular faculty member of the University in collaboration with researchers from other universities and/or external agencies.

Research Funding

The University shall annually allocate funds for the conduct of institutional and specialized researches, acquisition of books and project-related equipment, subscription to periodicals, professional journals and other similar publications. Funding may also be generated through external sources such as grants, donations, bilateral agreements, collaborations with government and private agencies, and other local and foreign funding institutions.

1. Internally-Funded Research

Internally funded researches are university-sponsored projects that have been incorporated in the budget proposal for a given year. To be eligible for direct University funding, research proposals have to be submitted to the University Evaluation Committee (UREC) not later than first week of October of every year for screening and endorsement of the Committee. Upon approval of the University President through the recommendation of the Vice President for Research, Extension, Planning and Development (VPREPD), the actual funding for the approved project proposals will be provided on the fiscal year that follows.

A memorandum of Agreement (MOA) shall be entered into by the University and the proponent/s of the research project stipulating both the extent of support granted to the researcher/s and the project deliverables expected from the proponent.

Monitoring of University-funded research rests on the Research and Extension Management Department (REMD). Disbursement of fund is subject to existing University accounting and auditing rules.

2. Externally-Funded Research

2.1 Funding Agency-supported Research

Proposals submitted to the REMD that have passed the screening or peer review, will be endorsed by the University to outside agencies for possible funding. In addition, REMD shall post titles and project descriptions in the internet to attract would-be sponsors.

The REMD will endorse eligible proposals to the proper agencies in accordance with their requirements and research priorities. Project monitoring rests on the REMD, although the proponents are not barred from reporting directly to their funding agency. Utilization of funds from external sources shall be decided by both the research proponents and funding agency to be stipulated in the MOA between the University and the funding agency.

A MOA shall be entered into by the heads of both the University and the commissioning agency, or their authorized representatives, stipulating the obligations of the parties involved.

Project monitoring rests on the REMD, although the proponents are not barred from reporting directly to the commissioning agency. Disbursement of funds is subject to existing University accounting and auditing rules.

Project Budget Allocation

A research proposal submitted to the UREC should be accompanied by a detailed budget, which must be strictly followed once the proposal is approved. No allotment for one item may be reallocated to another item, unless otherwise approved by the authorized finance officers. The proponent may not be given additional budget beyond what is stipulated in the MOA.

For all types of externally funded project, at least ten percent (10%) of the total project cost goes to the University to cover administrative costs.

2.2 Commissioned Research

The University, or outside agencies through the University, may commission a faculty member, an administrative staff member, or a group of faculty members/administrative staff to conduct research on a particular problem. Faculty members and/or administrative staff commissioned to conduct the research should prepare the proposal and submit the same to the UREC for evaluation and endorsement to the commissioning institution.

In the case of a faculty member or a college who gets or is invited and commissioned to conduct the research, this should be properly reported to and coordinated by the REMD.

Support, Funding and Incentives

Subject to the availability of resources, the following support and incentives may be granted by the University:

1. Honoraria

Honorarium is the incentives granted to researcher/s for service rendered beyond the minimum/regular workload to encourage productivity. Researcher/s involvement include conceptualization of research, implementation of research and development activities, conduct of activities on research and development and other management functions in the implementation of research and development activities.

The proponent/s shall be entitled to due honorarium as project consultant/s and/or research assistant may also be granted honorarium.

For internally-funded research, the total honoraria shall not exceed twenty-five percent (25%) of the annual basic salary of the personnel involved in the project. The honoraria shall be based on the DBM Budget Circular No. 2007-2 or the Department of Budget and Management Guidelines on the Grant of Honoraria Due to Assignment in Government Special Projects.

For externally-funded research, honoraria shall be based on the stipulation in the project contract or MOA.

Non-teaching personnel can only engage in research as consultants and whatever remunerations they will get from the project shall be paid for services done outside official time.

The total cost of the research projects shall be charged to the University fund including the benefits stated in this section, unless the grant is externally funded in which the fund sourced outside shall be held in trust by the University, and shall follow the schedule of access by the proponent/s as stated in the approved proposal and following the usual accounting and auditioning regulations of the University.

Honoraria will be paid upon submission of the progress reports as stipulated in the MOA. Payment of honoraria for the last two months of the project will be deferred subject to the last fulfillment of the terminal requirements, i.e., submission of the terminal research report, holding off the research conference, and submission of a publishable version of the terminal research report.

2. Salary

Depending on the magnitude of the project, proponent/s may hire research assistants who are not full-time employees on the University on a project basis. Full-time faculty members or full-time employees of the University are not entitled to salaries/wages other than those they are currently receiving as employees of the University. They may, however, be entitled to honoraria.

The hiring of student/s as research assistant/s may be allowed on a case-to-case basis depending on the type of research project conducted. Students will be paid in accordance with the rules and regulations governing payment of Honorarium/allowance of student assistant in the University.

3. Operating Expenses

These cover travel costs, supplies and materials, and sundries (e.g., telephone calls, faxes, etc.). Only the main project proponent or project leader may request for cash advances for operating expenses. Request for cash advances have to be approved by the University President, upon the recommendation of the Vice President for Finance (VPF). The request must be duly countersigned by the VPREPD.

A succeeding cash advance shall be allowed only after liquidation of the previous cash advance.

4. Books and Equipment

All books and equipment purchased for the purpose of the research project become University property and should be properly turned over to the appropriate office upon the completion/termination of the project.

5. Reduction of Teaching Load

Only full time faculty shall be entitled to a reduction of teaching load. The Faculty may be deloaded with twelve (12) from the regular fifteen (15) units with corresponding night pay. A faculty member, however, may be allowed to carry a maximum of twelve (12) units of part-time teaching load, but shall not be allowed to handle any temporary substitution load. The total allowable teaching units of fulltime faculty who is into a research contract with the University shall be fifteen (15) units only.

Qualified part-time faculty members who are not employed by other agencies shall carry a maximum of twelve (12) units of part time teaching load. They shall be allowed, however, to handle temporary substitutions depending on the nature and the scope of their participation in the research.

6. Promotion

To encourage and reinforce research productivity, faculty members shall receive due promotion on the basis of their research outputs.

It is to be understood that a faculty member who is subject for promotion, must have satisfied the minimum requirements set by the Civil Service Commission and as provided for in the National Budget Circular (NBC) 461 for the said promotion.

In this promotion scheme, a faculty member who has published a paper in national or international refereed or peer-reviewed journals shall be entitled to one rank or sub-rank promotion.

National publication refers to journal publication accredited by the Commission on Higher Education (CHED) through its Journal Accreditation Service. International journal publications are those that include papers authored by researchers/contributors from across geographic locations, and with international editorial board composition.

Refereed journals, in this promotion scheme, are classified as non ISI/Scopus-indexed or ISI/Scopus-indexed.

Only full papers published in these journals shall be granted credits or points.

Point-system shall be employed in assigning the required points/scores for promotion which is based on the faculty member's current rank, the level at which the work appeared for publication, and whether the publication is ISI or Scopus-indexed or not. The table below illustrates the matrix for assigning credits for promotion based on research publication.

**Matrix for Assigning Credits for Promotion of Faculty Members Based on Research
Journal Publication**

To be eligible for a rank or sub-rank promotion, a faculty member must accumulate the number of points corresponding to his/her rank. For instance, an Instructor I to be promoted to Instructor II sub-rank must acquire a total of fifteen (15) points, while the sub-rank promotion for the Professor level requires 40 points.

7. Conference Funding

Travel grants covering round trip transport fares, conference fee, per diem allowance shall be made available for grantees presenting papers in national and international conferences subject to relevant existing government policies.

8. Publication Financial Support and Incentives

The University shall provide the following support and incentives for every publication (including empirical research essays, policy papers, theoretical papers) in local, national and international refereed publication, to wit:

8.1 Publication Financial Support and Incentives

Local/Institutional Journals	Php 2,000.00	
National and CHED accredited Journals	Php 10,000.00	Php 30,000.00
International Journals	Php 10,000.00	Php 30,000.00

8.2 Citation Incentives

The University shall provide cash incentives of P20,000.00 for every work cited by other authors/scholars in an international ISI-/Scopus-indexed journal.

8.3 National and International Recognition Incentives

The University shall provide the incentives of P30,000.00 (for national level awards) and P50,000.00 (for international level awards) for a research publication.

9. Awards

9.1 Plaque of Recognition

The University shall award a plaque of recognition to faculty members whose research output has made significant impact in the field and contribution to the vision of becoming an epistemic community, as exemplified by publications and citations in refereed journals, and the recognition bestowed upon the said work by prestigious award-giving bodies.

9.2 Annual Best Research Awards

The annual Best Research Awards will be granted to faculty and administrative employees of the University who have published their research along two-cluster- (1) Engineering and Sciences, and (2) Education, Humanities and Social Sciences. The awardees shall receive plaque of appreciation and corresponding monetary prizes per category as follows:

- First Prize: P25,000.00
- Second Prize: P15,000.00
- Third Prize: P10,000.00

In case of multiple authors, the prize shall be divided equitably among authors.

10. Thesis and Dissertation Grant

Upon approval of the administration, a fulltime faculty member or administrative employees shall be provided grant to aid him/her in thesis/dissertation writing towards the completion of a graduate degree. The amount shall depend on the graduate level completed which is as follows:

- Master's degree: P30,000.00
- Doctorate degree: P50,000.00
- Post doctorate degree: P80,000.00

A faculty member or employee who has been granted a thesis grant may still be eligible for a dissertation grant. No faculty or employee shall be afforded another thesis grant for a second master's degree or a dissertation grant for a second doctorate degree.

The aforementioned grant shall be provided on the condition that the research output is presented in a national or international conference and/or published in a national or international refereed journal.

11. Patents

A faculty member, employee and students whose work has been patented and applied for utility model and industrial design will be given the following incentives:

Utility Model/Industrial Design	P 5,000.00
Decision to Grant Patent	P10,000.00
Publication of Patent in IPO Gazette	P15,000.00
Issuance of Patent Certificate	P25,000.00
PCT Application	P50,000.00

12. Membership in the Society of Research Fellows

The University shall establish a Society of Research Fellows whose membership shall be composed of faculty members and administrative employees who have established themselves in the field of research and development in their respective disciplines. Members of the academe who have demonstrated outstanding track record and have consistently been recognized for their research outputs shall be invited in the PUP Society of Research Fellows. The following are the general criteria for membership:

1. A doctorate degree in the field of specialization. Candidates for doctorate degree may also be considered;
2. A faculty rank of at least Assistant Professor.
3. Extensive experience in research and development in the field of specialization, with outputs that demonstrate significant impact on policy and practice.
4. Evidence of track record in international peer-reviewed journals;
5. Ability to innovate and willingness to work effectively with colleagues;
6. Ability to carry out independent research and attract research funding;
7. Excellent interpersonal and communication skills.
8. Ability to teach, supervise and collaborate with highly motivated and exceptional graduate students.

13. Leave Credits

Full time faculty members shall be entitled for a maximum total of 15 days vacation leave and 15 days leave credits for a research project in a duration of at least one year, where any fraction thereof shall be prorated accordingly.

PUP Sto. Tomas, Batangas	202604002	8 Jan 2026	Roselyn D. Mervari	Document Released	University Intercom 2025_STUDENT OFF CAMPUS_WarayBat	Dear Director Torres This pertains to your request for the issuance of Special Order (SO) for the participation of PUP Sto. Tomas Campus in the University Intercom 2026 on November 24-25, 2025 at PUP Main Campus, Sto. Mark, Manila with corresponding release of funds amounting to P500,000.00. Per our evaluation, the following are our findings: 1. The request shall be chargeable against the FY 2026 Internally Generated Fund (IGF) - Sports Development Subsidy of PUP Sto. Tomas. However, there is no allocation for traveling, representation, and other supplies. Hence, we regret that we cannot provide funds for this request, provided that this request shall be subject for modification/reassignment of funds upon discussion of the University Finance Committee (UFC) and Executive Committee (ExCom). 2. Per University SO No. 11, s. 2024, the University may only provide funds up to P120,000.00 for group participation of Women (W) delegates. As such, if this request shall be for participation in the said activities, it may be provided with a copy of the approval of the ExCom regarding the matter. In view of the foregoing, we respectfully return the request for appropriate action please. Thank you.
PUP Sto. Tomas, Batangas	202604005	8 Feb 2026	Cecilia Peña	Document Released	2026 Philippine Association of Software Program Interactions, Inc. April 14-17, 2026	Dear VP Officer: This invitation to be invited for the issuance of a Special Order (SO) for the PUP Sto. Tomas Campus is for the participation of the PUP Sto. Tomas Campus in the Philippine Association of Software Program Interactions, Inc. (PASPIS) 2026.

Provision Of Materials and Other Resources Research

Institutional Research Facilities

Research Facilities

Research Office

Polytechnic University of the Philippines Sto. Tomas Batangas provides a Research Area located at the Main Building Ground Floor. The Office function as the center which ensures the attainment of University Research Thrust and Priorities. It also facilitates the creation of Research Committee and provide trainings & activities pertaining to research exposition, compilation, publication, and utilization.

PUPSTC Research Office Located at the Main Building Ground Floor

Research Section inside the Office to accommodate students and faculty members

Research Thesis Area

Polytechnic University of the Philippines Sto. Tomas Campus provides facilities intended for the field of research. The University Library have a designated area to accommodate Students and Faculty researchers where they can browse references, journals, and thesis compilation in the university. This is located in PUP STC Cultural Building Second Floor.

The University provides area to compile student research output which are available for other researchers for references. This is to also ensure that research produced in the university are being utilized by stakeholders.

Section is provided for Research Thesis and Feasibility output which are arranged in shelves and well-lighted area.

Designated Rooms for Research Presentations

The University provides area for students who conduct research defense and presentation assisted by their Program Coordinator and Research Panel members. PUPSTBC students are required to produce research in the form of Capstone, Thesis, or Feasibility studies as indicated in their program curriculum.

The Bachelor of Science in Information Technology program students during their Capstone Defense in PUPSTC Computer Laboratory at Main Building.

Forms and Resources

To facilitate the research process in the University, PUPSTC provides forms and resources to researchers which serves as guidelines to properly process the documentation and conduct of their researches. The following are the forms used for Research facilitation:

Research Journal

The **PUP Research Journals** are strategically aligned with the University’s core academic specializations. As peer-reviewed publications, they facilitate rigorous scholarly exchange and foster meaningful research engagement within both local and international scientific communities. Collectively, these journals contribute substantially to the advancement of their respective disciplines—Philosophy, Social Sciences, Education, Labor Studies, Creative Works, and Science and Technology. Moreover, their open-access publication model ensures the equitable and unrestricted dissemination of knowledge, removing financial and structural barriers that limit academic reach and impact.

Research Publications Office

The Research Publications Office (RPO) is responsible for consolidating and disseminating the University's research, extension, and development undertakings through print and online media. It helps document and promote the Research Sectors' contributions to the University by producing publications such as research journals, bulletins, newsletters, special reports, among others.

Our office is composed of 3 sections:

- Editorial Section
- Printing and Layout Section, and
- Journal Management Section

The RPO houses the six (6) University Journals namely:

1. Bisig
2. Education Review
3. Entrada
4. PUP Journal of Science and Technology
5. Social Sciences and Development Review
6. The Mabini Review

Services

The RPO mainly caters to the publication needs of the different offices, institutes, and centers that comprises the university’s Research Sector, Among its services are:

1. Graphic Designing of poster, program/Invitation, tarpaulin, certificates, etc.
2. Typesetting/Layout of research journals, manual, newsletter, brochure, etc.
3. Editing of manuals, journal, articles, books, magazines or newsletters, reports, etc.

1. Vol. 4 (2022): Bisig

Published: 2026-05-19

Ang **BISIG** ay bilingual na refereed journal na nagtatampok ng mga artikulo o papel pananaliksik hinggil sa kalagayan ng paggawa, anakpawis at kanilang mga pagawaan at komunidad. Ito ay taunang inilalabas ng PUP at pangunahing nagtatampok ng mga pag-aaral sa mga isyu at usaping iniluluwal ng relasyong pang-industriya at panlipunan. Karaniwang nakatuon ang mga paksa sa mga usapin tulad ng union at unionismo, neoliberal na globalisasyon, kilusang manggagawa, kalagayan ng mga anakpawis at iba't ibang saray nito, kalagayan ng mga industriya, at iba pang katulad. Maaaring ang paksa ay tumatawid o naghuhugpong sa mga disiplina tulad ng kasaysayan, sosyolohiya, politika, ekonomiya, sikolohiya, pagpapaunlad sa pamayanan at lipunan, wika, sining, kultura, kasarian, kababaihan, diaspora, agham, teknolohiya at iba pa tungo sa paglapit na multi/interdisiplinaryo. Tumatanggap din ng mga kontribusyon sa anyo ng rebyu ng aklat, komentaryo,

transkrip ng talakayan, at mga akdang pampanitikan, basta nakatuon ito sa mga nabanggit na paksa. BISIG is a bilingual refereed journal which features articles and research on workers, their working places and communities. This is published annually by PUP which primarily discusses issues born out of industrial and social relations. It highlights topics on unions and unionism, neoliberal globalization, workers movement, conditions of toiling masses, industry situations and the like. The topics can also tackle issues across disciplines like history, sociology, politics, economy, psychology, development of communities and society, language, arts, culture, gender, women, diaspora, science, technology and others towards multi and inter disciplinary correlation and discussion. The journal also welcomes contributions on book review, commentary, interview transcriptions, and literary pieces, provided that they conform with the prescribed topics.

2. Vol. 14 No. 1 (2025): PUP Education Review

Published: 2026-01-08

The **PUP Education Review** (EdRev, formerly Education Review) is one of the flagship journals of the Polytechnic University of the Philippines. It is an open-access and a peer-refereed journal that provides researchers with a platform for research engagement in the local and international community. The annual publication of EdRev presents a substantial collection of emerging trends and issues in education for a better understanding of the educational landscape and the people working in it. EdRev does not charge article processing fees (APCs) to allow a wide range of knowledge sharing across the globe.

0. Vol. 10 (2024): Entrada

Published: 2024-12-31

ENTRADA

ANG DYORNAL NG MALIKHAING PAGSULAT
AT PANITIKANG FILIPINO

Ang **Entrada** ay ang natatanging pampanitikang dyornal ng Politeknikong Unibersidad ng Pilipinas na inilalathala isang beses sa isang taon. Bukas ang Entrada sa anumang mga paksain at usapin. Nilalayon at tinatanganan ng Entrada ang pagpapasulpot ng mga akda at pananaliksik na may matalas na kamalayang panlipunan kasabay ng makabuluhan at masining na pamamaraan ng pag-aakda. Dumadaaan ang mga akdang isinumite sa masusing proseso ng double-blind peer review gayundin sa pagtatasa ng lupon ng mga editor nito na kinabibilangan ng mga respetadong iskolar at manunulat sa loob at labas ng bansa.

0. Vol. 16 (2023): PUP Journal of Science and Technology

Published: 2026-03-03

PUP Journal of Science and Technology (PUPJST) is an open-access, double-blind, peer-reviewed journal published by the Polytechnic University of the Philippines; providing publication of articles in all areas of science, engineering, and technology.

The journal welcomes submissions from all researchers, regardless of their geographic location or institutional affiliation.

PUPJST publishes **original scientific papers and application-focused articles, reviews, short communications, and narrative reports** from recently accomplished research from a wide range of disciplines, including but not limited to:

- *Agricultural Sciences* - crop and livestock production, sustainable agriculture, soil science, and agronomy
- *Forestry and Fisheries* - Sustainable forest management, biodiversity conservation, aquaculture, marine ecology, and fisheries management
- *Life Sciences* - Biology, botany, zoology, microbiology, genetics, and biotechnology
- *Food Sciences, Nutrition, and Dietetics* - Food processing, food safety, human nutrition, and dietary studies
- *Environmental Sciences* - Conservation, climate change, pollution management, and sustainability
- *Computing and Information Sciences* - Artificial intelligence, data science, cybersecurity, software engineering, and emerging technologies.
- *Mathematics, Engineering, and Technology* - Applied mathematics, engineering innovations, robotics, renewable energy, and smart technologies

0. Vol. 17 No. 2 (2025): Social Sciences and Development Review
Published: 2026-02-18

The Social Sciences and Development Review Journal (SSDR) is an open-access university journal of the Polytechnic University of the Philippines (PUP), under the Research Publications Office of the Office of the Vice President for Research, Extension, and Development. Beginning with its 2025 issue, SSDR is published biannually and features peer-reviewed articles in the social sciences and development studies, preferably those focusing on the Asia-Pacific context. The journal promotes critical, multidisciplinary, and constructive discourses in the social sciences and allied disciplines. Articles that seek to synthesize normative fields such as religious studies, theology, or philosophy with the social sciences are likewise welcome.

Social Sciences and Development Review Journal aims to publish articles from a wide variety of methodological and disciplinary perspectives to serve the interests of a wide range of thoughtful readers, students, and academic scholars of the social sciences and development such as sociologists, anthropologists, historians, economists, psychologists, political scientists, as well as social development and cooperative scholars. It also aims to publish special issues on important and urgent social concerns that affect the local and global society.

0. Vol. 16 No. 1 (2026): Mabini Review

Published: 2026-03-31

The Mabini Review Journal is an open-access university journal administered by the Research Publications Office under the Office of the Vice President for Research, Extension, and Development. Beginning with its 2025 volume, the journal adopts a biannual publication schedule and invites submissions from both local and international scholars. These submissions may include research articles, scholarly manuscripts, and book reviews representing a wide range of philosophical traditions and intellectual perspectives.

The journal particularly encourages works that engage with Filipino Philosophy, cultural studies in local and global contexts, Philippine studies, the humanities, political theory, social history, and allied fields. Manuscripts submitted for consideration are expected to demonstrate analytical depth, scholarly rigor, and coherent argumentation, while contributing meaningfully to ongoing philosophical and interdisciplinary discourse.

The goals of the publication are as follows: (1) maintain confidentiality in managing submitted manuscripts; (2) observe timely publication of the journal; (3) pursue unbiased double blind review system; and (4) ensure that editorial decisions are based on originality, relevance, and quality of a manuscript and its contribution to the body of knowledge in the disciplines that the journal seeks to cultivate.

Mabini Review is indexed and listed in the following:

The Philosopher's Index

- Google Scholar
- Crossref
- PhilPapers
- Scilit: Scientific & Scholarly Research Database
- Andrew Gonzales Philippine Citation Index
- Philippine E-Journals
- Philippine Institute for Development Studies- Socioeconomic Portal for the Philippines
- Commission on Higher Education (CHED) granted Mabini Review Journal Category B Accreditation through CHED resolution No. 146-2015.
